NARROW ESCAPE FROM DROWNING

Mrs. John Kelly and Mrs. Whipp Get in Deep Water. Rescued by Bill Leffler.

Monday afternoon Mrs. John L. Kelly and Mrs. Whipp went in bathing in Thomas creek near Leffler's. By some means they slipped into deep water and as neither one could swim they had to call for help.

William Leffler was working near, heard their cries and rushed to the rescue.

The women were so near drowned that he could scarcely get them on terra firma, but finally did so with the aid of others who had by this time come up.

Dr. Hobson, John Kelly and others reached the scene as soon as possible. Mrs. Kelly was so near drowned as to be unconscious. By prompt measures both ladies are now all right. They will probably be more careful in the future when doing bathing stunts. Only the prompt action of Leffler averted a tragedy.

The telephone girls over in Albany concluded they would join the telephone strike, so on Monday they failed to answer the call "hello central." But Manager Sanders knows a thing or two; he had other girls, most of them experienced, ready to take the strikers' places. After an hour or so everything was moving as usual. Looks like these striking girls had struck themselves out of a job.

Don't throw trash, paper, etc., on the street; cut the weeds and grass along your sidewalks. A neatly kept lawn is out of harmony with a dirty and filthy street in front.

Wool Pooling Pays Premium.

In certain sections of the fleece growing states wool pooling has grown greatly in popularity. Small producers who formerly were unable to market their wool as individuals in a profitable manner can combine with their neighbors and produce a sufficient supply of graded quality wool to make it attractive for the Eastern wool merchants to bid on these fleeces. During the last year the various co-operative associations have sold their wool for prices ranging from 1 to 8 cents premium a pound above the prices offered by the local buyers for the same clips.

BRITISH DIRIGIBLE CROSSES ATLANTIC

Giant Airship Completes Trip in Safety, After Battling With Fog and Storm.

Mineola, N. Y.—Great Britain's super-dirigible R-34, the first lighter-than-air machine to cross the Atlantic ocean, anchored here at Roosevelt field after an aerial voyage of 108 hours and 12 minutes which covered 3130 knots or approximately 3600 land miles.

Passing through dense banks of cloud, with the sun and sea visible only at rare intervals, the R-34 was forced to cruise 2650 sea miles to reach Trinity Bay, Newfoundland, from East Fortune, Scotland, and 1080 sea miles from there to Mineola.

When the super-dirigible arrived here she had left only enough petrol to keep her moving 90 minutes longer. Her crew, almost sleepless for four and a half days, were weary almost to the point of exhaustion, but happy at the successful completion of their trip.

Haggard, unshaven, their eyes bloodshot from the long vigil and lines of care bitten deep into their faces, Major G. H. Scott, the commander, and his officers showed plainly the effects of the anxious hours through which they lived while they were cruising over the far reaches of Canada and the Bay of Fundy, beset by fog, heavy winds and terrific electrical storms.
