HOW TO SAVE MONEY WHEN SHOPPING

By MRS. HARLAND H. ALLEN

(© 1922, Harland H. Allen.)

SOMETHING FOR NOTHING

It is just as hard as it ever was to get something for nothing. And the woman who hopes to buy 30-cent goods for "all-wool" is getting more cotton than wool, and storing up trouble for herself, for after a few weeks the "bargain" of which she was so proud is sure to be hopelessly shabby, and she finds herself with literally nothing for her pains.

It is a false idea of economy that makes a shopper buy cheap all-wool serges and flannels so thin and sleazy that they pull apart with the sewing. It is much better to get part-wool dress goods that are firm and of a durable color, where the question of the initial expense is a problem. While it does always pay in the end to buy the best all-wool serges and flannels—remember you do not get these things for nothing.

Silk at the price of cotton is a pitfall that trips up many an unwary shopper. Good silks are expensive, and you need not be surprised that the "silk limousine gown" that cost you only ten dollars last summer scarcely lasted the summer through. One such experience teaches us that it is better to buy a good quality of an unpretentious fabric, than a poor quality of an expensive one. For instance, mercerized foulards and mulls are much better buys than cheap silks that are weighted with tin salts and other things that cause them to wear out quickly, and have very little silk in them anyway. And after the third or fourth wearing, your freshly-laundered mull of cotton foulard will look much more attractive than a frayed, and wilted silk.

On the same principle, any reasoning shopper ought to reflect when she sees "linen suiting" offered at ten and fifteen cents a yard, that it is impossible to sell real linen at that price. Your goods will be only cotton, starched and glossed to look like linen. Or if they contain any linen at all, it is woven from short threads, and has no strength. The "dressing" of starch will all come out in the first wash, and leave you a cloth that is thin and weak.

Many shoppers who think they cannot afford to pay the first cost of good materials are always dressed in shoddy, badly-fitting clothes, and in the long run spend more on dress than the woman who knows how to invest in dependable grades.

C. C. Hall, chief forest ranger, was in Scio Monday and gave an address to the pupils of the Scio schools.
