Our German-American friends must now be convinced that President Wilson's neutrality has been and is the real thing and not a sham. The proof is, a German undersea merchantman can come into an American harbor, discharge her cargo and buy whatever she pleases for a return cargo, just the same as an English, French, Italian or Russian merchantman. It is not our fault that German merchant ships have been driven from the sea. Let them get to our harbors, they can load a return voyage with whatever they will and we will guarantee safety to the 3-mile limit. We can do no more for an English or French ship.
