

Coming to Albany and Salem

Dr. Mellenthin
SPECIALIST

in Internal Medicine for the past twelve years.

Does Not Operate

Will be in ALBANY, Wednesday, Sept. 30, Albany Hotel

and in

SALEM, Thursday, Oct. 1, Marion Hotel

Office Hours: 10 a. m. to 4 p. m.

ONE DAY ONLY

No Charge for Consultation

Dr. Mellenthin is a regular graduate in medicine and surgery and is licensed by the state of Oregon. He does not operate for chronic appendicitis, gall stones, ulcers of stomach, tonsils or adenoids.

He has to his credit wonderful results in diseases of the stomach, liver, bowels, blood, skin, nerves, heart, kidney, bladder, bed wetting, catarrh, weak lungs, rheumatism, sciatica, leg ulcers and rectal ailments.

Below are the names of a few of his many satisfied patients in Oregon:

Rose J. Aplin, Carson, Wash., nerve trouble.

Mrs. Otto Will, Jefferson, varicose ulcer, leg.

M. P. Christianson, Albany, bladder trouble.

Mrs. M. A. Ewan, Coquille, stomach trouble.

Robert Ziglinsky, Scio, stomach and heart trouble.

John Roth, Albany, adenoids and tonsils.

Mrs. M. I. Olsen, Portland, appendicitis.

Remember above date, that consultation on this trip will be free and that his treatment is different.

Married women must be accompanied by their husbands.

Address: 211 Bradbury Bldg., Los Angeles, Calif.

Butterfat and Feed Are Most Important Items

If a cow receives sufficient nutrients to maintain her body weight, the percentage of fat cannot materially change for any considerable period of feeding or by supplying any particular kind of feed. Cows that are greatly underfed may produce milk somewhat lower in fat percentage than normal. All experiments conducted to the present time show that there is no positive evidence of any continued direct effect of a feed in stimulating milk production or increasing the percentage of fat. No kind of feed or care will cause a Holstein to give milk rich in fat like the Jersey. However, a cow may be fattened before freshening and caused to milk off this body fat in the first month of lactation, thereby raising the percent of butterfat in her milk.—From Colorado Experiment Station Bulletin 295, "Make the Dairy Pay."

vigorous later than the average are recommended by the experiment station for improvement in the Oregon potato crop. The leaves should be normal for the variety with no unusual wrinkling or mottling—indications of mosaic. Mosaic leaves have small areas less green and more yellow than the healthy leaf.

Sometimes these leaves appear to have thin spots in them. Plants with uniform, green smooth leaves are the best. They may be staked now and dug later or dug now and put into crates for storage on cooling out. Seed selection pays in the commercial field and is particularly valuable for next year's seed plot.

More cheap forage is one of the big problems confronting the American farmer, including many in Oregon, specialists of the federal department of agriculture report to the experiment station. As pasture this forage gives good yields and costs little after the pasture has been established.

Dairy Notes

Sometimes cow-testing shows that the cow you think is a "poor stick" is being maligned.

See that the pasture fence is in good condition for the summer, making necessary repairs.

Freshen up the premises with white wash—all buildings and fences which have not been painted.

The cost of producing milk may be reduced by using pastures. The feed cost is generally the biggest expense item in producing milk.

See that the salt boxes in the pastures are kept well filled. Milk cows need more salt when on green pasture.

Continue to feed liberal grain rations to the cows in milk especially. Fresh green grass is very watery and contains little food value.

The feed and care given the dairy cow will bear a rich harvest all through her coming lactation period. It will help her to start well and that means she will continue well, if you do your part.

OAC Farm Reminders

Artificial support for branches overloaded with fruit becomes pressing just before the crop colors up, with the starches largely turning to sugar as the fruit matures. Most Oregon trees that have been rightly pruned from the start get along all right without tying or bracing, as it is considered by growers and experiment station specialists a good practice now to allow the upright limbs to bend down with their fruit and thus spread the tree. Masts of 2-inch square pieces, one end on the ground, a few feet higher than the tree with ropes tied to the branches needing support, are used and recommended by the experiment station, though rather expensive in some districts.

In hill selecting next year's potato seed, hills that show green and look

Yes, We are All Going to the Big

LINN COUNTY FAIR

Albany, Ore., September 22-3-4-5

4 BIG DAYS 4

A Gigantic Exhibition of the County's Resources in Agricultural, Livestock, Manufacturing and Household Products, in connection with an Excellent Amusement Program. Exhibits in all departments larger than ever before with almost no exceptions. A continual program of fun and frolic. A good time every minute for every member of the family!

Don't Fail to Attend This Year

You'll be glad you went after you get on the grounds.

Eighteen Big Departments

Horse Department:

Registered Percherons, Registered Clydesdales, Registered Shires, Registered Belgians, Grade Draft Horses, Registered Draft Horses, Saddle Horses, Shetland Ponies.

Cattle Department:

Beef and Dairy Grades, both Registered and Grade Stock. Linn leads in Registered Cattle. It will be a fine exhibit.

Sheep and Goats:

Seventeen Classes: Entries are large this year.

Swine:

Fourteen Classes. Many of the leading herds of this and surrounding counties are entering.

Poultry:

This year will see the biggest and best display of Poultry in the history of the Fair.

Dairy Products:

Lavish entries of Butter and Cheese. Linn county is making a big record as a dairy county.

Bee and Honey:

An interesting exhibit of a fast growing community activity.

Automobiles:

A great array of all the latest models of open and closed cars.

Agricultural Implements.

Manufacturers' Products.

Crops Department:

Grains, Grasses and Seeds. A fine exhibit is assured this year.

Community Exhibits:

This feature, one of the great successes last year, will be fully as good, if not better, this year.

Horticultural:

County raised Fruits in a gorgeous array—one of the features of the past years.

Floral:

Colorful exhibits of Potted Plants and Cut Flowers.

Culinary Department:

Specimens of the Housewives' Art of Linn county.

Ladies' Textile:

One of the great attractions for the women-folk. It will be a big exhibit this year.

Linn County Schools:

This year the school exhibit will be more extensive than heretofore. Mrs. Geer, county superintendent, has aroused great interest over the county.

Boys and Girls Department:

Showing what our young people are doing on the farm—a wonderful attraction this year.
