Charles E. Hughes, if defeated and the outlook now is that he will be, will say after November 7, that he was extremely foolish to allow the G. O. P. old guard leaders to attempt to make a catspaw of him with which to rake their government chesnuts. A \$10,000 a year life job should not be lightly surrendered at the behest of a lot of disgruntled politicians who are about to be cast into the scrap heap.

Lime at Cost

At the lime conference held in Corvallis, Oct. 7, provision was made for forming a committee to draft a bill giving the state the right to acquire by purchase, lease or condemnation such limestone deposits as may be needed to supply the farmers with agricultural lime at cost; establish and equip a plant to be operated by convict labor; to give the movement all possible publicity. As member at large I take this means to urge upon the voters the necessity of learning how the men seeking the legislative office stand on this important subject. The time has now shortened to a matter of days, and it behooves you, farmers, to ask that the candidates from your respective districts, irrespective of party, to commit themselves as for or against this issue. You are entitled to as much consideration as the farmers of other states, but it is very plain that you will have to ask for it; and it might just as well be now as later; you will lose much and gain nothing by delay. Why not create sub-organizations in your immediate vicinity to push this movement?

Sam H. Moore,

Big Fire at Crabtree

Word reached Scio Saturday afternoon that the W. J. Turnidge store building and dwelling adjoining was burning and, later reports stated, were destroyed.

The blaze started by a spark igniting the dry moss on the roof of the store building and as the water supply was short, the people could do but little to check the flames.

The store room was occupied as a feed store and the upper story by Prof. Bigbee as a dwelling. All of the furniture was removed from the upper story.

The loss is placed at \$2000. If there was insurance, we have not heard about it.

An Excellent Cuisine

Wm. Ehlert, who is now proprietor of the Russ house, in Albany, invites all of his old friends and the traveling public in general to sample the splendid meals he is now serving. Good well prepared, served as you get it at home and without attempting any unnecessary display, is the rule at the Russ house. If you desire a good wholesome eat and plenty of it, the Ehlert is the place to go.

Hacks, Surreys and Buggies

We still have some hacks, surreys and buggies; also, two manure spreaders, which we offer on the market at very low prices. We intend to close out these lines regardless of price.

If you are in the market for any of these goods, be sure and see us before you purchase elsewhere, as I am positive that we can save you 15 per cent on your purchase.

Yours for business
Chas. Wesely.

The Beginning of Rural Delivery and Its Progress

William L. Wilson was the father of rural delivery, whose benefits no one can fully describe, for it is without question the most popular administrative measure of the government. For years there had been a growing discontent among farmers and the people in the smaller towns at the postal advantages afforded the cities and the more popular communities. They felt themselves deprived of the opportunities and benefits which others enjoyed, and the desire for recognition was outspoken and insistent and could no longer be denied. On June 9, 1896 the sum of \$40,000 was made available, and on October 1, 1896, the first experimental rural delivery was put into operation in Jefferson county, West Virginia. Service was established on three routes simultaneously, one from Charles Town, one from Ulvilla and one from Halltown.

At the close of business June 30, 1915, there were in operation from 18,813 post offices throughout the country 43,877 rural routes. Up to and including June 30, 1915, 26,080 postoffices were discontinued on account of the establishment of rural delivery, representing a saving to the postal service of \$1,613,000 per annum and also a saving of \$3,482,000 on account of the discontinuance of star-route service. The period of greatest activity in the rural service was from 1900 to 1905 the appropriations running from \$450,000 in 1900 to \$21,119,000 in 1905.
