THIRTY-FIVE TONS MILK

This Vast Amount Produced in Seven Years by Ayrshire Cow at O. A. C.

"Willowmoor White Pride" is a pretty big name for a cow, but the O. A. C. station Ayrshire of that name seems doing her best to deserve it.

In 7 years she has produced 8180 gallons of milk—enough to fill the swimming tank at Shepard hall. If a man had credit with his local milkman for that amount he could draw a quart of milk twice a day for 45 years and never get a milk bill.

The edible solids of the 35 tons of milk she gave are equal to the edible solids of 30 fat steers averaging 1250 pounds each. And for good measure Willowmoor produced 7 heifer calves in the same seven years, each of which, says P. M. Brandt, head of the station dairy department, is capable of duplicating her mother's record—except possibly the heifer calf production.

MAKE BETTER SWISS CHEESE

Method Developed by Department of Agriculture Has Passed into Commercial Stage.

The method of making Swiss cheese with purified and controlled bacterial cultures, developed by the dairy division of the United States Department of Agriculture, has now passed definitely into the commercial stage. This new process was worked out in the dairy laboratories, given thorough trials in the experimental cheese factory operated by the dairy division at Grove City, Pa., and is now being used by a number of commercial factories in various parts of the country.

The results obtained by two Ohio factories indicate that it will be worth while for those interested in the manufacture of Swiss cheese to adopt the method and give it a fair trial. For the cheese made in June of this year one of these factories received a straight price of 34 1/4 cents a pound; the other factory, 30 cents. At the same time other factories in this area received from 20 to 22 cents. Only one of them succeeded in selling for as high as 25 cents. For the July product, one of the factories received 30 cents for fancies and No. 1 and 27 cents for No. 2. The old-system factories received the same price as for June cheese.

The principal reason the buyers were willing to pay this margin over the general run of cheese made in the locality was that the percentage of high-grade cheese had been greatly increased.

PEOPLE'S COLUMN

WHAT'S WORTH WHILE

Scio, Ore., April 17, 1922.

To the Editor:

"He who steals my purse, steals trash,

But he who filches from me my good name

Robs me of that which enriches him not,

And maketh me poor indeed."

—Shakespeare.

Many persons are so busy tearing down the character of others, that they forget to build up their own character, and sooner or later they topple to an ignominious depth through neglect. I say let each one work out his own destiny unhindered. Don't place any more obstacles in a fellow creature's path for him to overcome than nature has put in his lot. Attend to your business of building up a fine character of your own, then you will have no time to harm others.

—Anonymous.

Dog Owners, Attention

The city license on dogs is now due and must be paid on or before May 1, 1922. You will save time and money by attending to this at once. License on females, \$2; on males, \$1. Pay same to Henry Shelton, City Marshal.

—NEW LOW PRICE

Sharples

SUCTION - FEED CREAM SEPARATOR

Now Offered at the Lowest Price in Its History

You can now secure this wonderful separator for about one-half the price of two years ago. Any person who milks two cows or more certainly cannot afford to be without a Sharples Separator at this low price.

But "low price" is not the only reason why you should select the SHARPLES.

Consider These Advantages

The NEW SHARPLES SUCTION FEED SEPARATOR skims clean at widely varying speeds; the "Suction Feed" sucks milk into bowl in exact proportion to speed. No other separator can do this.

Whatever the speed, the cream will be of even quality—not thin today and thick tomorrow. Other separators vary the density of the cream when the speed is varied.

Call or write for our FREE catalog which gives full information on separators, garden and field seeds, poultry and bee supplies, etc.

The large, low supply-can saves heavy lifting. The simple tubular bowl has only three pieces. There are no discs to wash.

The SHARPLES is ruggedly built for long, hard service, and is fully guaranteed.

Raise All The Chicks You Hatch

Raise them the Pan-a-ce-a way

START them right—keep them growing—without any setback. PAN-A-CE-A gives chicks good appetite and good digestion—gives vigor to resist disease. PAN-A-CE-A prevents food fermentation—that's where most of the bowel troubles start. PAN-A-CE-A prevents and cures gapes, indigestion, diarrhea, leg weakness. PAN-A-CE-A your chicks and then watch them feather. A PAN-A-CE-A chick will out-feather a non-PAN-A-CE-A chick every time.

Dr. Hess Poultry PAN-A-CE-A makes chicks grow.

We handle the Dr. Hess Line. Call on us.
