

PERSONAL AND OTHERWISE

Rain is what we want. C. C. Hackleman was in Portland Monday.

The Santiam, in many places, is almost closed with ice.

There was about nine inches of snow in Sweet Home valley.

Applause in church is becoming fashionable. Why not?

The present cold weather is not adding much flesh on stock.

It is heart-breaking to notice how fast a pile of wood diminishes this cold weather.

Capt. N. B. Humphrey, of Albany, was in town on Wednesday and Thursday, on legal business.

M. D. Ballard and son, Roy, have been guests of Mrs. Dr. Ballard, of this city, during the past week.

The Pacific Express, the organ of the third party movement in this State, is on our table. We wish the new venture the best of success.

Five native girls from Alaska have been taken to Massachusetts to be educated. It is the intention to return them to Alaska as teachers.

On Saturday last the directors of the Liberty Cemetery Association met at the school house of that precinct, for the transaction of business.

M. L. Carothers, an old and highly respected citizen of this county, died very suddenly in this city on Sunday evening last. Obituary next week.

On Sunday evening last our citizens were alarmed by the ringing of the fire bell, which was caused by the burning out of a chimney at Dr. Foley's residence.

Ashland is still suffering from a malignant form of diphtheria. The authorities of that city are doing all in their power to prevent its spread and to eradicate it from their midst.

A Washington special says: The lovely wife of President Cleveland had the presence of mind to drop a blazing napkin which was making it unduly hot for her fair and delicate fingers. Oh, dear!

Mr. D. F. Hardman, one of Spicer's well-to-do farmers, was in town Monday, from whom we learn that the recent cold weather has not stopped work on the various building improvements going on at that place.

The anniversary of the Battle of New Orleans, which occurred on Sunday last, the 8th—General Jackson's day—was duly observed at Sweet Home by displaying two flags. Evidently Jackson is not dead yet, in that quarter.

T. B. Bugler, for some time in our employ, has been quite sick with what threatened to result in an attack of fever. Dr. Lamberson, with his usual good medical judgment, put a quietus to all such proceedings, and Tom will be all right in a short time.

The New Year edition of the Portland Oregonian, is one of the finest newspaper editions ever produced on the Coast. It is almost, if not altogether, a cyclopaedia of the Pacific Northwest, descriptive and statistical, and a valuable addition to any library.

J. F. Hendrickson, formerly doing business in this place, is now fitted up in a neat shop in Albany. Mr. H. is a first-class workman and no doubt will be remembered by his many Lebanon friends when they want desirable work done. As a boot and shoe maker he has but few equals. Give him a call.

William Grisham, formerly a resident of Lebanon and a member of the first company of this city, died suddenly at Condon, Umatilla county, on Wednesday last. His father received a telegram to meet the corpse at Arlington and he and Miss Julia Thayer started for that place yesterday morning.

We are informed that the town authorities made an agreement with Supervisor Bland, that if he would furnish the poles they would lay and gravel them on a portion of the road just south of Lebanon. Now that Mr. Bland has complied with his part of the contract, quite a number of our country friends are anxious that the town authorities do the same. Why not?

BIRTHDAY SURPRISE.—We acknowledge the receipt of some excellent cake prepared by Mrs. Wright, on the occasion of her mother's, Mrs. S. M. W. Hindman, 38th birthday, which occurred on Wednesday last. Mrs. Hindman was completely surprised as she was not thinking of such a pleasant affair until her friends came pouring in provided with delicious events.

NEW TIME CARD.—The Narrow Gauge road has a new time card out by which it will be seen that the mail train going south is due at Spicer at 3:20, and going north at 9:17. There is also a freight train north on Mondays, Wednesdays and Fridays, and south Tuesdays, Thursdays and Saturdays. This train relieves the mail train of a great deal of work and hence better time will now be made. Under the new arrangement, if the mail would leave here, say at 8 a. m., and return at 4:30 p. m., we would have a more satisfactory mail arrangement.

RESOLUTIONS OF CONDOLENCE.

LEBANON PUBLIC SCHOOL, January 9, 1888.

WHEREAS, Our Heavenly Father has taken by death our faithful and esteemed pupil, Johnnie and Mabel Estle, therefore be it

Resolved, That in this dispensation of providence our school has lost two of its most earnest and studious little ones, whose lives gave promise of much future usefulness and brilliancy.

Resolved, That we sympathize with their bereaved parents and friends and commend them to Him who said: "Suffer little children to come unto me."

Resolved, That a copy of these resolutions be sent to their parents and also to the LEBANON EXPRESS for publication.

MISS FANNIE GREGG, Ass't.

CHARLES S. HUNT, Principal

LOCAL AND GENERAL.

FOUNDER.—Founder consists of inflammation of the laminae, or leaves of the hoof—the most sensitive portions of the foot which serve to connect the interior part to the outer protecting covering of horn. It may be very severe and acute, or a simple stiffness of the laminae and muscles. In this case two drams of iodoform may be given, and the limbs bathed with hot water and rubbed with liniment or kerosine oil. This may be continued for three or four days. Warm blanketing, with hot fomentations, will be useful. When the horse suffers very much, and the feet are hot and painful, a poultice of salts should be given, followed by 20-drop doses of tincture of acetate; the feet enveloped in large poultices of bran, or even sawdust, steeped in hot water, and the legs bathed in hot water and wrapped up. A deep, soft bed should be given, and the horse induced to lie down. After the worst symptoms are over the hoof and sole should be rasped down and the feet kept in a puddle of clay and water. The shoes should be removed. The following remedy, says an experienced farmer, of Texas, is a sure cure for founder, viz: "A large tablespoonful of pulverized alum and a tablespoonful of pulverized saltpeter mixed. Moisten the dose and administer it by pulling out the tongue and placing the spoon as far back in the mouth as possible."

BLASTING STUMPS.—The following is the modus operandi of blasting stumps with dynamite: Make a hole an inch in diameter near the stump, inclining at an angle of about 45 degrees, so as to reach underneath the body of the stump. This hole may be made with a crowbar through the soil, but if there be a large, deep tap-root it will be necessary to continue the hole in the body of the tap-root by means of a long auger. A cartridge containing three or four ounces of dynamite is then inserted to the bottom of the hole, and a slow match having a peculiar percussion cap on the end is inserted in the cartridge. The hole is then tampered with earth, and when all is ready the outer end of the match is lighted, and the operator retires to a safe distance. The explosion usually not only extracts the stump from the ground, but tears it into pieces small enough to handle easily. The dynamite costs about 40 cents per pound, but that a three or four ounce charge, with its fuse, would cost about 10 cents—making the cost of blowing up a stump about 10 cents, besides the labor.

TAKES HEAD.—The cold weather of the past few days should behoove residents to prepare for such events. It clearly demonstrates that the winter seasons are not as of yore. They are becoming more and more severe, and our forests become diminished the rainfall becomes proportionately limited and hence the gradual increased severity of our winter seasons. The house which was comparatively comfortable years ago, seems very cold these days. In a country like this where the building material is easy of access and reasonable in price, people should have comfortable dwellings, and thus save many dollars and much suffering from colds and other diseases which result from exposure to the elements. People who have houses for rent, and charge excessively for them, should at least make them comfortable. There are some parties in Lebanon who get a good price per month for freezing renters. They will probably be rewarded with warmer quarters in the hereafter than they furnish for \$6 and \$8 in this winter. Look out!

A VALUABLE WORK.—We have received N. W. Ayer & Son's American Newspaper Annual, which is a most complete catalogue of American and Canadian newspapers, with valuable information regarding their issue, circulation, political or other distinctive features, date of establishment, subscription price, names of editors and publishers, together with the population of the cities and towns, as well as of the counties in which they are published. It includes a list of all newspapers of the United States and Canada which insert advertisements, arranged by counties, with the location, area, character of surface and soil, chief products and manufactures of each state, territory and county in the United States. Also the Press and Editorial Associations of the United States and Canada and their officers, and lists of all religious, agricultural, educational, class and trade publications of every description, and all newspapers published in foreign languages. The price of this book, containing over 1100 pages, is \$3.00, carriage paid.

A MARRIED MAN'S MISTAKE.—A married man in Lebanon refused to go out with his wife one evening not long since, saying that he had an important meeting to attend, but would not be gone long. He came tumbling home about 2 o'clock in the morning and stealthily crept into the house and to the bedside where his wife was sleeping. After getting his clothing off, ready for bed, he imagined that his wife was waking up, so he began rocking the cradle, which stood near the bed, as though he had just got up out of bed for that purpose. His wife, after he had been rocking about twenty minutes, raised up and said: "Come to bed, you stinky fool, I have the baby here." He went.

WILL ESTABLISH A MUSEUM.—The Board of Regents of the University of Oregon has this annual session designated a room in which to establish a museum. People in all parts of the state are respectfully requested to aid in building up the museum by sending specimens that are interesting and instructive. The articles received will be classified, labeled with the names of the contributors and carefully preserved. All the express companies doing business in the state have generously proposed to transport articles free of charge, weight of any one article not to exceed twenty-five pounds. Address, "University of Oregon, Eugene City, Or., for the museum."

STOP THAT COUGH, by the use of Ayer's Cherry Pectoral—the best specific for all throat and lung diseases. It will allay inflammation, aid respiration, and strengthen the vocal organs. Ayer's Almonds are free to all. Ask for them.

LINN COUNTY.

Some Interesting Statistics Concerning the Garden County of Western Oregon.

We take pleasure in reproducing the following from the excellent New Year edition of the Oregonian. We would add, for the encouragement of those who wish to locate in a morally healthy county, that Linn is to be termed a prohibition county, having given at the late special election 941 majority against the manufacture and sale of liquor. The answer to her inhabitants that it is only a question of time when by local option or other means, the whiskey traffic will be wiped out, which will be an inducement for new comers to settle within her borders and have peaceful and prosperous homes: Directly south of Marion county lies the county of Linn. It is for the greatest part a continuous tract of country well reviewed, rich in soil, diversified in its features, arable and picturesque. Linn is a very large county, extending about twenty miles north and about seventy east and west. It has three distinct districts—what may be called the valley district for the most part a continuous tract of country well reviewed, rich in soil, diversified in its features, arable and picturesque. Linn is a very large county, extending about twenty miles north and about seventy east and west. It has three distinct districts—what may be called the valley district for the most part a continuous tract of country well reviewed, rich in soil, diversified in its features, arable and picturesque. Linn is a very large county, extending about twenty miles north and about seventy east and west.
