A Guardian's Duty.

Contrary to a too general opinion banks cannot loan an unending stream of money. The bank is really the guardian of the liquid wealth of any community. The bank must see that this money is available at the call of its depositors.

If the average business firm would watch its collections and credits as closely as the banks have to, financial disasters would be of infrequent occurrence. The well managed bank today is in the nature of an educational institution, furnishing its experience and advice free of charge to its individual depositors and industrial and agricultural customers. A great factor in establishing in this nation credit and financial responsibility is the home banking house.

I'M COMING.

Look up your wants. I will be around Scio, Lacombe and Mill City for the next three weeks.

Tariff and the Business Man's Party

Republican leader Mondell (Wyo.) promises that the tariff bill will be reported about July 1 to the house, and the fact that republican members are in disagreement over some of the schedules, especially wool and lumber, indicates a long and sultry debate. The making of a tariff bill furnishes a good illustration of the business methods of the democratic and republican parties in expediting legislation.

In the democratic congress elected in 1910, the house passed a tariff bill within 30 days after it was organized.

The republican party has had control of congress now for 27 months; the tariff question has been under consideration for about 8 months; the present congress has been in session nearly 3 months, and a tariff bill is just about to be reported.

The democratic congress, however had these advantages: It did not have to cater to any special interests; it had no election debts to pay to privileged classes; it did not have to listen to a horde of lobbyists. It simply had to make a business tariff and pass it, and business at once adjusted itself to the new schedules.

Still the republican party goes right on claiming to be the business man's party, and lots of good people who either don't know the facts or don't take the time to think about them, go right on believing it.

Oregon Made Home Knitting Yarns.

A great surprise for the home knitters of Oregon, but still a fact. Furthermore, this yarn is absolutely virgin wool yarn; the wool was grown in Linn county, sold by Mr. Senders to the Oregon Worsted Company (mills located at Sellwood), made into worsted yarn by Roy T. Bishop, son of C. P. Bishop, proprietor of the Woolen Mill Store of Salem. Oregon knitters try this yarn out. All colors. 45c per ball of 2 ozs. Sample sent on application. Address C. P. Bishop, Box 75, Salem, Oregon.
