Recorded Damage Due to State Income Tax

8 Timber purchases cancelled or suspended	\$18,000,000
11 Construction of lumber mills, towns, logging camps and logging railways, abandoned or suspended	7,875,000
32 Other industrial investments cancelled or suspended	4,578,000
One year's operating payroll on foregoing items	5,680,000
8 Disincorporations, \$4,606,000 capital. Damage listed 1-10 only	460,000
10 Actual removals from the state, including loss of only one year's pay roll	2,440,250
22 Threatened removals, including loss of only one year's pay roll	2,218,500
31 Cases as to which definite amounts are not available, but which would amount to many millions; damage listed as	0
34 Cases still under investigation; would amount to many millions; damage listed as	0
24 Cases in which reported removal or investment elsewhere was stated to have been caused by the income tax, but which cannot be verified in writing; damage listed as	0
Total recorded damage	\$41,252,350

We have examined the signed statements and exhibits upon which the foregoing tabulation is based and find that the total of \$41,252,350 is a conservative estimate of damage properly attributable to the state income tax as a determining factor in influencing decision against Oregon investment in the cases listed. We also find that many additional amounts could have been included justifiably in the total, so that, making every allowance for possible overstatements in individual items listed, the actual loss of investment attributable to the state income tax is materially in excess of \$40,000,000.
