On last Sunday Mr. Chas. D. Montague and your humble quill driver took a trip to the flourishing little city of Brownsville. We left our town about 6:30, before most people had risen from their Sunday morning nap; arrived in the beautiful city of Brownsville a few minutes before nine. We first drove over in South Brownsville to announce that there would be no preaching in the C. P. Church on account of the illness of the pastor, and then back to the main part of the city, and as soon as we had left our buggy and turned our horse, which had done its part well, to the kindness of the livery men, we met our old friend Wm. Morrow, and the three of us proceeded to the jewelry store, where we met T. S. Pillsbury and Chas. Miller, and after a friendly chat we then made our way to the Times office, with the kindness of Mr. Miller, but on arriving we found both of the editors absent, one on business and the other to see his best girl, but through the kindness of their foreman were shown through their neat little office, which has a very fine assortment of news and job type and good presses. We then made our way to the M. E. Church, but on arriving there found the services had commenced, and as the house was pretty full we did not enter. We then took a stroll to the hotel, where we got dinner, had a chat with our former mentioned friends, went to Sunday-school, but we arrived just as it closed. We then started for our own pretty city, arriving there about 8 o'clock, content to remain there another week at least before taking another vacation.

MEN WE WANT.

There is a large immigration coming into Oregon, and some of it of a class of which there is no particular use, for we are pretty well supplied with men who are looking for soft snaps. What we want are men to cut our timber, build our railroads, and engage in all enterprises that aid in the development of our natural resources and increase sum of our material wealth. Men who do not care to engage in such enterprises had better keep away; there is no place for them. It is one of the poorest places in the world for young men without means, who despise manual labor. Soft places, "snaps," where high salaries are paid and nothing to do, have no existence here, and success is only to be won by hard labor and a prodigious amount of it. For young men who have to start from the lowest round of the ladder and have an abundance of mental and physical energy, there is plenty of room. They are the men we need, and we can offer them incomparable opportunities; they have only to labor, in order to mount the ladder of prosperity. It is idleness that is at a sad discount. Labor is "king." It wants no lazy vagabonds or tramps. This is a good country, for good and worthy men and women, too. No others need apply.—Pioneer.

JUST SO.

The Astoria Transcript says there are young men there who go in the best society, and are considered plunks of propriety, who frequent the lowest dance-houses in "swill-town," and dance "with the most degraded old jades on the face of the earth." The Albany Democrat copies this brochure, and says it may hit some of the society young men of Salem, Corvallis or Eugene, not to say Albany. There should be no social status for young men of this kind. There is no excuse for a man to frequent evil and seek the society of the low. When he learns that he cannot be received by well-bred society unless he behaves himself, he will shun such haunts. All the same, he is not fit for decent society if he has any fancy for such dens of infamy.—Oregonian.
