State Industrial Accident Commission

(Continued from page 1)

In case the workman is injured in the course of his employment, the commission will pay all expenses for doctors bills, hospital bills, medicine etc., not exceeding \$250 and in addition compensate the workman for time lost by paying him a portion of his wages, not less than \$30 per month. Under no circumstances can he sue the employer for damages on account of injuries sustained as the money paid by the commission is full compensation under the law for the injury. This insures the employer absolute protection from damage suits and possibly from court costs and insures the workmen of his expenses and money on which to live while injured. Workingmen's compensation is one of the greatest steps in legislation. It is not only protection to the individuals but it is a protection to society against injured workmen who might become public charges and who often do.

State compensation is insurance conducted by the state without profit and the state appropriates sufficient sums of money to more than pay all the expenses of operation, so that every dollar collected from the employers and workmen alike is paid back directly to injured workmen in first aid and for time lost. Numbers of farmers and a great many manufacturers in times past have afforded themselves liability insurance from insurance companies and in such cases the amount received by the workmen is questionable, as more than half of it is used by the company in expenses and profit and a considerable portion of that remaining is dissipated by the injured workman in lawyer's fees and court costs in suing for his rights.
