WRENCHED BIS BACK.

Lyndonville, Ohleans Co., N. Y., April 2, 1885. About a year ago, I imprudently stepped off the Hudson River cars while they were in motion. In trying to save myself from a fearful fail I wrenched my back terribly. The next day I could not walk, and I suffered pain from my neck to my heels Various applications were made, but nothing which was done abated my suffering. Being anxions to get up and attend to bus ness, I determined to place three Allicock's Ponous Plasters, one above the other, on my back. In about an hour and a half they caused considerable itching. The pain and screness sensibly decreased, and I rested pretty well that night. The next morning the itching began to be quite severe under the plasters. To get some re-lief, I had my back well rubbed crossways and attended to business. O. Y. PETIMAN.

THE LONDON TALLYMAN. How He Is l'atronized by the Wives of

Laboring Men.

The "tallyman" plays no inconsiderable part in the disasters of the poor, especially in the little household where the wife is vain or thriftless. over the Plasters. I was surprised within two hours afterwards to find the pain and The tallyman or traveling draper is, as soreness almost gone. I stayed in bed that day; and the morning afterwards I got up a superior kind of hawker or an inferior kind of commercial traveler-whichever you like. In purchasing and selling it was at one time customary for vines, and then work it into the soil well | traders to have two sticks, and to mark with a notch on each the number of goods delivered. These tallies (from the French word tailler, to cut) were the means by which accounts were kept. The tally-shop is a shop at which goods are sold to customers on account, the account being kept in corresponding books. One is called "tally," and is kept by the buyer; the other side is the "counter tally," and is kept by the seller. Sometimes a card is given to A Cough. Cold, or Sore Throat re | the customer instead of a book. The tallyman calls with his goods, his finery some i curable Lung Disease Brown's conchinal Traches" will invariably give relief. and his household stuffs, and displays his tempting wares to the eyes of the housewife.

Unfortunately, many poor men's wives don't want much pressing. They see the finery; there is only a small Under the present management it has become the most popular house in San Francesome the most popular house in San Francesome to pay the rest by a small installeasy to pay the rest by a small installment every week! Many a good, honest workman dates the day of his downfall to the tallyman's first stroke of business with his wife. The tallyman will be paid, and to pay him the wife will sometimes pawn her children's things and descend to dodges which are the beginning of bad times. The great desire of most of the tallyman's lady customers that they are in debt from the husband's knowledge, and a threat to tell the husband or apply to him for NOTHING IS KNOWN TO SCIENCE AT the money is a very powerful weapon

spelled it correctly. Since that time she has conversed as freely as other women, and great hopes are enter-tained of heg ultimate recovery.

SODAORSALERATUS

THE "ADVANCE" THRESHERS AND ENGINES I guarantee the New-Fangled Advance Separator to be the best grain-saving, tastcst Thresher and most durable Separator ever made. But, remember, it is not an experimental machine, as the Old Fogy machines are. You are well aware of the time lost that
you have to pay for) in experimenting with Old Fogy machines. The New Fangled
Thresher leads the way. The growing and kicking of the Old Fogy agents is only equaled
by the amount of grain kicked out in the straw by the O d Fogy machines. Of course, if you
wish a chesp machine, Old Fogies will supply you at your own price; but their machines are
dear at any price. You cannot afford to buy a thresher without examining the ADVANCE.
Do not be talked into buying a machine because it is cheap and Old Fogyish. Ask the Old
Fogy agents if they will set beside the new-fangled machine and ist you see which is the
experimental machine, and sold on its merrits. I have never yet had to call on any court to
help decide the merits of the new-fangled machine. Please exal ine the court records in reference to the Old Fogie's plan. Many years ago a man built a new-fangled machine,
called a steam engine. Old Fogies then, as now, stood back and said they would ruin the
country. Do you not want to be ruined in the same way? Remember, the newfangled machine is past all experimenting, while Old Fogy's machines are being experimented with all the time, and at your expense. Do not fool with them any longer, while
your grain is going to waste.

rangled machine is past all experimenting, while Old Fogy's machines are being experimented with all the time, and at your expense. Do not foot with them any longer, while your grain is going to waste.

Remember the new-fangled machine is sold on its merits entirely. Remember, your whole dependence is upon your crop proceeds, and if you allow Old Fogy machines to waste your grain, you are just that much out of pocket. To prevant this, see that the party that does your threshing procures a new-fangled ADVANCE Thresher, as they are constructed so as to save your grain, and have a better record then any old-fogy machine. Write for further particulars. I am prepared to prove all my statements—i. e., The ADVANCE machine will do more and better work than any other.

I hereby challenge any old fogy agent to name ANY case where the ADVANCE machine has failed to do as represented since its introduction on this Coast. Show up or shut up.

Remember that old fogy agents saying the contrary does not make it so. It will pay you to investigate. I can prove all I say.

I also sell the well known DINGEE WOODBURY POWER. A number of manufacturers make them on a royalty but I do not know of any imitations, but am always inclined to look out for those that talk of imitations. I also deal in Laundry and Marine Machinery, Farm. Church and School Bells. General Machinery, Switt Ollers, Orme Safety Valves, Miller Pumps, Hancock Inspirators, Park & Kennedy Injectors. Acme and Alligator Wrenches, Blacksmith Drills, Self-Heating Bath Tubs, the Westinghouse Engines. See the prices: 10-horse on wheels, \$900; Traction, \$1075; 15-horse Traction, \$1400. Special discount for cash. General Agent for Colbura's Dynames and Lamps for Electric Lighting—5 to
