Mrs. Lulu Milligan has a fine lot of baby Plymouth Rock chicks, as they are her favorite stock.

Our Sunday school was well attended, 37 being present, and is nicely managed under the instruction of Mrs. Wm. Lee.

The young folks had a gathering at G. L. Sutherland's Sunday night, with singing and all kinds of musical instruments. All had a time long to be remembered and highly appreciated. A fine lunch was served.

Ed and Joe Kalina made a short run to Scio Monday, as it was too wet to plow. Mrs. Rebecca Morris accompanied them to her home in Scio.

Theodore Gaines went up to Mill City Tuesday to visit his half brother, Henry Beard, whom he had not seen for about 25 years. He also visited Billy Jenkins, formerly of Turnridge, near Lacombe.

We have a young sneak thief among us, who stole a set of harness lines and two bridles from Joe Kalina. Not having a full outfit, he called at S. W. Gaines' barn last Tuesday night, taking his best collar which he was using. We have him spotted, but owing to his parents we have not had him arrested. We will give him till the first of April to return them. Then we will see how he likes looking through iron bars.

Dance Ordinance Proposed

The city council met in regular session at the city hall last Thursday night and transacted quite a little business. After the regular routine of business had been gone over, renewal of ordinances came up for discussion, which were read and referred to the ordinance committee for correction: An ordinance regulating dance halls and requiring those giving dances to take out a license and making such persons responsible for conduct inside the hall; an ordinance regarding public nuisances and dilapidated buildings and requiring the owners to make them safe or tear them down; the sidewalk ordinance was ordered revised and made stronger, as the one now in force had no claws.

The usual number of bills were read and ordered paid.

Considerable discussion was had on the duties of the electrician, the proposed extension of electric trunk line and the water and light receipts.

At 9 o'clock the council adjourned to meet at call of the mayor.

HOW TO SAVE MONEY WHEN SHOPPING

By MRS. HARLAND H. ALLEN

(Copyright 1922, Harland H. Allen.)

BUYING MATERIALS BY THE YARD

They tell us that we women shoppers spend a billion dollars every year for textile materials alone. Yet many women know next to nothing about selecting materials, and that is why there are too many poor and adulterated goods on the shelves. It is the presence of these cheap and inferior materials which makes it so hard for the woman who wants to get value received for her money.

When buying materials by the yard, there are several points that the careful purchaser ought to keep in mind. Before setting out on your shopping trip you should know exactly the amount of material needed. What is more important still, is to know exactly the amount of money you can afford to spend. Then you should decide which kinds of materials are best suited to your purpose, and within the price you wish to pay. Next you must know the points that show quality in the various materials, so that whatever you finally select will be worth the money it costs.

Remember always that good materials of their kind should be selected, in preference to a poorer quality of some more expensive goods. For example, it will pay you in the long run to choose a good quality of serge, if you have only so much money to spend, rather than a cheaper quality of broadcloth which may be selling at the same price as the serge.

Always test the strength of any material you buy. Do this by unraveling some threads and breaking them. If they pull apart too easily it does not speak well for the endurance of the cloth. By holding the cloth up to the light, or by grasping a piece of it with the fingers about an inch apart and pulling steadily, unexpected weakness can often be showed up.

Firmly woven materials usually hold their shape better and wear longer than loosely woven goods. If the yarn is poor and the weaving irregular and sleazy, or long threads float on the surface, do not expect the fabric to stand up under much hard strain. Push the nail against the cloth to see if the weave is strong. Cloth will be more enduring if the yarn both ways is about even strength.
