## Shall Linn County Have a County Agent

M. O. Evans, Jr., assistant state leader, in extension service, county agent work, Oregon Agricultural college and U. S. department of agriculture, cooperating, was in the city Tuesday in the interest of establishing a county agent for Linn county. Oregon now has fourteen county agents, doing splendid work for the advancement of agricultural interests. Farming has become a science, calling for the best in methods, and it is declared to be demonstrated that the county agent pays back every year many times the cost, materially advancing the interests of the county. The Linn county court is considering the matter, and will no doubt act definitely on it at an early term of the court. In the United States there are now 1,100 county agents, spending their time for the farmers of the country, in the development of agriculture. Oregon must keep pace of the times, one of the most progressive of states.—Albany Democrat.
