

The Lebanon Express.

FRIDAY, MAY 28, 1887.

J. H. STINE, EDITOR.

THE TEMPERANCE ALLIANCE.

The Linn County Temperance Alliance which convened at Seio on Tuesday last was composed of earnest and enthusiastic men and women who have at heart the great work of reform. The expression of the delegates which represented a large portion of the county had no uncertain sound. The work is going gloriously on, and the sentiment in favor of prohibition is growing stronger and stronger in the minds of the people. The mastery and unanswerable arguments of such men as Dr. S. G. Irvine who addressed the Alliance on Tuesday evening last—and the influence of good men and women all over this county and state, is having a most agreeable effect, and will undoubtedly result in a grand victory against the rum power in November next. In short, the meeting at Seio was a good one, and the generosity with which the good people of that beautiful old town "in the Forks," threw open their doors to the entertainment of all who attended in the interest of the work which called them there, will make the occasion one to be remembered with pleasure, as well as one fraught with the best results.

GOV. MARTIN IN 1887.

I stated in my message a year ago, that, while the law of 1885 embodied some defects, its general results had been very favorable.

A great reform has certainly been accomplished in Kansas. Intemperance is steadily and surely decreasing. In thousands of homes where want and wretchedness and suffering were once familiar guests, plenty, happiness and contentment now abide. Thousands of wives and children are better clothed and fed than they were when the saloon absorbed all the earnings of husbands and fathers. The marvelous material growth of the state during the past six years, is due accompanied by an equally marvelous moral progress and it can be fairly and truthfully asserted that in no portion of the civilized world can a million and a half of people be found who are more temperate than the people of Kansas.

There's not a town, city or neighborhood in the state in which an illegal traffic in liquors can be carried on for a single week if the local officers discharge their duties plainly enjoined upon them by law with zeal and fidelity. Provide the necessary laws to control local officers to discharge their sworn duties, and remove them when they refuse or neglect to do so, and there will be no need to make any other changes in our statutes. On the other hand, no matter what amendments are made not what provisions are added to the present laws, but they will be ineffective so long as the municipal authorities of cities or counties nullify or disregard them without fear of removal or punishment.

The public sentiment of Kansas is overwhelmingly against the liquor traffic. Thousands of men, who a few years ago opposed prohibition, or doubted whether it was the best method of dealing with the liquor traffic, have seen and frankly acknowledge its beneficial results and its practical success. The temptations with which the open saloons lured the youth of the land to disgrace and destruction; the appetite for liquor bred within a wall by the trading custom; the vice, crime, poverty, suffering and sorrow of which it is always the faithful source; all these evil results of the open saloon have been abolished in nearly every city and town in Kansas.

INDEMNITY LANDS.

Unselected Sections to be Restored to the Public Domain.

WASHINGTON, May 20.—The secretary of the interior to-day addressed a communication to the president, setting forth that a large number of land grant railroad companies have made indemnity selections to the full extent of their rights under the respective grants, and that a number of others, while they have not selected the full quantity, have selected all the lands within the indemnity limits of such grants which are subject to such selections; that under the rulings of this department no settler can acquire any rights under any of the general land laws to any part of the public domain, so long as the same remains withdrawn by order of the president, or by his authority, and that there seems now to be no valid reason why these orders of withdrawal should not be revoked.

The communication continues: "Restrictions to the bona fide settlement of the public domain should be removed as speedily as possible after the reasons which created them have ceased to exist. Believing that these railroad companies have had ample time to assert any rights they may have in regard to indemnity to which they may be entitled, and that no unnecessary hardships can now result to them by restoring these lands to the public domain for the benefit of settlers, it is my purpose, if it meets your approval, to take all necessary steps looking to the accomplishment of this object. I suggest in order to prevent action being taken which may result in hardships in any case, that thirty days' notice be given, by publication in some leading newspaper in the locality of these respective roads, notifying their managers of the purpose of this department, in order that they may show cause, if they can, by a certain day to be fixed in such notice, why the proposition therein submitted should not be carried into effect."

The president endorsed his approval upon the communication, and the secretary will immediately take steps to carry into effect the policy indicated. Among the railroads named are the Illinois Central, in the state of Illinois; Cedar Rapids & Missouri River, and Dubuque & Sioux City in the state of Iowa; the Sioux City & St. Paul, in the state of Iowa; Northern Pacific, in Dakota territory; Northern Pacific, main line, in Washington territory; Coos Bay Wagon Road, in the state of Oregon; Burlington & Missouri River, Chicago, Rock Island & Pacific, and Chicago, Milwaukee & St. Paul, in the state of Iowa; Chicago & Northwestern, and Chicago, St. Paul and Omaha, in the state of Wisconsin.

The *Oregonian* says, every one who writes from Coos Bay, Oregon, repeats the statement that the wealth of the district is incalculable, and that Portland, if she would not get left, must go in there.

THE NATION'S MONEY.

Our Holdings of Coin and Paper January 1, 1887, \$1,379,919,935.

WASHINGTON, May 20.—The report of the director of the mint on the production of precious metals in the United States for the calendar year 1886 is in press, and will soon be ready for distribution. The director estimates the production in the United States to have been in 1886: Gold, \$35,000,000; silver, \$51,000,000. The value of silver in the above estimate is calculated at the prevailing rate of silver in the United States silver dollar.

The production of gold shows an increase over prior year of \$3,200,000. The production of silver is slightly less than in 1885. A tabular statement shows that the production of silver in the United States has largely increased from 1880, when it was \$39,200,000, to \$51,000,000 in 1886.

Colorado continues in the first rank as the largest producer of precious metals in the United States, the value of its production of gold and silver having been over \$20,000,000 during last year. California yields the second place to Montana, with a production of nearly \$17,000,000 against \$16,000,000 by the former. The production of Nevada and New Mexico has decreased, while that of other states has remained almost constant. Texas, for the first time, is added to the lists of producing states with a production of \$200,000 in silver the annual supply of silver from the mines of the world has largely increased in the last four years, a period covered by a marked decline in the market price of silver.

Farm Notes.

Wash horse collars with carbolic soap, and then oil the inside.

For the rotting of the ripe tomato upon the vine no remedy is known.

The best cultivation of corn and garden crops is made before a seed is planted.

When the pigs are coughing, it indicates not only damp yards, but also that the roof of the shelter leaks.

Whenever the wheat fields and pastures are thrown up by the frost, it is best to run a roller over the crop.

One-third of the wood ashes is lime, and this lime is more valuable for crops than stone lime; it once having entered into vegetable life is more soluble and easily taken up by plants.

Alas! clover is coming to be regarded by bee men as one of the best honey producing plants known. One authority says that one acre of clover will produce 500 pounds of the best honey in one season.

Butter milk may be caused by certain kinds of food; by lack of thorough hot water cleansing of milk vessels; by milking cows near the time of calving; or by the unhealthy condition of the animals.

There are 5,000,000 people engaged in the dairy business in the United States, raising a product valued at \$200,000,000 a year. There are in the country 15,000,000 cows, producing 1,000,000,000 pounds of butter annually.

A little fallow applied to fruit trees will preserve them from rabbits. Lard should not be used as it is likely to stride into the wood. Some use a mixture of one part each of tallow and tar, but tallow alone is sufficient.

The Colorado horticultural society publishes a vigorous essay from one of its members, who says: "Fruit makes a good natured father, a happy mother and a jolly lot of children. If you do not believe it, try it and be convinced."

A writer in the New Orleans *Picayune* says: "I have taken with scores of farmers, and they seem unanimous in agreeing that to pay the road tax in money, and have the roads repaired by contractors, is the only way to have good roads."

Bees do not work as well in a hive exposed to the sun. In midday, when very hot, all work on the inside, such as comb building and storing honey, has to be suspended. Sometimes combs melt down, and the brood dies in the heat of the sun.

The highest apple orchard in the United States is reported to be at Hot Springs, Lake Tahoe, Cal. The trees bear well. This is said to be the greatest altitude at which this fruit is grown in this country, being over 6,200 feet above the level of the sea.

If your horse refuses his feed it is not certain evidence that he is out of condition. His feed-box may be filthy or sour. All horses are cleanly; most horses are dirty and particularly clean out the manger and make things neat and sweet. This may be all that is needed. Some horses will not eat grass even in a pasture where hogs have run. In a late discussion as to "What do farmers most need to do to improve their farms, their finances and themselves," there were many useful suggestions, among which were summer fallowing; sowing clover with grain in spring and plowing it under in the fall; rotation of crops; feeding out all coarse grains on the farm; better care of stock; more attention to the demands of the market; and more careful reading of agricultural papers.

A writer in the New York *Tribune* gives the following bit of his experience: "When I milk in seven minutes a cow giving nine quarts at one milking, she never varies. When I change cows, lost on my occasional absence the cow never resent the presence of a stranger and the man takes fifteen minutes to milk her, the cow gives a quart or two less. The same happened when, because of a badly bruised thumb, I milked the cow more slowly than usual. A cow with short teats is milked by using the bent thumb and the first two fingers, and is thus milked as quickly as another cow with the whole hand. When another milker strips the cow with the thumb and forefinger, the milk always falls off. If, as is most probable, a good deal of milk is secreted during the milking, the rapid milker should get the most milk, and the quantity should keep regularly up to the standard yield so long as the same quick method is practiced."

Churchill & Monteth's Space.

Owing to Constant Crowds
Of close buyers at our store we must postpone the pleasure of entertaining the public with a column of reading matter, until the busy season is over.

Old men, Young men,
Boys and children are being fitted out this week by Montague, in these elegant and durable Oregon City woolen suits. No shoddy about them. If you need anything in the clothing line go and look over his stock. If you want to buy, you cannot fail to be suited.

The Weather Will Now Permit
The wearing of Lawns and other light fabrics. Montague, with his usual energy, is offering an elegant line of summer dress goods, organdies, cable cords, etc. His stock of parasols comprises many elegant shapes, and of splendid quality. These as well as his increased stock of general merchandise were bought for Cash and will be sold at popular prices as inaugurated by Montague.

I am Sole Proprietor
of "Montague's \$2.00 shoe" for men's wear. Everybody prefers them to any others in the market. Do not buy any others until you have seen them.

The Farming Community
Have been annoyed with price lists sent them wherein apparent bargains are offered. The unwary are sometimes caught with this kind of chaff. Montague proposes to sell as low as the lowest of these lists, and give 5 per cent off for the cash besides. Buy your goods of Montague. He is demonstrating in a practical manner what low prices will do.

Montague Buys all Kinds
Of merchantable produce and will give you the highest market price either in cash or on remittance at his remarkably low prices.

Montague Does not Import
His goods from any eastern village. His stock is fresh and new, and he proposes to sell them at such moderate prices as to defy competition. He promises the public here and now that he will enter into no combination to keep up alleged "prices." He will always use his best endeavors to buy goods at their very lowest cash value, and he will invariably give the buyer the benefit of this, which, coupled with his long experience and business capacity, will make his mammoth cash store the place for man, woman and child to trade at. He will not be undersold by any merchant in Linn county, and he cordially invites buyers who think they are paying too much for goods at other points to call and examine his stock and prices. *It will pay you big.*

It is Said Straws
Show which way the wind blows. Montague never complains of dull times. His mammoth cash store is crowded with close buyers every day. No long faces about his establishment.

The Wool Clip of 1887
Will soon be coming in. Montague is fully prepared to pay the highest prices as usual in cash, for all wool offered. Wool growers of Linn county generally know that Montague pays a little more than any one else for good wools. Drop in and see him before you sell; it will be to your pecuniary advantage to do so.

Go and See Montague's
\$2.00 shoe for men's wear. It will compare favorably with any \$3.00 shoe in the market. When you can save \$1.00 on a pair of shoes do it and you can invest it in something else to your advantage.

Go and See Montague's
\$2.00 shoe for men's wear. It will compare favorably with any \$3.00 shoe in the market. When you can save \$1.00 on a pair of shoes do it and you can invest it in something else to your advantage.

C. B. MONTAGUE'S COLUMN.

The Ladies
are taking advantage of these lovely evenings to go to Montague's and supply themselves with these elegant spring and summer fabrics, at prices so much lower than inferior are priced to them elsewhere, that they go away astonished and delighted carrying their purchases home, making glad the hearts of the old folks, when they hear of the trifling outlay.
