

THREE REASONS

why you should have us examine your eyes. First, we give a scientific examination; second, we never advise glasses unless they are really needed, and third, if you need glasses we will have them made under our personal supervision.

Oregon Made Home Knitting Yarns
A great surprise for the home knitters of Oregon, but still a fact. Furthermore, this yarn is absolutely virgin wool yarn; the wool was grown in Linn county, sold by Mr. Senders to the Oregon Worsted Company (mills located at Sellwood), made into worsted yarn by Roy T. Bishop, son of C. P. Bishop, proprietor of the Woolen Mill Store of Salem. Oregon knitters try this yarn out. All colors. 45c per ball of 2 ozs. Samples sent on application. Address C. P. Bishop, Box 75, Salem, Oregon.

If you are needing printing of any kind you can do no better than by coming to The Tribune.

A white flower on a stem more than 8 feet high was brought to the Tribune office by A. T. Powell. It has a bloom something like a wild parsnip, but we are not a botanist and would like to know what it is. Can any one give us information? See it at the Tribune.

F. W. Haskell, who has been visiting ye editor and family for the last week, returned to Pendleton Tuesday to look after business affairs. Defeated by Mill City

The Scio Baseball team journeyed to Mill City Sunday for a game with the team in that city. While the local team was not capable of bringing home the bacon, they at least showed the Mill City team that they knew how to play ball. The final score stood 13 th 6 in favor of Mill City.

The Mill City team will play a return engagement with the locals here next Sunday, and we have a hunch the Mill City boys will be surprized—as will the local fans. In fact we understand the team has some surprizes in store and are keeping "mum." If you should see any number of fellows going around with their fingers to their lips—no, they are not sucking them,—"mum" is the word.

Tomorrow the team goes to Lebanon to play that bunch of ball tossers, and they ought to bring home some scalps.

Thistles Make Silage

Bad patches of Canada thistles in grain may be cut out when the grain is in the milk or early dough stage and made into good silage. If then the patch is plowed up and kept cultivated off below the ground

all summer the patch will be greatly weakened or killed out. Fall seeding of vetch and oats on these patches will help further in smothering out the stragglers that survive.—O. A. C.
