BEAUTY IN WOMAN. Rules for Cultivating the Most Lasting

No cosmetics are so capable of hancing beauty as the smile of good

temper and a desire to please. Beauty of expression is more than any other form of loveliness, capable of cultivation. A woman may have perfectly regular features, but her face will be so lit up with the beauty of goodness that she can not fall to please, if she strive to obey the spirit of some such rules as the following, which may be multiplied or diminished according to particular cases.

1. Learn to govern youselves and to be gentle and patient. 2. Guard your tempers, especially

in seasons of ill-health, irritation and trouble, and soften them by prayers and a sense of your own short-comings

& Neve-speak or act in anger until you have prayed over your words or

others, but forbear and forgive, as you desire forbearance and forgiveness 6. Never retort a sharp or angre

word. It is the second word that makes the quarrel. 7. Beware of the first disagreement.

8. Learn to speak in a gentle tone 9. Learn to say kind and pleasant

things whenever opportunity offers. 10. Study the characters of each and sympathize with all in their troubles,
