The plans and specifications of the life-saving station on the Pacific Coast ordered to be built by Congress, are nearly ready and the work is being pushed. William Langley Northam died yesterday in New York. The deceased was a Califernia pioneer and one of the founders of Sacramento city. He was eighty two years old. Mrs. James G. Blaine, Jr., has decided to become an actress, but will not drop the contemplated suit aginast the Blaine family for the alienation of her husband's affections. Rumor in Washington says William R. Hearst has married Theresar Powers, a woman with whom he was very friendly while he was at Harvard College, and that he has gone to Paris. | The first grand exhibition of the Ohio Valley Fanciers' Club will be given in Cincinatti December 12th to 19th, inclusive. It promises to be the finest display of poultry, pigeons and pet stock ever witnessed in the West. Full particulars and entry blanks can be procured from the secretary, W. C. Riedington, 476 Baymiller street, Cin- cinnati, Ohio. On a recent morning every can of milk coming into New York was ex- amined by the State dairy inspectors. The total number of cans inspected was 5,728, and of this number only fifteen of a doubtful character were found. Samples of these were taken for analysis, They showed a light per- centage of cream, indicating that the milk had been skimmed. The result of the inspection shows that the milk now coming to the city over the rail- roads named is of better quality than ever before. No farmer is a good feeder who doe not study the individual peculiarities | while being handled or stored, become cooler than the surrounding stmos- phere. If it does not it will never "sweat," for this "sweat" is simply at- mospheric moisture. precipitated up on the cool apple, precisely as it is precipitated on the outside of a pitch- er of ice water in summer. An ap- ple can not be made to "sweat" in any true sense. The skin of all sound, smooth apples is nearly as air and water tight as India rubber. A Tompkins County correspondent of the New York Tribune writes: "It is profitable business raising winter lambs, but, like any other, success is the reward of close attention. Lambs last winter sold for \$12 in January, and then along down to \$6 in the last of April. The extra feed and care for the ewes is nearly paid for in their su- perior condition for mutton in early spring, when mutton is scarce. A shepherd can care for a herd of one hundred and fifty ewes, and have an easy time doing it. If this is not bet- ter than selling lambs in the fall at six months of age for \$3, the price here now, I would like to be corrected. | ar to this country, yet none so abound and apparently claim possession as these.—Home Journal. A Typical Adirondack Guide. The great character of our payy was the friver, Charley—a chap who is as hard to ratch asleep as an old wensel. He is as trim built as an Indian runner, as quick as a greyhound, and can so exactly imitate the hound in full chase that it will puzzle an old hand to tell which is the real hound. He seems made of whalebone, trimmed with india rubber. He will start out towards the sast with a couple of dogs attached by a chain to his waist, another he leads, and his own two travel in front, with them he holds general conversation on the way. Within hiree hours he will start cach dog after a separate deer, and by short cuts or by some hocus pocus, he will be up with one or more of them coming in from the opposite direc- tion, join his voice, and by the time the deer is killed, he is on hand to join in the hilarity and fun usual on such occasions. This in- imitable fellow has but one fault, and I do at know that you would term it such; you night say it was proof of his game—ho can- not eat venison; it makes him sick, and we iad to feed him on perk.—Forest and Stream. —The controversy on inspiration bewilders some people. A lady, who | While one dines at popular cafes he has but to look about him and he is quite sure to see habits indulged provocative of apoplexy. A familiar sight is the man about 60 years ald whose highest pleasure is in tickling his pal- ate. He is overweight by fully fifty pounds; his face is red and shining; he is full to burst- ing, and he looks as though every important button on his clothing was threatened. One on a warm day gives such a man as "wide a berth" as he would a cookstore; he is alto- gether too hot to sit near. He commences his dinner with an appetizer-generally a cocktail. Then he deliberately "fills up," largely on meat and other "hearty" foods, all of which are washed down with one at least, and generally two bottles of lager beer. As he eats and drinks with one hand, he fans himself vigorously with the other, all the time growing redder and redder, and finally, when he hoists himself cut of his chair, his face takes a purplish hue in consequence of the unusual happens. Let such a man, soon after dining, become violently enraged or shocked by some unexpected calamity, and the chances are an attact of apoplex is the consequenceBoston Herald. Corner of Main and Sherman. Iggies, Hacks, Har- ness and RELIABLE HORSES a going to Brownsville, Wa weet Home, Scio, and all rts of Linn County. Ids of Teaming DONE AT | This passed the house and is now be- fore the senate, where it was not con- sidered at the close of the last session. Then come bills for light house and life saving stations at the mouths of the Suislaw and Coquille rivers, pub- lic building bills for Portland and appropriation of arms for the Oregon militis, which passed through the house last session, but which was not then considered by the senate; bill forfeiting the Northern Pacific railroad land grant between Wallula and Port- land, which passed the house and is now in conference between the two houses; wagon road land forfeiture bills; pensions to Oregon Indian war survivors; and the Indian war debt. The project for a boat railway on the Columbia river at The Dalles may be considered. Here, however, in the event of success, the danger of veto is great, in view of the president's well known reluctance to authorize expenditures for internal revenue im- provements. It is certainly much to be regretted that so few farmers keep accurate re- cords of their operations. A double loss results to themselves and to the public. It is an absolute loss to any man to have no actual knowledge of his business affairs, based upon re- corded facts. And it is a public loss | talie's presents and ordered that she shall be addressed hereafter as "Mrs. Natalie de Keezko." The plans and specifications of the life-saving station on the Pacific Coast ordered to be built by Congress, are nearly ready and the work is being pushed. William Langley Northam died yesterday in New York. The deceased was a Califernia pioneer and one of the founders of Sacramento city. He was eighty two years old. Mrs. James G. Blaine, Jr., has decided to become an actress, but will not drop the contemplated suit aginast the Blaine family for the alienation of her husband's affections. Rumor in Washington says William R. Hearst has married Theresa Powers, a woman with whom he was very friendly while he was at Harvard College, and that he has gone to Paris. The annual preduct of honey in America is 28,000,000 pounds, or hal a pound apiece to the population. In 1880 Tennessee made 2,131,000; New York, 2,089,000; Ohio, 1,627,000 North Carolina, 1,501,000; Kentucky 1,500,565; and seven other States—Arkansas, Georgia, Illinois, Iowa | The first grand exhibition of the Ohio Valley Fanciers' Club will be given in Cincinatti December 12th to 19th, inclusive. It promises to be the finest display of poultry, pigeons and pet stock ever witnessed in the West. Full particulars and entry blanks can be procured from the secretary, W. C. Riedington, 476 Baymiller street, Cin- cinnati, Ohio. On a recent morning every can of milk coming into New York was ex- amined by the State dairy inspectors. The total number of cans inspected was 5,728, and of this number only fifteen of a doubtful character were found. Samples of these were taken for analysis. They showed a light per- centage of cream, indicating that the milk had been skimmed. The result of the inspection shows that the milk now coming to the city over the rail- roads named is of better quality than ever before. No farmer is a good feeder who doe not study the individual peculiarities of his animals. Some require more than others, and to give too much is as bad as to feed too sparingly. In the same litter of pigs some will fatten readily, while others just as thrifty will grow long and large in frame, with less fat. These last, whether male or female, should be reserved for | while being handled or stored, become cooler than the surrounding atmos- phere. If it does not it will never "sweat," for this "sweat" is simply at- mospheric moisture. precipitated up on the cool apple, precisely as it is precipitated on the outside of a pitch- er of ice water in summer. An ap- ple can not be made to "sweat" in any true sense. The skin of all sound, smooth apples is nearly as air and water tight as India rubber. A Tompkins County correspondent of the New York Tribune writes: "It is profitable business raising winter lambs, but, like any other, success is the reward of close attention. Lambs last winter sold for \$12 in January, and then along down to \$6 in the last of April. The extra feed and care for the ewes is nearly paid for in their su- perior condition for mutton in early spring, when mutton is scarce. A shepherd can care for a herd of one hundred and fifty ewes, and have an easy time doing it. If this is not bet- ter than selling lambs in the fall at six months of age for \$3, the price here now, I would like to be corrected. 2. The ewes are shorn soon after com- ing into winter quarters, else, owing to the temperature (50 degrees) kept up with best results with lambs, the ewes would shed their wool before spring. A visit to a winter-lamb raiser last sea- son, who had neglected shearing, re- | hr to this country, yet none so abound and paperently claim possession as theseHome Journal. A Typical Adirondack Guide. The great character of our payy was the fiver, Charley-a chap who is as hard to ratch asleep as an old wensel. He is as trim built as an Indian runner, as quick as a greyhound, and can so exactly imitate the hound in full chase that it will puzzle an old hand to tell which is the real hound. He seems made of whalebone, trimmed with india rubber. He will start out towards the sast with a couple of dogs attached by a chain to his waist, another he leads, and his own two travel in front, with them he holds general conversation on the way. Within hree hours he will start cach dog after a separate deer, and by short cuts or by some of them coming in from the opposite direc- tion, join his voice, and by the time the deer is killed, he is on hand to join in the hilarity ind fun usual on such occasions. This in- imitable fellow has but one fault, and I do at thow that you would term it such; you night say it was proof of his game-be can- tot eat venison; it makes him sick, and we iad to feed him on porkForest and Stream. -The controversy on inspiration bewilders some people. A lady, who has heard assertions frequently made that certain parts of the Bible are not inspired, is anxiously inquiring for an 'Inspired' preacher, so that she may be secure against mistake. -Among the various "correspond- ence schools" which have of late come to be, and we trust to stay, is the "Americas: School of Politics." de- | While one dines at popular cafes he has but to look about him and he is quite sure to see habits indulged provocative of apoplexy. A familiar sight is the man about 60 years ald whose highest pleasure is in tickling his pal- ate. He is overweight by fully fifty pounds; his face is red and shining; he is full to burst- ing, and he looks as though every important button on his clothing was threatened. One on a warm day gives such a man as "wide a berth" as he would a cookstore; he is alto- gether too hot to sit near. He commences his dinner with an appetizer-generally a cocktail. Then he deliberately "fills up," largely on meat and other "hearty" foods, all of which are washed down with one at least, and generally two bottles of lager beer. As he eats and drinks with one hand, he fans himself vigorously with the other, all the time growing redder and redder, and finally, when he hoists himself cut of his chair, his face takes a purplish hus in consequence of even that slight effort. He is like a violin when in tone; every part of his system is heyed up, and something is sure to break if the unusual happens. Let such a man, soon after dining, become violently enraged or shocked by some unexpected culamity, and the chances are an attra. of apoplexy is the consequence.—Bosten Herald. A man, his wife and three children walked up to one of the drop-a-penny-in- the-slot-and-ascertain-your-correct-weight machines in one of the North river ferry houses. After examining it he told his three children to step on the platform of the scale, which they did. He then moved around to 203. He then told the largest child to step off, and as soon as he did the hand moved back to 113, thus by subtracting 113 from 203 he ascertained the weight of the child. In this manner | in the past few years pursuit was a pleasure, we now have too much pursuit, and too little possession." "Must coins are most in demand?" "United States coins. Copper first, shive next, gold very far last. There are of the collecting of thirded States coins. First, familiarity with the types, coins, etc., which prevents imposition of counterfeits; second, our coinage began in 1793, is yet procurs be and not interminable like old foreign coins are most in demand?" "Must coin a possible of the collecting of the coin I now hold may have been in yaking ton's pocket once, and my with the coin I now hold may have been in yaking ton's pocket once, and my with the coin I now hold may have been in yaking ton's pocket once, and my with add, the greatest advantage is she can what he done so, and may may be be of did coins?" "Must so, but had he done so, and may more granddads the same, the supply norse granddads the same, the supply is prospective value impaired, she are the excitement that now exists."
