

Candidates for Governor

When a candidate for public office makes a campaign promising what he will do if elected, it is fitting and proper that the voter examine the public records to ascertain whether or not the candidate's record squares with his campaign promises. In the present campaign Candidate Pierce professes to be the apostle of lower taxes.

Mr. Pierce's Record

1. Of the \$9,376,000 of state taxes for 1922, Mr. Pierce specifically approved of \$8,564,039. This is 92 per cent of the total. Mr. Pierce had no opportunity to vote on the other 8 per cent, as he was not a member of the legislature when it was up for vote.
 2. He voted for 97 per cent of all tax appropriation bills of the 1919 session of the legislature, and for all the appropriation bills of the special session of 1920.
 3. The State Highway Commission now works without pay. Mr. Pierce introduced a bill to pay the commissioners \$12,000 a year.
 4. He voted to submit a bond issue of \$400,000 for a new penitentiary. Governor Olcott has repaired the old one with convict labor at no tax expense.
 5. Mr. Pierce claims he wishes to relieve real estate of the tax burden; yet he is the author of a bill submitted to the legislature which would exempt from all taxation moneys, notes, credits and accounts.
 6. In the last few years he voted for 185 salary increases.
 7. He voted against the bills to consolidate the state bureaus and commissions.
 8. He introduced a bill providing for the most elaborate commission any state ever had. He specifically provided "to secure every citizen of Oregon an opportunity at all times to work for the state," and provided a \$8,000 salary for the head of the commission. This bill was purely Socialist.
 9. In the 1917, 1919 and 1920 sessions of the legislature there was appropriation bills introduced totaling \$10,528,000. Of these Senator Pierce voted for \$10,078,000.
- Measured by every standard, Mr. Pierce is the most consistent little tax booster the state of Oregon ever had.

Mr. Olcott's Record

1. He introduced a change in the state secretary's report which has saved the state many thousands of dollars since 1912.
2. His renovation of the penitentiary saved the state nearly half a million dollars.
3. He secured funds for a training school building for the Boys' Institute without a single dollar or additional taxes.
4. He is the originator of the Oregon Blue Sky Law, which saves the Oregon people millions of dollars annually.
5. He was responsible for the stopping of junketing trips by state officials at state expense.
6. He secured the passage of a budget law effecting large economies in the state government, which could not otherwise be accomplished.
7. The change in the State Sessions Law, recommended by him, saves the state \$10,000 a year.
8. He has been universally commended for the excellence of his official appointments.
9. He is responsible for changes in the administration of the state farms, which this year brought returns of \$491,000 into the state.
10. He has shown himself, by his acts, a friend of the ex-service men, has warmly supported the bonus measure, and has administered the law in the interest of the ex-service men with honesty and efficiency.
11. He has taken the first real constructive step in the equalization of the state tax situation by the appointment of a committee of experts to investigate and report to the legislature the entire scope of the tax problem in this state, thus assuring that any changes to be made will be made along sane, conservative and constructive lines, which give far more promise of securing results than demagogic bewailing and idle campaign promises such as are being made by the non-partisan candidate of the Democratic party, especially in the light of his record as the champion tax producer of the state of Oregon.

Vote for Olcott for GOVERNOR

REPUBLICAN STATE CENTRAL COMMITTEE
WALTER L. TOOZE, Chairman. C. E. INGALLS, Secretary.

Bested is to feed milk in the usual way to the age of about fifty days, then if the calf is strong and vigorous gradually reduce the amount until none is fed after the calf is sixty to sixty-five days old.

Alfalfa or clover hay and a grain mixture of cornmeal four parts, bran one part and oilmeal one part is kept before the calves. They will begin eating grain and hay when about a month old and will gradually increase the amount until at the time the milk feeding ceases at sixty to sixty-five days of age they are able to get along very nicely without milk.

Calves handled in this manner will be somewhat checked in growth for a short time after the milk is taken from the ration, but will be in as good condition as the calf raised on skim

Teaching a Calf to Drink from Milk.

milk by the time they are six months of age. The total milk used need not exceed 400 pounds. The grain mixture mentioned serves the purpose just as well as more expensive commercial calf meals.—C. H. Eckles, chief of the dairy division, University of Minnesota.

Buffalo Wool.

Buffalo wool, collected from the prairie where the animals shed it each spring, makes carpets more durable than those of ordinary wool. Mounted buffalo heads sell for \$1,000 and new buffalo robes for \$100.

Thousands To Attend

Approximately 150,000 persons are expected to attend the Pacific International Livestock Exposition to be held at Portland, November 4 to 11, according to announcement made by John M. Scott, General Passenger Agent for the Southern Pacific Company at Portland.

Livestock breeders from the entire Pacific Coast, including points as far north as British Columbia, have arranged for entries at the show and more than \$75,000 will be awarded in prizes.

Reduced railroad fares to the exposition have been granted by the Southern Pacific Company from all points on its lines in Oregon, California, Nevada and Arizona.

To Hold Convention

Special excursion fares from stations in Arizona, California, Nevada, New Mexico, Oregon and Utah to Baltimore for the benefit of delegates attending the convention of the United States Blind Veterans of the World War, to be held at Baltimore November 6 to 11, have been arranged by the Southern Pacific Company.

The special rates apply to members of the organization, dependent members of their families and attendants. Tickets will be on sale November 1 to 6, with return limit Nov. 29.

Yes, Yes; Go On!

The art of the invisibilists is an ultradimensional temporal-spatial art, appealing not to separate sense organs but to the residue of differentiated sensitivity, that is to say, their art is synaesthetic.—New York Times.

Shakespearean Philosophy.

We defy augury; there is a special providence in the fall of a sparrow. If it be now, 'tis not to come; if it be not to come, it will be now; if it be not now, yet it will come; the readiness is all.—Shakespeare.

The People's Store

Before Buying a Stove or Range

Did you ever stop to think or ask of what kind of material they are made of or where they are made?

The Stoves and Ranges we handle are made in Oregon and manufactured from Nationally advertised Pure Armico Ingot Iron and Wellsville Steel

No old iron or common cast iron used in their construction. They are no higher in price than eastern made stoves. You can always get extras at moderate cost. Every Stove and Range Guaranteed to be the equal of any. Patronize home industries.

N. I. Morrison, Scio, Ore.

IT WORKED OUT FIFTY-FIFTY

Artist Really Not as Generous as Circumstances Would Have Seemed to Show.

An American artist, who has spent most of his time in Paris, tells a story of a French painter who has a generous heart and a whimsical wit.

It appears that this artist and his sister were joint owners of some house property in Paris. One day one of the tenants—a tailor—came to the artist and said that he could not pay his rent.

"What can I do for you?" asked the artist. "I cannot intercede for you with my sister because I am not on good terms with her." As a matter of fact the artist was regarded as a failure by his family.

"However," he added, after a thoughtful pause, "here is the money to pay the rent, only don't let anyone know I have given it to you."

The tailor after this used to return periodically when his rent was due and obtain the money from the artist.

"I appear to be very generous," the artist remarked on one occasion, "but I am not, because I get half of it back from my sister as my share of the rent."—Philadelphia Ledger.

PRINCE HAS OWN ZOO

The steamer Perim has brought from Bombay and Karachi a consignment of animals presented to the prince of Wales in Nepal and given by him to the zoo. The arrivals include a young elephant and rhinoceros, a leopard cat, a thar, a sambar deer, and several species of pheasants. They came over in charge of Mr. Doctor, curator of the Victoria gardens in Bombay. The Zoological society intends to exhibit these, together with another gift of animals to the prince which is being sent from Singapore, in a special enclosure in the middle of the gardens.—London Times Weekly.

ENGINE COOLED BY OIL

As the result of tests made during the war at the aircraft factory at Farnborough, England, it was demonstrated that in air-cooled internal-combustion engines as much as 40 to 47 per cent of the cooling was, under certain conditions, done by the crank-case. The result has been

the design of a so-called oil-cooled engine, described in Popular Science Magazine, in which the crank-case has been greatly enlarged so as to envelop the cylinders almost completely.

MORE CREDIT

"I wonder why it is that women seem to have a weakness for marrying dissipated men."

"It isn't a weakness," said Mr. Dubwaite firmly.

"No?"
"It's the same kind of feeling that makes an animal trainer take more pride in subduing the fiercest creatures of the jungle than he would in teaching a tomcat to jump through a hoop."

DAIRY

BEST PLAN TO RAISE CALVES

Minnesota Idea Is to Give Youngsters Good Start and Then Feed Hay and Grain.

The milk of 45 out of every 100 cows kept in the United States is sold as whole milk. Owners of the herds where milk is marketed in this way have a serious problem in raising the necessary number of calves to maintain their herds. If no calves are raised and the farmer depends upon buying what he needs there is constant danger of disease and his herd seldom improves from year to year. When raising calves under these conditions some milk must be used, as there is no substitute for it.

Experiments in progress at the Minnesota experiment station show that the best plan so far worked out is to give the calves a good start with milk and then get them on grain and hay as soon as possible. The plan sug-
