Utmost Driving Confidence

Driving a Ford is so simple, and requires so little effort that you are free to devote all your attention to the problems of traffic. There is a sense of confidence in driving a Ford, impossible with any more complicated motor car.

"The fact that the State Lime Board can be self-sustaining when selling lime at the low cost of \$4.09 per ton f.o.b. Gold Hill is not a well known fact, but it is gratifying to most farmers to know that the price of \$4.00 per ton paid for lime is the full cost of production and that there are no state appropriations required by the board to pay production costs. My knowledge of the lime situation throughout the United States leads me to believe that Oregon produces the cheapest agricultural lime on the market."

I asked for a kiss and a cup of tea.
Said she, The tea's not ready yet.
Her meaning is a mystery.
I asked for a kiss and a cup of tea.
Why did she coyly smile at me
With glance I never can forget?
I asked for a kiss and a cup of tea.
Said she, the tea's not ready yet.
Penn State Froth.

DAIRY FACTS

GRADED CREAM WILL BRING MORE MONEY

By using a little more care in the handling of cream and insisting on the maintenance of cream grades, producers of butterfat in South Dakota could increase their receipts by 5 cents per pound, it has been estimated by the department of farm economics at South Dakota State college.

If the farmers of the state, who marketed 81,761,070 pounds of butterfat in the form of cream in 1922, had received a premium of 5 cents per pound for better quality, it would have amounted to a little more than one and one-half million dollars. This, even after deducting whatever small additional expenses might have been incurred through added labor and equipment, leaves a huge sum that butterfat producers of the state are overlooking. This could be saved, says this department. If those who

are now putting out a quality product would insist on what is justly due them in the form of standardized grades of butterfat.

There is not a town in South Dakota that has not several cream buyers who compete with others for the farmer's trade; yet all of them pay a flat rate for all grades of cream. This is not entirely the fault of the buyers. One farmer alone, bringing in high-grade cream, does not have sufficient volume to establish a market for his product, for cream buyers cannot afford to pay sweet cream prices and then find it necessary to hold the sweet cream until it sours, with the idea of getting enough to fill out their shipment. If cream grades are to be maintained, then there must be enough high-class producers to insist upon it. The producers of low quality cream certainly will not ask that cream be graded, for, under the present system, they receive a higher price for their product than they would if their own product was graded down to its proper classification.

Milk Fever Is Disease of Many Well-Fed Cows

Milk fever is a disease of the well-fed and pampered cow and is most common where cattle are stabled warmly and given little exercise. When rations rich in protein are fed in the period immediately preceding calving time there seems to be a tendency toward this trouble, but it is just as likely to occur when the cow is on grass in the spring.

Do not allow the cow to lie upon her side but prop her up on her chest by means of sacks filled with straw. Tap if acutely bloated. Milk and wash teats with a 2 per cent solution of a coal tar disinfectant, and inflate each quarter of the udder in turn. This may be done by means of a bicycle pump, rubber bulb syringe, or apparatus for the purpose. Do not put tape or rubber bands about teats but dent in repeatedly to cause retention of air. Allow water but no feed for eight to twelve hours.

In order to prevent this disease stop all rich feeds five or six weeks before calving and make the cow take plenty of exercise each day. Keep bowels free and give epsom salts at calving time if she is at all constipated.

August 25

Georgia Gibbons of Jefferson, who spent several days of last week with her cousins, the Miller children, re-

turned home Sunday.

Philo Gragg of Bellefontaine drove over Saturday in his Oakland and Mr. and Mrs. W. H. McLain returned home with him that evening to attend the Starr-Buckingham-Gragg reunion at the Bellefontaine park Sunday, where more than 100 sat down to a well-loaded table of good things to eat. In the afternoon a good program was rendered by members of the different families. Some had not met for 50 years. There were members of the families from California, Washington, Montana and Idaho, who came to enjoy the meeting. After the program, ice cream and cake was served, and all departed to meet again next year.

W. H. McLain returned home on Monday from Bellefontaine. Mrs. McLain remained to visit during the week with relatives and friends in the old neighborhood.

Farmers are busy disking since the rain, getting the ground ready for next year's crop.

Carl Smith and wife attended the Hannah sale Saturday.

Lee George and wife helped her mother make a barrel of kroust last Wednesday.

Mrs. Ben Watkins and family are enjoying the hopping these fine days.

Charles McClain and family visited his aged mother at Beuna Vista Sunday. Hiram Wolfe took them over in his car.

John Bentz and family spent Sunday with W. H. McLain's.

Lyons Bros. got a veal of H. O. Shilling a few days ago.

Ernest McCrea and family spent Sunday afternoon with her father, H. O. Shilling.

Miss Catherine Reno, a cousin of Mrs. J. W. Miller, is spending her vacation with relatives at Shelburn. She is in the employ of the S. P. Ry at San Francisco.

Mrs. Fred Roadarmel has an attack of summer flu this week.

Mrs. Galloway has for house guests this week her eldest daughter and youngest son, Claud.

J. L. Oglesbee was in Shelburn over the week-end.

Mrs. Mary Cannon was shopping in Shelburn Monday.

William Manis and wife are spending a few days at the ocean.

Harvey McLain and Mr. Neibiger of Lyons started for Iowa on the 15th inst. Harvey will teach at Burlington, Iowa, and Mr. Neibiger has a scholarship in history at Iowa State University at Iowa City. They are both Williamette University graduates, Harvey of 1922 and Neibiger of 1924.

Everyone enjoyed the gentle rains last week. Farmers improved the opportunity to burn roots and rubbish scattered over their fields.

Walter and Harvey Wyman made a business trip to Scio Monday.

W. H. McLain made a business trip to Scio and Albany Monday.

Carl Smith was sawing 16 inch wood for Charles McClain Tuesday.

News From Lyons.

August 26

A Mr. and Mrs. Taylor and family are new residents in Lyons, having rented the Donison cottage.

Dr. Edwards, district deputy for the M. E. church, delivered a very interesting message here Sunday afternoon. A good audience was in attendance.

Everybody is pretty busy around our community now, since blackberries are ripening. The crop in general is nothing extra, due to the long dry summer.

The J. H. Johnston family were Salem visitors Wednesday, taking in Barnes' circus while in the city.

Miss Georgia Whitney went to the circus with the Wm. Downing family.

Newt. Allen and family returned Sunday from a 10-days' trip through British Columbia and other places on their route.

Mrs. Alex. Bodeker has carried the mail on route 1 during the absence of our rural carrier, Earl Allen, who was away on his vacation.

THE OREGON STATE AGRICULTURAL COLLEGE

OFFERS

"A Liberal and Practical Education"

In the several pursuits and professions in life Through the following schools and departments—

The School of Basic Arts and Sciences

(Art, English, public speaking, modern languages, history, the sciences) Providing the foundation training upon which technical specialization is built.

The Ten Technical Schools

Agriculture —thirteen departments (B.S., M.S. degrees)	Commerce —four departments (B.S. degree)
Engineering —seven departments (B.S., M.S. degrees)	Forestry —two departments (B.S., M.S. degrees)
Home Economics —five departments (B.S., M.S. degrees)	Mines —three departments (B.S. degree)
Pharmacy —(B.S., Ph.C. degrees)	Vocational Education —5 departments (B.S., M.S. degrees)
Chemical Engineering —(B.S. degree)	Military Science and Tactics —5 units (B.S. degree)

The training includes physical educational, industrial journalism, social sciences and music. Entrance and graduation requirements are standard. Through the usual rating organizations the College is accredited to the best graduate schools in America. Student life is exceptionally well organized to develop ideals of leadership and service to the commonwealth.

Admission of Freshmen September 23, 1924
