ADVICE TO DYSPEPTICS. Common Sense and Their Own Stomachs Are to be Strictly Obeyed.

All dyspepties should avoid anything which they (not others) cannot digest, says the N. Y. Ledger. There are so many causes for and forms of dyspepsia that it is impossible to prescribe one and the same diet for all. Nothing is more disagreeable or useless than to be cautioned against eating this or that, because your neighbor "So and So" cannot eat such things. If we would all study the nature and digestion of food, and remember that air and exercise are as essential as food in promoting good health, we could easily decide upon the diet best suited to our indi-vidual needs. The diabetic should abstain from sugar and anything which is converted into sugar in digestion, such as all starch foods, sweet omelets, custards, jellies, sweet sauces, starchy

nuts, wine and liquors.

The corpulent should abstain from fat as well as sugar and starch. A diet of whole wheat, milk, vegetables. fruits and lean meat will produce only a normal amount of fatness, while an excess of acids, sweets, spices and shortening keeps the system in an un-healthful condition. Those who can digest fine flour, pastry, sugar and fats become loaded with fat, but are neither strong nor vigorous.

Thin people with weak digestion should also avoid such food, for thin people are often kept thin by the same minerals in the Grand c food which makes others fat. If they Colorado river is reported. cannot digest the starch, butter and tine flour the system is kept in a feverish, dyspeptic state; they become nervous or go into consumption for no other reason than that the life is hurned out by a diet which only feeds the fire and does not renew the tissues. Men dig their graves with their teeth; not only by drinking whisky and using

tobacco, but by eating food loaded down with inflammatory materials.

CORRALLED THE BRIDE.

The Strange Wedding of Big Charley and

"Plots for stories have not all been used, as some people assert" remarked W. A. Jenning of Wyoming in the Colonnade to a Philadelphia Press man. "A friend of mine," he continued, who lives out in the cattle country of the Big Horn basin was a witness in 1885 to one of the most remarkable weddings of which I have ever heard. At that time a few settlers had gathered in and formed the nucleus of what is now a prosperous farming region. but the sway of the cowboy was undisputed. The first wedding in that section on Owl creek was that of Big Charley and Meetutse Nance, a native sagebrush belle. The bride and groom came seventy-five miles on horseback to the squire's, and in exactly the same fashion. When within a few miles of the squire's home they met that of-ficial, surrounded by a half a dozen cowboys. Then the bride got restive and nervous, declaring that she would not marry any man on earth. But the judge, the cowboys, and groom were equal to the occasion. At a short distance stood a corral. "Take her over to the corral, boys,

and put her in,' said his honor. "As Meetutse Nance heard this or-der she made a wild break for the hills; She was quickly run down, and amid a volley of feminine sagebrush eloquence the delighted boys started on a lope for the corral. Reaching this, Nance leaped from her bronk and started like scared deer for some adjacent brush; but it was no go. However, she fought vigorously, and his honor ordered:
'Hobble her, boys.' The boys were in ecstasies. A pair of rawhide hobbles were stripped from a cavuse's neck, and their twist adjusted about the strictly and less of the estated in th sturdy ankles of the struggling bride. She was then taken into the corral and his honor, mounting the fence, bade the groom take his place by her side and catch on to her hand. This done, his logs will be floated down the North Paper log was ready, every one but the corporal could see that he had theen portance called for by the occasion, and

Troops were pouring in for the Indian war, and most of them were old vets from the Army of the Potomac. Most of these were in a great hurry to knock over an Indian, either with fist or bullet, and the half-dozen redskins about the fort had to hustle to save their bacon. One day when the sign was right, we togged Joe out in true Indian style, gave him his cue as to how he should act, and sent him down among some Pennsylvania troops. They spotted him for a sealp-raiser at once, and were hustling him around, when we appeared and demanded fair play. The leader of the hustlers was a big corporal of fistic fame, and the minute

it was proposed to get up a mill be-tween him and the Indian he jumped clear off the ground and yelled: "Whoopee! That hits me! I've been laying for an Injun. I'll give you my head if he stands through the first

Territorial Hard Times.

During the spring and summer of 1887 about 800 colonists went to Port Angeles, says the Seattle *Press*, and furing those same seasons over \$30,-300 was spent. It was a glorious big picnic. The men would work on the olony's tramways until they fancied themselves tired, when they would call a halt and stop work for the day. They held stormy meetings, at which all hands would pitch into the debate, and then after adjournment they would all attend a dance and have a gloriously good time of it. This was kept up until the funds were all spent and a big debt of about \$10,000 or more was accumulated in Seattle and Port Townsend. A cloud had gathered over their heads and they could not see the silver lining. Starvation stalked through the colony wigwams and pointed with bony fingers at the vicims he intended to carry to his home

over the snows of winter. The beef supply was cut down from a whole careass a week to a quarter, and then the beef supply was cut off altogether. The butter bill, which had been ranging as high as \$55 a week, was wiped out, and the colonists had no butter. Retrenchment was the order of the day, and it was carried to such an extent that the standard bill of fare was as follows:

Potatoes, bread, and cotton-seed oil gravy for breakfast. Bread, potatoes, and cotton-seed oil gravy for dinner, and

Cotton-seed oil gravy, potatoes, and bread for supper. Some people did not even have enough of this. Philip Meager, who has lived in Port Angeles for twentysix years, says:

Many a time have I stood on wharf and counted from forty to fifty lanterns going along the beach. They were colonists, and they carried with them each one a spade and a bucket, going after a meal of clams. They were proud, but I tell you they were hungry, too, and no mistake."

In the northwestern part of the county, late one afternoon, just before sunset, while the hunters were making their way to camp, they noticed that the rays of the sun in the tree tops of a dense grove fell on and lighted up a white object high up among the branches of a large madrona tree.

In the bright morning light had no difficulty in making out the white object to be the skeleton of a human being. Mills climbed the tree and found the skeleton to be that of quite a large man, resting across two large limbs, and tied near the thigh-bones to the same.

There was not a particle of flesh on the bones, and but few dangling rags. Near the skeleton, and lying across one of the limbs, was the frayed remains of an old coat.

Throwing the coat to the ground Mills descended, it having been decided to leave the bones where they lay in the tree, rather than throw them to the ground to be scattered by wild aninex of the Olympic Club at present,

There was nothing to indicate how the man had met his death, or why his gun should be on the ground and his port. He says he will quit rowing. skeleton in the tree. They conjectured that the hunter might have been chased by a bear and had climbed the tree, and had accidentally dropped his gun, which, striking the ground, had exploded and wounded the man mortally; that ere he died he had tied himself to the limbs of the tree to prevent the animals from de-stroying his body. This, they thought, would account for the broken stock of

the gun. A search was then made in the re-mains of the old coat, which was moldd and matted together in a mass.

An old moldy notebook was found, will be in San Francisco in a few days. In the book was pencil writing, leaves were moldy and much injured by long exposure to the weather. On the first page there was part of a name ending with the letters -ington; all the balance of the name was obliterated by

mold and stain. There was writing on the next two or three pages, but it could not be deciphered. The next few pages were comparatively clean and the writing perfectly legible. It was a record of his last days in the tree, and read:
