The merchant who does not invite trade through the columns of the local newspaper, has no right to complain if he does not get it. He expects the local paper to fight against sending orders to mail order houses and to thus work indirectly for his benefit, yet he gives the paper no business. He forgets that there is a reciprocal obligation in business.

To the republican voters of Linn county:—I am a candidate for the office of County Surveyor and am now serving my fourth term in that capacity.

The office of county surveyor is one in which experience is a very necessary qualification and one in which it requires several years practice in handling deed, road and other records connected with the surveyors office, before one is competent to give his best matured judgment to those requiring same.

I have had 16 years experience in the surveying profession. Eight years in government work, eight years in county and municipal surveying. I attended school at the University of Oregon.

During the incumbency of E. T. Fisher in the office of County Surveyor he accumulated the government field notes for Linn county and arranged them in book form along with the reestablished government corners. The notes are a very valuable record to the surveyor owning the same and gives him a decided advantage for accuracy and efficiency in surveying. I purchased these notes from the Fisher estate on entering the county surveyors office.

If nominated and elected to the office of County Surveyor I will endeavor to give to the citizens of Linn county the best of my knowledge and experience. Paid adv.
