OREGON MIST.

Will Build Trail.

Practical assurance that a trail 15 miles long will be built from the Roberts ranch, 14½ miles above Foster on the north fork of the South Santiam river, into the Quartzville district, was given by the county court to a group of eight residents of the territory affected. Work upon construction will start as soon as weather permits and labor available.

The trail will follow the north bank of the stream and will lead into a district of mining claims, some of which are said to promise to startle the mining world at some time in the future.

The trail will be made passable for horses and footbridges will be constructed across streams where larger bridges are deemed unnecessary.—Albany Democrat.
