

HOW TO SELECT BEEF CALF AND RAISE IT

Bulletin Written Especially for Young Farmers.

Desirable and Undesirable Types of Calves Are Discussed and Illustrated—Importance of Changing Its Ration.

For the prodigal who has finally turned away from growing inferior, unprofitable, and uninteresting live stock the United States Department of Agriculture has prepared a special farmers' bulletin, No. 1135. Under the title "The Beef Calf: Its Growth and Development," this new publication, written principally for young farmers, tells how to select a beef calf and raise it either for market or for use as a breeding animal.

The bulletin is a response to an unusual demand by members of boys' and girls' clubs for specific information on

the principles and practices of raising well-bred calves, preparing them for show or sale, and disposing of them to advantage. Desirable and undesirable types of calves are discussed and illustrated.

There are chapters on equipment needed, keeping the calf healthy, feed-

ing, and the importance of changing the ration as the animal develops, also methods of preventing parasites and disease. The bulletin describes clearly how to clip, curl, or otherwise prepare the coat of the various breeds of cattle preparatory to showing them, with additional directions regarding shipping and exhibiting. Persons desiring such information should write to the United States Department of Agriculture, Washington, D. C., for Farmers' Bulletin 1135.

A public hearing called for the purpose of taking steps to prevent the importation into Oregon of infected potatoes from California will be held in Salem on December 14, according to announcement by Charles A. Parks, president of the state board of horticulture.

Regulation of the Upper Klamath lake by the building of the Link river dam is necessary for the irrigation of the 50,000 acres under ditch in the Klamath basin, declares the report of the Klamath Falls chamber of commerce committee which conducted a hearing of the controversy last week.

A Good Type of Bull Calf.

New Crank Case Service for Motorists

YOU probably know that after a few weeks of driving your lubricating oil becomes dirty with carbon, road dust and fine particles of metal, which circulate through your engine and cause unnecessary wear on bearing surfaces. And gasoline escapes past the pistons and dilutes the oil. Granted. There's nothing new about that—but—

Here's an absolutely new way to get rid of this dirty, diluted oil and put your engine in line for better performance and longer life. It is called Modern Crankcase Cleaning Service.

Modern,—because we use Calol Flushing Oil, the new, scientific,

thorough flushing agent that does not contaminate the fresh oil.

Our skilled mechanics know how to clean out a crankcase with it correctly and quickly, at a nominal cost to you.

This service assures proper lubrication for your cleaned engine. We refill the crankcase with fresh Zerolene of the correct grade.

We recommend Modern Crankcase Cleaning Service as the latest word for better engine operation and longer life for your car.

TODAY: Bring in your car for Modern Crankcase Cleaning Service.

Ford
THE UNIVERSAL CAR

Closed
Car
Comfort

No danger in traffic—a clear vision in all directions.
No flapping curtains, no drafts on your head. No heavy
overcoats or gloves. As much air from outside as you
want and no more. As much warmth from inside as
want and no more. All plate glass windows and wind
shields open or close in a moment's time to any posi-
tion you wish.

In rain, snow, wind or storms; in summer heat or sun, the comfort
car for Oregon is the Ford Sedan.

That tells you briefly why Ford closed car sales in Oregon have in-
creased 1500 per cent in 1920 over 1919. That explains why you see so
many of them everywhere now, on country roads, mountain trips or city
streets.

All the sturdy dependability and economy of the Ford chassis and all
the beauty of an electric, at a price you cannot resist.

Get your Ford Sedan now.
