Mr. and Mrs. E. G. Arnold have rented their home at West Scio to Mr. and Mrs. S. Phillipi for one year and are moving to Albany this week where Mr. Arnold is employed in the County Clerk's office. Mr. and Mrs. Phillipi expect to move Saturday. This leaves the Phillipi house unoccupied.

Rev. J. Y. Stewart will be at the Christian Church Sunday morning. The Lord's Supper will be observed. The subject of the sermon will be "This do in remembrance of me." A cordial invitation is given to all Christians to unite with us in this service. Preaching at Mt. Pleasant at 2:00 p. m.

C. V. Dangerfield, who about a year ago purchased the St. John farm of 270 acres 1 1/2 miles south of Providence church, and his son were in town yesterday. He has 70 acres in flax and is advertising for flax pullers. For the past few months Mr. Dangerfield has been unable to work on account of sickness.

Mr. and Mrs. F. W. McAdoo arrived last Thursday by motor from San Francisco to visit his parents, the editor and wife. On Friday of this week the two families are leaving for a week's vacation during which they will take in the Mount Hood loop, go over the Dalles-California highway by Bend to Clear Lake for a few days camping and fishing, and return by way of Eugene.

Health and Home

FOOD FOR CHILDREN WHO TRAVEL

Many times, and especially during the summer months, mothers are forced to take their children on trips with them. During these trips, the parent is forced to contend with that ever-present and serious problem of food for the child.

As in almost every other case, the chief source of worry, during these periods, is the milk supply, its source, its purity and its food value. It is not always convenient to get market milk of dependable quality for, in many sections of the country, adequate facilities for its care are not provided. To meet the needs of mothers in these trying situations, science has provided a form of milk, conveniently carried and easily prepared. The cans are in two sizes, the one containing six ounces and the other sixteen.

Evaporated milk is just pure cow's milk with more than half of the water removed. None of its food value is lessened; in fact its digestibility is improved. It is easily mixed with water and is, undoubtedly, the most practical form of milk for use as a food for children. Some of the country's leading pediatricians recommend its use, employing the following formula:

From Sixth Week to Third Month.	
Milk, evaporated	4 ounces
Lime water	2 ounces
Milk sugar	2 ounces
Boiled water	28 ounces
Seven feedings in twenty-four hours: 4 to 5 ounces at three-hour intervals during the day and four-hour intervals at night.	
From Third Month to Fifth Month.	
Milk, evaporated	7 1/2 ounces
Lime water	2 ounces
Milk sugar	2 ounces
Boiled water	29 1/2 ounces
Six feedings in twenty-four hours: 5 to 6 ounces at three-hour intervals during the day and a feeding at 10 p. m.	
From Fifth to Seventh Month.	
Milk, evaporated	10 ounces
Lime water	2 ounces
Milk sugar	2 ounces
Boiled water	29 ounces
Five feedings in twenty-four hours: 6 to 7 ounces at four-hour intervals; the last feeding to be given at 10 p. m.	
From Seventh to Ninth Month.	
Milk, evaporated	11 ounces
Lime water	2 ounces
Milk sugar	2 ounces
Boiled water	28 ounces
Four to 5 ounces at four-hour intervals during the day. Last feeding at ten at night.	
From Ninth to Twelfth Month.	
Milk, evaporated	12 ounces
Lime water	2 ounces
Milk sugar	2 ounces
Boiled water	24 ounces
3 to 5 ounces at four-hour intervals during day. Last feeding at ten at night.	

Dr. S. L. Brown, wife and children, of Portland visited Mr. and Mrs. Fred T. Bilyeu Sunday. Mrs. Brown and Mrs. Bilyeu are cousins.
