Cash on hand 4,497.87
Total \$16,905.13

Reasons for the increase of cost of building the power plant over the original estimates is due to the following reasons which have developed since beginning work last April:

- Increase in the cost of labor 30 per cent.
- Increase in the cost of cement 90 per cent.
- Increase in the cost of machinery and supplies 50 per cent.
- Hauling due to the impassable roads 50 per cent.
- Change of Dam location, made necessary by being unable to secure a rock foundation on the north side of the creek, has made an additional cost of \$5,000.00.

The work has been delayed, first by the inability to secure labor at any price and unable to secure cement until three months after ordered and delivery of supplies nearly three months after orders were placed.

Extra costs in securing right of way has also added to the expense and three stages of high water doing damage to the extent of \$500.00.

Ford
THE UNIVERSAL CAR
Light Weight Means Light Expense
Expense of operation is a factor of your consideration when buying a car.
The Ford vanadium steel, heat treated by Ford methods, is so strong that the Ford car is the standard light weight car of the world today. Over 3,500,000 in actual use to prove this fact beyond question.
Light weight means light expense in operation. Everyone can afford to drive a Ford. Depreciation cost, repair cost, tire cost, gasoline cost and oil cost all help sell the Ford, as well as the purchase cost.
Even the Ford Sedan, with starter, demountable rims and tire carrier weighs only 1875 pounds. The price is \$795 f. o. b. Detroit, and the expense of operation is so low it is a real necessity for everyone in Oregon.
Drive a Ford Sedan, seating five—or a Ford coupelet, seating three—for business, to the theatre, for social calls or for touring comfort. Place your order now.
