

**SHELBY NEWS**

July 15

Mrs. Dale Poindexter and daughter, Marion, have just returned from a visit in California.

A. Shanks has gone to work in the logging camp at Leneve, Ore. Mrs. Shanks expects to join him in the near future.

Mrs. Fred Bowman is at Pacific City for an outing.

Mrs. Mae Shanks, Mrs. Mabel Bowman and daughter, Deloros, Mrs. Venus Poindexter and daughter Marion left Monday for Detroit for a few weeks' outing.

Ben Gooch and family have re-

turned to Dunsmuir, Calif., after spending their vacation with Mr. Gooch's sister, Mrs. C. M. Tindall.

Vera Carson is visiting with her sisters in Albany, Mrs. Spencer Long and Miss Emaline Carson.

W. H. McLain and T. M. Russell made a business trip to Albany last Thursday afternoon.

Earl Gooch and wife are in Portland, where he is attending the barber school, finishing his course in barbering.

Clinton George made a business trip to Newport the latter part of last week.

Ben Denney of Albany spent the week-end at the home of Mrs. Mary Cannon.

Edwin Jones and wife were shopping in Albany Saturday.

T. M. Russell and W. H. McLain and wife called on W. E. Evans and wife at Lebanon Monday evening.

Conard Westenhous and wife spent Sunday with Earl Smith and wife.

Eugene Miller and wife are spending a few weeks at Newport, hoping to regain their former good health.

Mr. Driscoll of Roseburg is spending a few days visiting his sister-in-law, Mrs. Mary Cannon.

While stretching barbed wire Monday morning on the line fence between W. J. Miller and T. M. Russell, the wire stretcher slipped and caught Elmer McClaren's right hand and almost crushed it. He went to Dr. Prill, who dressed his hand, and it was not paining him much Monday evening.

M. B. Miller, Margaret Brown, Mrs. Lafe Osborn and Grandma Grimes visited the latter's son, William, and family Sunday. Mr. Grimes' eldest son, Willard, is quite ill but was resting easy that day.

Lee George and family are spending a few days on the beach near Newport. This is their first trip to the ocean.

T. M. Russell and Marion Brown went to Albany Friday afternoon for repairs for Mr. Brown's binder.

Mrs. John Bentz and children spent Monday with Mrs. O. G. Wyman.

John Bentz made a business trip to Portland Monday.

Clinton Brown is working for Joe Quinn during the summer.

A large crowd attended the burial of Mrs. Queener of Salem at the Miller cemetery Saturday at 2 p. m. Mrs. Queener was a Linn county pioneer, her old home being near Stayton.

of hand separators have been tested," Mr. Iverson says. "In Worth county, five separators in one cow-testing association were found to be losing excessive amount of butterfat. We feel certain that there are many separators in every community that are losing butterfat for their owners. An annual loss of several dollars can easily result if the machine is not regulated or run properly.

Skim milk testing can be done by the Babcock method with a special double-necked test bottle. In place of the 17.5 cubic centimeters of acid required for whole milk, 20 are used for skim milk. Otherwise, practically the same procedure is followed as in testing whole milk. The test can be made by the farmers themselves, or, if this is not convenient, by the local creamery.

**Making Better Butter**

Whether the product is made at home or at the creamery, matters little, cream should be clean flavored to make good butter. To obtain practically all of the cream from the milk and have it in the best shape for butter making requires the use of a good cream separator. Further, the thorough cleaning and sterilizing of all dairy utensils is essential to the production of a product having a good flavor.

**Aid Dairy Community**

There are two means by which the dairy cow population of a community may be increased, by breeding through the use of pure bred bulls from proved ancestry, and by importing from other sections mature cows ready for service at the pail. In the latter case of purchase of cows, we have two alternatives—importing animals from other sections, and finding the animals within the state.

**Creamery Activities**

Buying activities of 308 creameries indicate that 29 per cent of the organization buy feed, 25 per cent buy fuel, and 22 per cent buy fuel. The complete list of commodities purchased by the various organizations include building material, fencing, hardware, implements, general merchandise, and miscellaneous products in addition to the commodities specifically enumerated.

**Cream Needs Good Care**

As hot weather approaches the cream must receive better care on the average farm. As soon after separating as possible, cool the cream by setting the can in cold water. Never mix the fresh cream with the cream from previous separation until cooled as low as possible. Do not keep cream too long at the farm. Poor stale cream will not make good butter. If the creamery cannot make good butter the average price of cream will be lower than if good butter can be made.

**NEEDED REFORM**

Sir Harry Brittain, M. P., thinks that something might be done to improve railway sandwiches. If they could only give them a coat of varnish after they leave the sandwich funder they would be much easier to dust each week.—London Punch.

Passenger—I say, driver, what is the average life of a locomotive?

Driver—Oh, about thirty years, sir.

"I should think such a tough-looking thing would last longer than that."

"Well, perhaps it would, sir, if it didn't smoke so much."—Southern California Wampus.

**SANTIAM FARM NEWS**

July 15

Mrs. Etta Sutherland and daughter Bonnie called in Friday for a short visit.

Curtis C. Griffin and wife, after receiving a telegraph message from his old firm in Los Angeles to return at once as his old job was still waiting for him, so they pulled out Tuesday for Portland to take the steamer direct for their destination, intending to return the 1st of April, 1925, to locate here.

Ed Kalina attended the community sale in Scio Saturday and treated himself to a wagon on sale, as his old one had passed its usefulness.

Harvest is now in full blast, and everyone is wading to it like unto a hungry dog after a bone.

Ed Kalina, wife and son went to Rodgers mountain Sunday to visit Mrs. Kalina's sister, Mrs. Wm. Beran.

Curtis Griffin and wife went to Dallas Wednesday to visit his sister, Mrs. Clarence Lovejoy, before returning to Los Angeles.

Geo. Griffin went to Beuna Vista last week for a visit with his cousin, Delbert Yergan, and get a registered Jersey calf two weeks old, as he is going into the Jersey stock, as the Durhams do not pay.

The road boss has several teams out on the road hauling gravel near the Hoffman bridge, paying 60c per yard.

Our rain Monday was a failure. Still we live in hopes it will come in time to make potatoes, as they will be a failure without and a poor crop at best; some vines dead now.

**PIE EATER**

YES! we have "500" Score cards 2c each. At the Tribune Office.

**Reward:** During the month of July, anyone who has been chronically ill for 6 months will be given a complete X-Ray of the spine FREE, if the spine is found in perfect condition.

**Acute Sickness**

Chiropractic gives nature a chance to correct acute sickness in the shortest time possible. Acute sickness is always accompanied with temporary subluxations of the spine—either causative or from reflex

- Child's black tennis oxfords.....79c
- Boys' black tennis oxfords.....89c and 98c
- Heavy canvas bed ticks.....49c

**BETTER COWS QUITE ESSENTIAL IN DAIRY**

Dr. David Friday, formerly president of the Michigan State Agricultural college, recently pointed out a fact that is well known, but, like lots of well-known facts, seldom appreciated. The scrub dairymen gets 120,000 pounds of milk a year from 40 cows averaging 3,000 pounds each. He would be better off with 30 averaging 4,000 pounds each because he would get the same milk check with one-fourth less work and overhead. The better dairymen uses 15 cows producing 8,000 pounds each to get his milk check, while the really successful dairymen gets 120,000 pounds of milk from 12 cows averaging 10,000 pounds a year.

While the successful dairymen gets his 120,000 pounds from 12 cows instead of 40, thus cutting his overhead, labor and feed cost by nearly three-fourths, he has an added advantage which has recently been proved by the United States dairy division. The dairy division finds that cows producing 100 pounds of fat in a year made an average return above feed cost of \$10 each. Cows producing 400 pounds of fat in a year made an average return above feed cost of \$100. Thus it seems that it only took four times as great production to make the cow ten times more profitable.

With these figures in mind it is very easy to see why there are failures in the dairy business and why, also, there are such marked successes.

The way to get and keep a profitable herd is to everlastingly weed out the culs, employ better methods by keeping up to date on the new feeds and methods that make greater profit and, lastly but by no means least, to use good, straight pure-bred dairy bulls with production records back of them.—H. R. Lascelles, Fieldman for the Colorado Dairy Commissioner.

**Test Cream Separators, Is Advice of Expert**

Cream separators that have not been tested for some time may be cheating their owners out of a considerable sum every week. That can be avoided, for skim milk testing will reveal the honesty of the most deceitful separator, according to G. A. Iverson of the Iowa state college. "Surprising results have been obtained wherever fairly large numbers

**Announcing Our Special Sale**

which includes certain lots of merchandise that is greatly reduced during our Special Sale.
