## SANTIAM FARM NEWS

July 17

Nothing exciting the past week except that every one is rushing with their hay as there is no help to be had for love or money. Most of the hay got soaked during the last rain making it necessary to scatter and reshock it, putting everyone behind with their work besides damaging the hay.

Mr. Clarence Lovejoy of Dallas drove over Saturday after his wife, who spent the week with her mother, Mrs. S. W. Gaines.

Mrs. Clara Horsburgh has suffered a broken vein in her leg causing her to lose a gallon of blood in a few minutes. Dr. Browne was called and soon stopped the flow.

## Law Does Not Apply To Linn

After considering whether or not Linn county union high schools should be continued under the present high school tuition fund law or brought under the state law allowing \$60 each for 20 pupils, \$50 each for the next 30 pupils and \$30 each for all above 50, the district board has decided to allow the schools to remain in their present status.

This decision was reached after Mrs. Edna Geer, county school superintendent, had decided that because nearly all of the districts have many children in the school from outside of the union high school districts the present law brings in more revenue to the schools than would the new law. The one district excepted in this county is the Tangent district.

Lane county, as far as Mrs. Geer knows is the only county that has adopted the new law. The benefit to Lane county accrues, Mrs. Geer says, because in that county there are 12 or 14 union high schools which are educating no outside children. The new law will reduce the income of those districts having large numbers of outside students, Mrs. Geer says because their tuition would be lowered.—Albany Democrat.

## Slow Down At Crossings

If every automobile were slowed down to 15 miles an hour before crossing a railroad track, automobile accidents at railroad crossings would almost wholly disappear, for a machine can usually be stopped in its length when going at 15 miles. Such slowing down would lose a few seconds on the trip, but it would save the lives of a thousand people every year in the United States.

In the week ending June 2 there were 55 people killed in the United States while riding in autos over railroad crossings. If this record is equalled for the entire summer there will be 700 deaths in this way between June 1 and September 1.

Since 1917 automobile accidents at railroad crossings have increased more than 50 percent. In that year there were 2076 such accidents resulting in 1083 deaths and more than 3000 injuries. In 1921 there were 2940 such accidents which killed 1259 people and injured 3976 more. The list for 1922 has not yet been completed, but it will exceed that of 1921.—Portland Telegram.

The elevator men throughout the state have met and adopted storage rates in accordance with the state marketing law, passed at the last session of the legislature. These rates are: Sacked or bulk wheat up to Jan. 1, 1924, \$1.25 per ton, and 15c per ton thereafter; bulk or sacked oats \$1.50 per ton, and 15c thereafter; cleaning charges extra.

## A Straight Tip

There is a real saving in the use of Plymouth Twine, to say nothing of the satisfaction, over the cheap kinds which do not have the necessary strength and uniformity, and which are invariably under measurement.

A recent comparison of a ball of

## PLYMOUTH TWINE

with that of another make which was made in the field last season showed that it would take 135 pounds of the cheap twine to bind the same amount of grain that 100 pounds of Plymouth Twine would tie. The cheap twine was not only greatly under measurement, but was decidedly inferior in quality and strength.

Better take no chances; place your order for Plymouth Twine with us and get full length and strength, which is guaranteed by the Plymouth Tag on each and every ball.
