### Hall's Catarrh Medicine

Those who are in a "run-down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions.

HALL'S CATARRH MEDICINE is a Combined Treatment, both local and internal, and has been successful in the treatment of Catarrh for over forty years. Sold by all druggists.

F. J. Cheney & Co., Toledo, Ohio.

### SUMMONS

IN THE CIRCUIT COURT OF THE STATE OF OREGON IN AND FOR THE COUNTY OF LINN

Department No. Two.

Beulah E. Deane,  
Plaintiff,  
vs.  
G. S. Deane,  
Defendant.

To G. S. Deane, the above named Defendant:

IN THE NAME OF THE STATE OF OREGON: You are hereby required to appear and answer the Complaint of the above named Plaintiff in the above entitled Court now on file with the Clerk of said Court, on or before the 22d day of January, 1925, that being the last day of the time prescribed in the order for the publication of this summons, and if you fail so to appear and answer the plaintiff will apply to said Court for the relief demanded in said Complaint, to-wit:

For a decree of said Court dissolving the marriage contract now existing between plaintiff and defendant and awarding plaintiff the care, custody and control of Harold Taylor Deane and Ellen Annette Deane, minor children of plaintiff and defendant, and that plaintiff have judgment for the costs and disbursements of this suit and that a decree will be taken against you for such other and further relief as to the Court may seem proper in the premises.

This summons is published in the Scio Tribune by order of the Honorable L. H. McMahan, Judge of the above entitled Court, made and entered on the 8th day of December, 1924, where in this summons is ordered and directed to be published once a week for six consecutive and successive weeks, being seven weekly publications thereof.

The date of the first publication of this summons is the 11th day of December, 1924, and the date of the last publication thereof is the 22d day of January, 1925.

HILL & MARKS,  
Attorneys for Plaintiff.  
Postoffice Address of  
Attorneys for Plaintiff,  
Albany, Oregon.

### Notice to Creditors

Notice is hereby given that the undersigned has been duly appointed by the County Court of Linn County, Oregon, as administrator of the estate of Leona F. Goin, deceased, and has qualified as such.

Any and all persons having claims against the estate of said deceased are hereby notified to present the same to the undersigned at the office of A. K. McMahan, 122 West First street, Albany, Linn County, Oregon, duly verified with proper vouchers as by law required within six months from the date of the first publication of this notice.

Dated and first published this 11th day of December, 1924.

STERLING H. GOIN,  
Administrator of the Estate of  
Leona F. Goin, deceased.  
A. K. McMAHAN, Atty. for Adm.  
122 West 1st str., Albany, Oregon.  
Last publication Jan. 8, 1925.

### Referee's Notice

Notice is hereby given that the undersigned was by an order duly made and entered of record on the 5th day of January, 1925, in that certain suit in the Circuit Court of the State of Oregon, for the County of Linn, in Department No. 2, wherein Ralph Hollis, a minor, by L. M. Curl, his guardian, was plaintiff, and Nell Hollis-Blyden and Myrtle Hollis, a minor, were defendants, duly appointed referee to make sale of the following described real property, to-wit:

Lot No. Three (3) and the East one-half (1/2) of Lot No. Two (2), in Block No. Two (2), in Wheeler's Addition to the City of Scio, Linn County, State of Oregon.

Now, therefore, in pursuance of said order and of the statutes in such cases made and provided, I will, on Saturday, the 7th day of February, 1925, at the hour of one o'clock p. m. of said day, at the front door of the county court house in the City of Albany, Linn County, State of Oregon, sell at public auction, for cash in hand, to the highest bidder, all the right, title, interest and claim of the several parties, plaintiffs and defendants in said suit, in and to the real property hereinabove described.

Dated this 6th day of January, 1925.  
A. K. McMAHAN, Referee.  
Date of first publication, Jan. 8, 1925.  
Date of last publication, Feb. 5, 1925.

### Overfeeding Calves Is One Cause of Mortality

Calves from the modern, highly domesticated dairy cow get too much nourishment in the first two weeks of their lives. That, as much as any one factor, explains why mortality rates are higher for calves, comparatively, than for other classes of stock.

Veterinarians at both the Ohio State university and the New York State College of Agriculture unite in making this statement. They continue:

"We have sought by every means to increase the quality and quantity of milk in our dairy cows, but have given little thought to the production of healthy offspring.

"Sickness and mortality are more frequent with calves than with lambs, goats and swine because of carelessness in feeding and breeding.

"Improvement in the digestive ability of the calf has not kept pace with the increasing richness of the milk. As a result a calf, if allowed free access to the cow for the first two weeks, will often overeat.

"The best way to control this is to reduce the amount of milk given the calf at first. Increase the milk ration gradually as the calf grows older, and add a little alkali, such as sodium bicarbonate, to neutralize the fatty acids formed by the excess of fat in the milk."

### Drinking Cups Found to Be Excellent for Cows

Drinking cups for cows pay for themselves in three to four months, according to sixteen members of the Pine county (Minnesota) testing association. Harold Roth, the tester for this association, has the figures to show that five cows which freshened about the same time made an increase in production amounting to \$1.68 a cow per month after the cups were installed.

During the cold weather of last January cows held up their production where cups were used. Others showed a decrease and never came back. Cold water taken into a cow's stomach demands energy and heat. Energy and heat come from feed. Furthermore, the cow that is obliged to go outdoors to drink, perhaps in a bitter wind, will not take as much water as her body requires to produce milk in large quantities.

### To Prevent Ropy Milk

Ropy milk is due to bacteria gaining entrance to the milk. The bacteria which cause the trouble are usually found in stale water. Such water used in washing or rinsing the milk utensils may infect them and, through them, the milk. Cows may wade in such water and the udders and flanks may be coated with mud or otherwise carry the organisms. It is easily seen now that they can drop into the pail at milking time. The remedy is obvious. Rinse all pails and utensils with clean, fresh water.

### Value of Sorghum Hay

According to analysis, ordinary sorghum cane hay should be worth about the same or slightly less than timothy hay for dairy cows. Actually, it is really a better roughage for dairy cows than timothy hay. At any rate the cows seem to find it more palatable. Like timothy hay, sorghum fodder is somewhat lacking in protein and, on that account, it is necessary to feed just a little more in the way of bran and oil meal with it than with such roughages as clover or alfalfa.

## DAIRY SIRE SPECIAL MEETS WITH SUCCESS

(Prepared by the United States Department of Agriculture)

Crowds estimated at over 65,000 witnessed the educational program and exhibits of the dairy sire special train which recently visited 31 towns in Nebraska.

One of the novel attractions of the exhibit was a "mystery" cow. Visitors were given an opportunity to guess how much milk the displayed cow had given in one year. A milk scale was awarded to the winner of the guessing contest in each town.

A comparison of the characteristics of a scrub and pure bred bull as explained by one of the demonstrators was another popular feature. Three exhibits showed the progeny of (1) a scrub bull and scrub cows, (2) a pure bred sire and scrub cows, and (3) a pure bred sire and pure bred cows.

Among those who delivered short, instructive talks at the train were editors, business men, agricultural extension workers, a prominent banker, and the agricultural agent of the Chicago, Burlington & Quincy Railway Co., over whose lines the train was run.

Dr. A. L. Faunce, of the bureau of animal industry, represented the department in co-operating with the sponsors of the train in their program at Franklin, Neb. In support of the nationwide "better sires—better stock" campaign he had charge of a booth where the public obtained bulletins, posters, and other educational matter.

A special feature of the program at Franklin, Neb., was the speech of a local farmer. He told his plans for the building up of a herd of high-grade cows with the aid of the pure bred bull which he had received from those in charge of the train in exchange for a scrub bull.

## SHOPPING FOR A SPOOL OF THREAD

Some housewives think they are being economical when they buy cheap sewing cotton, but the time actually lost in using rotten or inferior thread through breaking, and its poor wear, turns what in the beginning may look like a small economy into a real expense.

The best sewing cotton to buy is a soft-finished, round, six-cord thread. By a six-cord thread we mean that two yarns or plys are twisted together, and then three of these are twisted in the opposite direction.

The quality of thread depends upon the length of the cotton fibers used in making it. The best thread is made out of high-grade Sea Island or Egyptian cotton, but low-grade cotton is used in making up the cheaper qualities, and basting threads.

But it is not so much the kind of cotton used, as it is correct spinning, and freedom from knots and slugs, that guarantees the housewife against that worst possible annoyance—kinking of her thread while sewing.

Some women prefer always to buy a waxed thread, because it kinks so little. But it is just as well to know that when the finish of such threads is washed away in the laundry, they are really weaker than the ordinary soft-finished cottons.

You buy the different sizes of thread by number. The higher the number, the finer the thread. Spools of black and white cotton are put up in 21 sizes—from Nos. 8 to 200. Up to 100 the thread is six-cord, but above that, it is usually three-cord.

A shopper is often disappointed to find that she cannot get just the number of thread that she asks for. As a matter of fact, between the Nos. 100 and 200 there are six numbers, but often only three or four different sizes. So if you ask for No. 120 and cannot find it, but can get No. 130, the chances are that the size of the thread will be about the same.

In buying, always notice the number of yards printed on the spool label, as well as the quality of the thread. Remember that a very slight variation in the shape of the spool may make considerable difference in the amount of thread you get for your money.

## FARM NOTES

Moldy corn is always dangerous feed and the flock should not have access to it.

The droppings boards, perches and nests should be treated for mites. The pullets also should be examined for lice.

The Purdue laying ration with corn meal has given excellent general satisfaction. A good grade of flour middlings will give much better results than standard middlings.

The white of eggs is chiefly water combined with protein. The yolk has some protein and much fat. To supply the protein in egg production it is necessary to feed liberal rations of protein the same as is needed in feeding cows for milk.

## WINTER IN SUNSWEPT CALIFORNIA

Enjoy this winter the warmth and the healthful outdoor recreation of California playgrounds.

\$69.58 round trip winter excursion fare to Los Angeles; return limit May 31st via the comfortable convenient trains of the Shasta route.

And you'll like Southern Pacific dining car service—highest quality food deliciously prepared and served at your accustomed meal-time.

Full stopover privileges en route.
