THINGS UNUSUAL

CONEY ISLAND

Every normal person desires and deserves the chance to play occasionally and every large city has its nearby play spot. Consequently, it came to pass that our most noted artificial—as differentiated from our natural national parks—playground was located adjacent our largest aggregation of huddled-up humanity, New York City.

Coney Island has been referred to as "America's Mad Playground," and the stranger who visits it on a hot summer night readily and naturally gains the impression that the swarming hordes of people are mad for play, also that almost everybody is going to or coming from Coney Island.

Perched on an outlying point of Long Island—about an hour's ride from "the big city," with a sloping, sandy beach upon which breaks and rolls the Atlantic ocean's surf, Coney Island is one of the most popular bathing places in the world. The creek which formerly separated Coney from Long Island having been partially filled in, it is no longer a separate island, but the name, known world wide, was not changed.

Belonging originally to the Canarsie Indians who called it Narrioch, Coney Island came into possession of white people as far back as 1643. The present Coney dates from the erection of a pavilion in 1844. Since that time it has grown steadily and marvelously as an amusement center and is now the widest-known amusement resort we have.

A spectacular cluster of domes, spires and odd-looking buildings, cafes, dance floors, shooting galleries, roller coasters, movies, merry-go-rounds, freak stunts, peanut, popcorn, ice cream and hot dog stands, one can see here every form of thriller yet invented and many that can be seen nowhere else, hear noises and experience confusions before unknown. As one observer expressed it: "It is movement. Everything shakes or glides or shimmies or jumps or tumbles or turns—nothing ever stands still."

Most folks go there to "cut loose" and "have a good time." If their facial expressions are a safe guide for the formulation of an opinion, they certainly get what they go after.
