Building Prune Dryer

Richard Struckmeier is erecting a large prune dryer on his farm near Thomas, costing approximately \$10,000. It is strictly modern in all its appointments and will be electrically driven throughout, the power being furnished by the Scio Electric plant. Mr. Struckmeier expects to operate it each 24 hours during the month of September to care for his large crop of prunes, which will be ready for picking about the first.

Railroading Pays Better

C. D. Osborne was in from Shelburn Monday. He says he found he couldn't make a living on his farm and went on the railroad. He took time off to help run the thresher, and this work is about finished, or will be as soon as a few small fields of spring grain are ready for the thresher. It is a sad day for the nation when "the hand that feeds the world" must find some other way of making a living.
