"See what we found in your crankcase oil"

THIS lens shows some of the dirt that can be found in any crankcase after a few weeks of driving—road dust, carbon and fine particles of metal. Such dirt circulates with the lubricating oil through the engine, together with gasoline that escapes past the pistons and dilutes the oil.

Have the dirty, diluted oil in your crankcase drained out—now—before unnecessary wear begins.

We can do that best for you with Modern

Crankcase Cleaning Service—convenient, quick, economical. We use Calol Flushing Oil, the scientific, thorough flushing agent which does not contaminate the fresh oil. We assure proper lubrication for your engine by refilling the cleaned crankcase with Zerolene of the correct grade.

Make a regular habit of Modern Crankcase Cleaning Service. It gives better engine performance and longer life to your car.
