## Prospects Looking Better

R. E. Perry has gone back to the Crown mine, in which so many Scio and Lebanon people are interested, to proceed with the work in bringing out ore. Mr. Perry says they cut a five-foot ledge which looks mighty good, but that he does not yet know what it will assay. If looks count for anything, and that is all one can go by, the Crown mine ought to be a mint, and we hope it will so prove.

## Klavern Receives Charter

The Scio Klavern of the Ku Klux Klan received its charter last Thursday night, it having been brought to this city by Rev. V. K. Allison, who is the State organizer for the state of Oregon. Before a charter can be issued to any Klavern, there must be 50 charter members, and this number, it is said, has been passed here. Delegations were present from Portland, Albany, Lebanon and Silverton, the latter putting on the work of installing. It is said a large number from here who have become members in other Klaverns, will soon transfer their membership here and the local will soon number about 100 members.

## Will Organize Club

About thirty of the baseball fans of this community met at the city hall Friday night to discuss the question of having a baseball team in Scio the coming season. After showing how well the team played last year and with the same material as last year, those present decided it was the right thing to reorganize. E. G. Arnold, who managed the team during 1923, was elected president of the club; Fred Daly, secretary; Fred L. Jones, treasurer. It is probable a dance will be given in the near future to raise money to begin the building of the baseball grounds and to buy the needed paraphernalia.

## Pruning Time Now

The pruning work about the farm is being done now by the careful farmer of the north west, before the rush of spring work comes.

The fruit trees are being pruned to remove all dead branches and limbs that are across the center of the tree. The limbs will be thinned so that sunlight will reach all parts of the tree. Many diseased conditions of the tree can be prevented by the presence of sunlight in the tree. It also gives the fruit a better color.

Old orchards are benefited by a severe pruning. The dead limbs are removed and the live ones thinned to give room for the development of new growth. A severe pruning will stimulate the tree and give it a new tone. The moss on old trees can be removed by spraying with lime-sulphur winter strength just before the buds begin to swell. The lime-sulphur will also control the twig miner.

The berries will be put on the wires as soon as all danger of freeze-

ing is over. The winter injury was severe this season and should be determined before the vines are wired. Grapes bleed if pruned when the sap is flowing. This necessitates pruning them before the sap flow starts. Grapes are usually pruned severely.

# Next Spring—

With over 200,000 orders for Ford Cars and Trucks already placed for delivery during the next few months, we are facing a record-breaking spring demand.

Each successive month this winter has witnessed a growth in sales far surpassing that of any previous winter season. This increase will be even greater during the spring months, always the heaviest buying period.

These facts suggest that you place your order early to avoid disappointment in delivery at the time desired.

**Ford Motor Company**  
Detroit, Michigan

It is not necessary to pay cash for your car in order to have your name placed on the preferred delivery list. You can make a small payment down, or you can buy, if you wish, under the convenient terms of the Ford Weekly Purchase Plan.
