The young man fell dead!
A friend had pointed a revolver at him.
"He didn't know it was loaded?"
We often hear it stated that a man is
a responsible for what he does not
low. The law presupposes knowledge
d therefore convicts the man who ex-

"If I had only known" has often been an unfortnuste man's apology for some evil unknowingly wrought, but in a matter of general interest—as for instance that laudanum is a poison, that naphtha is a deadly explosive, that blood heavily charged with a winter's accumulations of the waste of the system,—it is one's duty to know the fact and the consequences thereof. Our model of grandquences thereof. Our good old grand-mothers knew for instance, that the open-ing of spring was the most perilous period

Why?

Because then the blood stream is aluggish and chilled by the cold weather, and if not thinned a good deal and made to flow quickly and healthfully through the arteries and veins, it is impossible to have good vigor the rest of the year. Hence, without exception, what is now known as Warner's Log Cabin Sarsaparilla, was plentifully made and religiously given to every member of the family regularly through March, April, May and June. It is a matter of record that this prudential, preventive and restorative custom saved many a fit of sickness, prolonged life and happiness to a vigorous old age, and did away with a vigorous old age, and did away with

heavy medical expenditures.

Mrs. Maggie Kerchwai, Lexington,
Ky. used Warner's Log Cabin Sarsaparilla "for nervous sick headache of
which I had been a sufferer for years.
It has been a great benefit to me."
Capt. Hugh Harkins, 1114 S. 15th St.,
Palladalphia Pa. says "it purified my Capt. Hugh Harkins, 1114 S. 15th St., Philadelphia, Pa., says "it purified my blood and removed the blotches from my skin." Mrs. Aarea Smith, Topton, Berks Co., Pa., says she "was entirely cured of a skin disease of the worst kind," by Log Cabin Sarsaparilla. Bad skin indicates a very bad condition of the blood.

If you would live and be well, go to your druggist to day and get Warner's Log Cabin Sarsaparilla and take no other,—there's nothing like it or as good, -and completely renovate your impaired system with this simple, old-fashioned

preparation of roots and herbs.
Warner, who makes the famous Safe Oure, puts it up, and that is a guarantee of excellence all over the known world. Take it yourself and give it to the other members of the family, including the realth-giving and life prolonging powers. We say this editorially with perfect confidence, because we have heard good things of it everywhere, and its name is a guarantee that it is first class in every particular.

ONE DAY'S GRACE. An Ultimatum Whose Liberality is Simply

"I'd like to report, sah, dat my wife who came to the Gratriot Avenue Station the other day.

"Well, since how long?" "Bout nine days, sah." "Under what circumstances?"

"Went right off an' didn't come "What's her description?"

"Black, sah. She's black all ober, an' got a wart under de left eye. Dat's as fur as I remember." "Have you any idea of her where-

ribber. She was a very onsartin wo-

man. "Well, if any thing turns up we'll let von know.' last day, you know. If she doan' come

back by dat time, I'ze free of her." "Bosh! Who told you that?" "Lots o' folks. Hain't 'er true?"

"Of course not."

A LUCKY TRIAL.

The good Fortune which followed fair

San Francisco, February 29, 1888. DESE SIE: It affords me great pleasure to send you this voluntary statement of my experience in testing the merits of Joy's Sarsaparills. For the ceedingly sluggish liver, and within the past two years it has brought within its trail a thoroughly dispressed atomach, including loss of appetits and distress after esting, pairs in the back and kidneys, and botts around my neck and face. I have tried several remedies which are advertised as specially for the liver, and could never get more than temporary relief of about a week or two. I was recommended to try a bottle of Joy's Vegetable Barsaparilla as a test, and while taking the first bottle I became convinced of its merits for I could feel it was working a change in me. I have taken five bottles, and during that the my trouble have left me. Everything is working full and regular, in fact it has cleaned, purified and braced me up gunerally. I feel like a new man. You are at perfect liberty to me this as you see fit, or you can refer whom you please to

CHRYSANTHEMUMS.

Useful Hints About the Culture of

This charming race (Pyrethrum sin nse), which may justly be considered verybody's flower, from its easy culture and its wide adaptability to soils and localities, is especially valuable for oming in at a time when spproaching winter denudes the gardens of their ac customed ornaments. Indeed, it seems almost smoke and frost proof, and will struggle on against both drawbacks with the perseverance and resolution that a brave spirit encounters difficulties, blooming during intervals when ever open weather permits till its pe riod of duty is accomplished. Under the shelter of glass, of course this is not interfered with, but a warm house is not required; indeed, it is rather against the welfare of this plant. The chrysanthemum has undergone similar improvement to that which has attended so many other favorite plants.

well trained against a wall, and in that position, being somewhat sheltered, continue to flower later than in the open ground. For indoor blooming in pots, it will be most advantageous for amateurs to purchase compact little plants about to come into flower. But where any of the dwarf kinds are not already in bloom in the borders, same may be taken up with a good "ball' and dropped into pots (not too small) already prepared, with crocks for drainage, and rich loamy and sandy soil about one-third up the pot for the ball to rest upon. Then drop the ball into the pot with as little dis-turbance as psssible, and fill in firmly with the soil already named. Water with tepid water, and keep the plants close for a few days. If this operation be carefully done, the plants will receive no greater check than will pro-tract their flowering for a short timewhich is one of the advantages of such a procedure. To increase a stock of favorite varieties, young suckers from the roots may be taken after the blooming has entirely ceased. Let them be attack alongly in small nots of sandy potted singly in small pots of sandy soil, and placed in a gentle hotbed in a
