GOLD NUCGETS. Blatory of the Most Important Found in

The first nugget of any great import- Ohio and Mississippi Floods will Cause ance, and which played a prominent part in the early history of California, was found by a young soldier of Steven-son's regiment, in the Mokelumne River, while drinking from that stream. He hastened to San Francisco and placed his prize in the hands of Col. Mason for safety, after which it found its way to New York, where it fanned the smouldering flame and caused the nations to realize the importance of California. This nugget weighed be-

tween twenty and twenty-five pounds. In November, 1854, a mass of gold was found at Carson Hill, Calaveras County, which weighed 195 pounds troy. This is the largest piece of gold ever found in the State. Several other nuggets, weighing from six to seven pounds, were found in the same locali-

On the 18th of August, 1860, a large piece of gold was taken from the Monomental Quartz Mine, Sierra County, which weighed 1,596 ounces troy. The nugget was purchased of the owner by R. B. Woodward, of San Francisco, and exhibited at Woodward's Gardens. Mr. Woodward paid \$21,636,52 for it, and afterwards melted the nugget, realizing \$17.654.94 from it.

A Mr. Strain found a large slabshaped gold quartz nugget near Knapp ranch, half a mile east of Columbia Tuolumne County, which weighed fifty pounds avoirdupois. After crushing and melting, the gold was valued at

weighed twenty-eight pounds avoirdu- nounced.

In 1856, at French Ravine, Sierra County, a nugget was found which contained considerable quartz, but vielded \$10,000, while another was found at an earlier date in 1851, the gold from which was valued at \$8,000. In the year 1867, at Pilot Hill, El Dorado County, a boulder of gold Senator Cullom introduces a bill to quartz was found, which yielded in gold make things more unpleasant for the

draulic mine which contained \$5,760 worth of gold. It has been reported that a nugget of pure gold was found in the middle fork to the Northwest. of the American River, two miles from Michigan Bluff, in the year 1864, which get states that the weight was 187 ounces. - Virginia (Nev.) Chronicle.

A Story About Bismarck.

An advance copy of the third volume of H. V. Sybel's "History of the German Empire," has been received. Probably the most interesting chapters Horace Greely near Chappanaqua, refer to the relations between Prince N. Y., and occupied by his daughter, Bismarck and Count Rechberg, the has been destroyed by fire. Prussian and Austrian Ambassadors respectively at the German (Frankfort) Diet. Prince Bismarck (then Herr von Bismarek Schonhausen) soon found out that Count Rechberg was hot-tempered and passionate, but in the main h able and good-natured. Count Rechberg, on his side, cordially disliked Prussia and its astute representative, but did his best all the same to keep on amicable terms with his colleagues. Both officially and socially there was, however, plenty of friction between On one occasion things came to such a pitch that Count Rechberg, entirely losing his self-control, passionately exclaimed: "One of my friends shall wait on you in the morning. Why all this unnecessary delay?" Herr von Bismarek coolly replied. "In all probability you have a pair of pistols handy. Let us settle the matter chises of that company have been sold ready, I shall write a report about the whole transaction, which, in case I am ed the sheet to Count Rechberg. re- had refused his offer of marriage. questing him to examine the same. MYSTERY PLAY AT NICE. Curious Spectacle Which Mingled The-ology with the Antics of a Clown.

John Swinton, is an interesting letter to the N. Y. Sun describes the socalled "Mystery Play" witnessed by him at the city of Nice: The play was performed in a weather beaten tabrnacle known as the Theatre Risso, located in a part of the city with which fashionale visitors are not apt to be familiar. It is approached through a narrow old courtyard, near which are scores of these very narrow streets lined with strong and high stone houses that were built ages and ages ago, and that are likely to stand for ages yet to come unless their demolition is brought about in the interest of sanitary science. It is entered through a curious opening at one end, where a burly and large-mouthed individual (who afterward turned out to be one of the actors) announces that admission is free to all, an announcement which is qualified, however, by the

paid for, and also by the "passing of the hat" at the end of each act of the The title of the mystery was "The Manger of Bethlehem." It represented the incidents of the advent of Christ, as recorded in the gospels, from the annunciation to the birth in the manger. The chief figures on the stage were Joseph and Mary, the Angel Gabriel and Satar; but there were also other characters not to be found in the scriptural narrative, including a clown and his partners, who introduced comic features that were greatly enjoyed by the spectators. In truth, one of the most singular things about the play was the mixture of fautastic elements with the solemn mysteries of the advent. The house was frequently rent with laughter just after or just before the highest religious sentiment had been evoked.

The characters of Joseph and Marv. as they appeared on the stage, were dignified and natural, and their discourse and intercourse was in every way becoming. The Angel Gabriel was represented by a stalwart and beautiful young woman clad in white, and she wielded her sword with success against Satan, who appeared with the traditional horns and garb, and sprang around with agility in his vain

efforts to do battle against the advent. The stage was well set and the scenery was plain but appropriate. At the end of the performance the infant was seen in his cradle beside Joseph

Joe and Mary, under the guardianship of

Gabriel After having been notified at the door that admission was free, we paid for our seats, but this was not the last of the demands upon our purse. At the end of each act performers left the stage, took a plate, and went from seat to seat through the house so ing gifts of money, and securing a won the Nottingham Spring Handicap of good many copper coins. It looked 500 sovereigns, at Nottingham. England, us," chorused a coterie of colleagues. on April 1. ng robes of white, with others among the actors, thus engaged; and it was pleasing to see that neither Joseph nor Mary had been chosen to do any part of this work.

Didn't Have to Sing.

"Excuse me," he said after having followed a young man into an office on Congress street west, "but isn't your name Blank?"

"Yes, sir." You not?"

"I am." "One of the best in Detroit?" "Undoubtedly, sir."

-Detroit Free Press. Private Gorman's Plan.

We hand in our company a very pose of controlling glucose and starch conceited young man named Gorman. has purchased the extensive works of the says a writer in the N. Y. Sun, and Voorhees Starch company in Danville, from the day he shouldered a musket he was anxious to invent a plan to save the country. He had somewhere read that a private soldier gave Napoleon the plan of a successful campaign and was rewarded by being made a general, and his whole time was taken up in inventing plans, all of which were knocked in the head by our captain. One failure after another had pressed the harder he thought, and his time finally came. When Burnside moved up to attack at Fredericksburg Gorman wrote him a letter, saying that he had a plan by which Lee's whole army could be driven into Richmond in terror or captured without bloodshed. The letter was put in such strong language that the general de-cided to investigate, and Private Gorman was sent for to explain his plan. He came back to us a prisoner, was kept in the guard-house all that winter, and it was three months before we got a chance to find out what had happened at headquarters.

He explained that he was ushered into the presence of Gen. Burnside with ceremony, identified myself as the writer of the letter, and the general wheeled on him with: "Well, how would you scatter Lee's

Easiest thing in the world, general. was the unbashed reply. "Wait, for a dark night; then let 10,000 soldiers dress up as spooks, put on false faces, and cross over the river. THE BOY. He is Being Crowded Almost Entirely Out of Employment.

What is to become of the boy if the present tendency to crowd him out of employment goes on? asks the N. Y. Tribune. Messengers with beards seem to be growing more numerous all the time, and the elevator boy has been call-boys at the hotels are little more than a memory, and in their places are men. It is true there are still news-boys about the entrance to the boys at the hotels are little more than a memory, and in their places are men. It is true there are still news-boys about the entrance to the beidge. boys about the entrance to the bridge, and other places where there are generally crowds of people, but news-women and newsmen are competing with them in ever-increasing numbers. Uptown the newsdealer has virtually driven the boys out of the business. Argument of counsel was commenced With bootblacks the story is the same. A few of them still pursue their calling, but grown Italians have seized hold of the best corners, and with their big armchairs easily take away the business of their vouthful rivals, whose cus mers have to balance themselves on one leg against a sharp corner of the building. There are a few boy ped-dlers of shoestrings and handkerchiefs, but this occupation is far more appro priate to those who have arrived at years when an amble is the natural

gait. On trains there are still many lads who go about distributing illustrated papers, light novels and candy, and then go about again collecting them, incidentally selling a few of the articles, but even here the men are getting ahead of them. Yes, what shall beie of the boy is a serious question. If the present movement toward his displacement continues the only thing left for him to do will be to grow up and become a man, but unfortunately this takes time. - N. Y. Tribune.

Dispositions on Tap. It would be an enormous advantage

to humanity if we could buy or hire dispositions. Millionaires would keep future before it. The river is long and free from obstructions, and traverses a fine belt of heavy timber throughout its you wanted go to a wedding, for inwardrobe as they do clothes. When you wanted go to a wedding, for instance, you would go and put the appropriate disposition on with your dress suit. You would have a disposition for all kinds of occasions, and you could adjust yourself to any circumstances, jocose or sad. But you would have to be careful. For instance, if you put on your wedding disposition to go to a funeral there might be trouble; it would not be so bad if you put on your funeral disposition to your funeral disposition to go to a wed-ding. People would think you were sad about the girl getting married, as a result of your own experience, if you were married; because she was not marrying you, if you were not. It building and contents were a total would not do to go to a high tea with

> position to go to go a prize-light with A great many men would not go me and change their disposition after business any more than they change their clothes. "There, Mary," a fellow would say the opera. "I quite forgot to change my disposition, and I have my lawsuit

What are you home so early for, John?" the anxious wife would remark when her husband came home early in the afternoon. "Got some fellows from Chicago to entertain. Where did you haug my jovial jag the last time I came home?" "I hung it out to air. You'll find it

one on. I might as well go home.

in the back yard-still a little moist .-San Francisco Chronicle.

Sir Andrew Clark, one of the successful and distinguished of Englife and of the causes of his professional success. His story deserves perusal. Sir Andrew was born in Scotland, and went to London thirty-six years ago, a young man in delicate health, and without a single friend or influential connection. He had, however, a small patrimony, and was enabled to pursue himself quite free from any intrigues or quarrels. He devoted himself to work, and before many years, despite ill health and opposition, he was made physician to London Hospital. His subsequent success was slow but con tinuous, and was achieved without any definite expectation at first that it would eventually be so brilliant. Sir Audrew gave the following as some of

'Firstly," he said, "I believe that

every man's success is within himself, good advantage, many trees being 100 and must come out of himself. come to any man in any other way. the mine thoroughly and expect to prove that they have a valuable coal deposit.

And if some of my young friends should say here, 'I can not do that-I can say here, 'I can not do that -I can not love work,' then I answer that there is a certain remedy, and it is work. Work in spite of yourself, and make the habit of work, and when the habit of work is formed it will be transfigured into the love of work; and at last you will not only abhor idleness, but you will have no happiness out of work which then you are constrained from love to do. The man must be charitable, not censorius-self-effacing. rivals and autagonists that can be done. The man must believe that labor is life, that successful labor is life and gladness, and that successful labor, with high aims and just objects, will bring to him the fullest. truest, and happiest life that can be lived upon the earth."—Medical Record.

A BLOOD-SUCKING PLAN The Strange Vegetable Growth 1 Central American Swamps

Leroy Dunstan, the well-naturalist of this city, says a Ne leans letter in the Philadelphia who has recently returned from tral America, where he has spent ly two years in the study of the ly two years in the study of the and fauna of the country, relates finding of a singular growth in on the swamps which surround the glake of Nicaragua. He was engin hunting for botanical and entou gical specimens in this swamp, wis known as San Sebastian's, when heard his dog cry out as if in agfrom a distance. Running to the from which the animal's cries or Mr. Dunstan found him enveloped Mr. Dunstan found him enveloped perfet network of what seemed to tine, rope-like tissue of roots or fit the nature of which was unknown

The plant or vine seemed compentirely of bare, interlacing stems sembling more than anything else branches of the weeping willow deed of all foliage, but of a dark, no black hue and covered with a twiscid gum that exuded from the parawing his knife Mr. Dunstar deavored to cut the animal free was only with the greatest difficult that he succeeded in severing the muscular fibre. To his horrest amazement the naturalist that that the dog's body was cover blood, while his hairless skin read to have been actually below ered in spots, and the animal gered as if from weakness and extion.

In cutting the vine the twigs like living, sinuous fingers about Dunstan's hand, and it require slight force to free the member fr Dunstan's hand, and it require slight force to free the member frelinging clasp, which left the flest and blistered. The gum exading the vine was of a grayish-dark remarkably adhesive and of a discable animal odor, every powerfunauseating to inhale.

The native servant who accor

Mr. Dunstan manifested the grahorror of the vine, which they cagedas de diable, the devil's scersnare, and were full of stories of death-dealing powers. One of stories was of an Englishman resi in Managua, who, while hunting the swamp a few years before, down beneath a tree where a large powerful specimen of this sing plant was growing, and, inadverte falling asleep, awoke to find himse enveloped in its web, and, in spite every effort made to extricate him, pe ished in its deadly embrace. Another story was of an escaped c vict who had hidden in the swamp : whose bones had been found in the folds of the sagenas only a short time before Mr. Dunstan's visit. These are fairly believed in by the people are fairly believed in by the people which but the only three specimens which Mr. Dunstan was able to find were all small ones, though the meshes of the largest would probably. If extended in a straight line, measure nearly if not quite 100 feet. He was able to discover very little about the nature of the plant, owing to the difficulty of hand-ling it, for its grasp can only be torn away with the loss of skin and even of

mal mouths or little suckers, which. ordinarily closed, open for the recep-The gum exuded seems to serve the two-fold purpose of increasing its tenacity and of overcoming a victim by its sickening odor. The plant is found only in low, wet places, and usually beneath a large tree, and while dormant seems only a network of dry, dead vines covering the black earth for several feet, but coming into contact with anything will instantly begin to twist and twine upward in a horrible, life-like manner, breaking out with the

flesh, but, as near as Mr. Dunstan could ascertain, its power of suction is contained in a number of infinitesi-

gum-like substance spoken of before, and enwrap the object with a celerity that is almost incredible. If the substance is animal the blood is drawn off and the carcass or refuse then dropped. A lump of raw meat being thrown it in the short time of five minutes the blood will be thoronghly drunk off and the mass thrown Its voracity is almost beyond belief, it devouring at one time over ten pounds of meat, though it may be deprived of all food for weeks without any apparent loss of vitality. Mr. Dunreturn voyage, growing so foul with a strong odor of real animal corruption that he was obliged to get rid of it.

How Edison Made a Bug. I wonder, asks a St. Louis Republic writer, how many of our readers ever heard the wonderful story of how Edison made a bug? It happened away back in 1880 or 1881, before the electrician had become a count and known in the most remote corners of the world. There had been two or three persons killed by the electric wires, and people were seriously contemplating some plan to get them out of the way and still keep the new wonderful white light.

Edison proposed that the wires be put in the gas-pipes; but how on earth was the pipes to be "threaded" with the electric wires? . After studying the matter one night Edison said to Edison said to fellow lectrician: "Why, see here, Johnson, I'll make a

mes necessary. "Make a bug!" exclaimed his com-

bug that will drag a wire through every foot of pipe in New York city, if

"Well, I'll make a bug," said the inventor, confidently, "that will go where I send him, and drag a wire,

A few days afterward he laid a cu-

riously constructed thing on the table in the office before time to go to work; it was his gas-gipe bug. It was c structed thus: A minute electro net, carrying behind it a fine insulated wire-pawl. Now, observe—every time the circuit was closed through the mag-net the armature was attracted, the pawl clutching the sides of a piece of gas-pipe provided for the occasion, and the magnet behind was drawn toward the armature about the sixteenth of an inch. When the circuit was opened the armature reached forward ready to take a second step. Thus at ever vanced one step, dragging the wire I hind. No doubt this description w be hard for non-experts to understan but as every he knows something
