Candidate-for-sheriff Kendall was in Scio Tuesday en route to Jordan. Miss Neva Balschweid, chef at the hospital, visited Albany Tuesday.

If men will not serve as city officials the women will have to come to the rescue. The Tribune is very much in favor of a mayoress.

D. C. Thoms made a get-acquainted-with-the-people trip to Lebanon, Brownsville, Halsey and Harrisburg this week.

The price the condensery is paying for milk ought to induce every farmer who milks cows to sell his product thereat. It is a home manufacturing concern and is worthy of the patronage of home people.

Wind Mill and Tower For Sale.

John T. Brock has an 8-ft steel wind mill and steel tower for sale. The mill has been used a short time but is in first class order—good as new. Has ball bearings and all modern improvements. The tower has never yet been set up. The whole can be bought for \$75, which is less than one half of what the cost was two or three years ago and not one-third of what the cost of a new one would be now. It is a splendid bargain. 11tf

When city election time comes we find too many of our business men live without the city limits.

Riley Boyd, with the condensery three years ago, is operating a tie and pile camp on the Randall place 3 miles south of town. Some 10 to 20 men are employed, all of whom board at the hotel. Ship knees are being taken out as well.

The Tribune is giving considerable space to election matters this week. But the end is at hand. We hope the end of war activities is not far distant as well. Then we can give our attention to home development and welfare. Anyway this editor is getting tired of both war and politics and will enjoy a rest by writing about something else.

Milk may be used not only as an addition to an already rich diet, but in place of some of the slowly digested dishes which over tax the digestive organs and impair the health. Milk contains all the elements necessary to sustain life and build up the body. It must be remembered too, that butter is a food for all, for rich and poor, for old and young. Cottage cheese is another dairy product that is of great food value.

Milk As An Energy Maker Acknowledged by Shipbuilders.

Because Portland and Seattle shipbuilders make a scramble for the milk bottles when the noon whistle blows they are becoming famous and to the fact that they drink milk is attributed their ability to do better work than any other shipbuilders.

Now comes San Francisco showing she, too, has taken up the habit. The Pacific Dairy Review says "one distributor alone supplies 1,500 quarts daily to men in the Union Iron Works," although, the review adds, "in San Francisco, the milk-drinking habit is still in its infancy." Here's another argument for keeping up the dairy herds. The milk bottle is backing the beer can off the map. Time was when the men of the iron works would have "rushed the can" as they termed getting their beer.

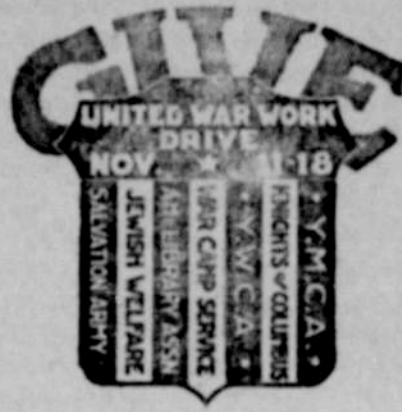

"The food value of a quart of milk is the equivalent of three fourths of a pound of beef, two pounds of chicken or eight eggs. Compare the costs and milk wins." Dr. E. V. McCullom of John Hopkins University who visited Oregon not long ago made this statement. He adds "For the sake of your family's health, and for the reduction of your living expenses, use more dairy products, and then some more."

"The restricted use of milk would mean a serious loss of energy, and a serious menace to the winning of the war" says G. A. Morgan in Hoard's Dairyman.

Shoes have gone up in price but we buy them. They are a necessity. Yet milk, the food that is necessary to everyone, because it goes up, is too often cut from the diet. Isn't that a little inconsistent?

We must have pure fresh milk. Count it economy to see that each child in the family has at least a pint of milk a day. Get the milk habit. Encourage the dairymen to keep up his dairy. He is willing to do his share but he can't do everything without cooperation.

The self-denial of the American farmer, added to the efforts of the American farmer, have removed fear from the minds of our Allies, for this year, at least. Let's keep it up.

A. F. Beard Passes.

After a lingering illness due to the infirmities of old age, A. F. Beard died about 6 p. m., Wednesday, October 30. Mr. Beard had been an invalid the past three years and was confined to his room and bed during most of the past three months, until released from suffering by the pale messenger.

The funeral has not yet been arranged though the burial will probably occur at Providence cemetery.

Fred P. Nutting, of the U. S. internal revenue department, was in Scio yesterday looking after incomes. Strange to say he did not even suspicion a country newspaper of having an income sufficient to pay a tax. He has been in the business himself too long to waste time looking up newspaper incomes.

Monday, E. D. Myers, A. E. Randall and L. E. Jones appraised the personal property of the late Jackson A. Bilyeu at \$11,622.38.

D. C. Thoms for Representative.

The democratic ticket offers but two candidates for representative, viz.: W. P. Elmore of Brownsville, and C. C. Jackson of near Halsey. A third candidate must be written in or one of the republicans voted for. For this third place The Tribune urges that democrats vote for D. C. Thoms.

Mr. Thoms has served two terms as a member of the legislature for Marion county and proved himself to be honest, economical and a worker for the people's interests. There is still another reason why he should receive the republican vote and those of the democrats as well. He is the only candidate for office from the Scio country and in justice to this section he should be elected.
