

A KICKING BOY'S AID TO SCIENCE

He Helps Dr. Sayre to Discover & Cur

for Locometer Ataxia. As announced in The Herald's cable dispatches, a cure for the dread disease known as locomotor ataxia has been recently put to practice in Europe. It is alleged that Dr. Motschutkowsky, of Odessa, is the discoverer of the new treatment, which aims at curing the curvature of the spinal column by sus-pending the patient.

curvature of the spinal column by sus-pending the patient. Dr. Lewis A. Sayre, of this city, is accredited with having invented the apparatus in use which was described in The Herald, whereby the patient is lifted from his feet with the object of elongating the vertebral column. I called on several eminent surgeons yesterday, with a view to obtaining their versions of the new cure of loco-motor ataxia, and failed to find one who could disclose the secret. They

motor ataxia, and failed to find one who could disclose the secret. They all acknowledged they efficacy of the treatment pursued by Charcot, admit-ting that it is due to the process of suspension by Dr. Sayre's instrument. Various theories were offered in expla-nation of the results attained, the most

lausible one being that a straight

How They Moved It. Here is another of the stories which

the people of Tournaisis, in Belgiu tell at the expense of their neighbors

the prosperous village of Vezon: At one time—the moving of a hold day—the male inhabitants of Vezon were discovered in a great state of parley and perpicrity in a field close by the village church They had come out with a strong resolve to play ball, and had discovered that the field was too narrow.

"Ah," said the burgomaster, "herd" comes Peter Corbeau, who made the mistake of studying to be a lawyer. He is wise in devices; he shall decide what we shall do."

Master Corbeau looked over the situa

tion. "There is nothing to do but to move the church," he said. So the villagers all took off their jackets and threw them down in a heap; and to determine how for they must push the church they measured the dis-tance from the heap of jackets to the church and found it to be exactly ten yards. Then they all braced t with might and main.

with might and main. Toward noon they stopped for rest and to gather strength for further push-ing. But somebody now measured the distance from the pile of jackets and discovered that happily it was not nec-essary to push any more, because the measurement showed that the church had been moved back ten yards. Then they fell to their game of ball and did not find out for some time that

and did not find out for some time that while they were hard at work pushin at the church a mischievous inhabitant of Tournasis, who happened to pass, had moved back the pile of jackets!-Youth's Companion.

He Kept an Eye on the Plate.

A special collection was announced for the day in a Scotch church, but as the purse strings of the old farmers were known to be pretty tightly tied the collection was to be taken up in the old fashioned ladle after the delivery of a stirring discourse on giving excellencies of the scheme in q About the middle of the serm minister, happening to look out of the window, spied a cow wading about in the adjoining cornfield. Turning to-ward one of the side seats, where sat the owner of the corn, and presumably of the cow also, he stopped his sermon and said: "Rab Stevieson, there's a coo wast yonder frae the kirk up to the

horns amang yer corn. Ye'd better look after't at once." Up sprang Rab, seized his long haired lum hat and stick, and made for the door, while the minister calmly took up the thread of his discourse. As Rat reached the door the minister sto again and sang out: "By the by, Rab, ye'll better jist leave the collection wi' the beadle in case you dinna get back again." It is confidently stated that the ladle profited more by Rab on that occasion than it would otherwise have cone, and no wonder. Few, unl Germany. Within two months Prince Albert, of the sovereign house of Wal-hardihood to pass without drawing the deck; Prince Charles, of the reigning family of Liechtenstein, and Prince family of Liechtenstein, and Prince Trautmannsdorff have all three been

Wildcat hunting is very exciting, especially for the cat. Once in Mendocino county, Cal., I was enjoyi_g a few days' quail shooting at a farmhouse where was a large and sociable dog. His father was a setter and his mother a built terrier, and the combination of in-herited qualities made this dog peculiar. If I took him hunting with me the setter in-stinct prompted him to rush around through the brush and scare off every bird within half a mile, and if I slipped away without letting him know, the faithful bull terrier quality would tend to come out in company with a large piece of my leg when I returned home. SAFE WAY TO CARRY & GUN. One evening I was returning from a h with that dog. He had enjoyed the hunt so much that not a quail had remained in the county. Suddenly he plunged forward; there was a quick rush and a scrabble, and I beheld a huge wildcat poised on the limb of a small tree just out of the dog's reach. Emotion swelled visibly in the cat's tail and frenzy ruled the dog. I stepped back a rod, extracted most of the shot from one barrel and sprink-led the cat in the region of the jumpers. He came out of the tree and came suddenly, and next minute there was a whirlwind of-fur and agony under that tree, and mingled sounds informed me that both the cat and the dog had ascertained that something was wrong. There was a combination of clawing and yowling, splitting and snapping, re-volving and rough and tumble excitement which lasted about a minute, and then a peaceful hush succeeded, during which the sephyrs blew away the cloud of dust and hair and disclosed what was left of the dog lying serenely at peace with the trivial remuch that not a quail had

Away from the covert time is no object, and the poacher who is content with a brace of birds at a time usually with a brace of birds at a time usually gets the most in the end. The poacher knows that no bird is more pugnacious than the pheasant, and out of this trait he makes capital. He takes a trained game cock under his arm, fit-ted with spurs, the latter as sharp as needles. Upon the former's crowing, one or more cock pheasants immedi-ately respond and advance to meet the adversary. A single blow suffices to lay low the pride of the pheasant, and in this way half a dozen birds may often be taken, while the poacher's representative remains unhurt. —The

A Sliver Wagon Road

"You may talk about nickel plated railroads," said vice president L.T. Stanley of Walnut street, "but what do you think of a solid silver wagon declared insolvent debtors and placed "unter curatelle," and now Prince road? The Horseshoe mine, in Colo-rado, has one, although when it was built they didn't know it would pan The potato blight has made its appear-ance in Sweden, and the outlook for the crop is very discouraging. In certain parishes the priests report that a famine is expected. The English Royal Niger Company has prohibited the importation or sale of intoxicating liquors in its African terri-tory north of the seventh parallel of north latitude. the rock down. One day they had a heavy rainstorm, and when things got dry again after the rain wind blew the dust off the road, and all through The Government of Uruguay will probably raise the custom duties 10 per cent., making them payable in gold, and will devote the fund thus raised to the rethe dust off the road, and way, they the road bed, every which way, they the road bed, every which way, they the road bed, every which way, they could see big streaks of silver. Well, maybe they didn't collar on to the rest of that loose rock that lay around those shafts! They sent away a lot of it to be assayed, and when the report came back they found that their road bed was worth \$200 a ton. It was a little expensive to drive over, but they had to have the road, and they've got it yet, if their mines have held out." bankruptcy court and resulted in his being placed "unter curatelle." The Philadelphia Press.

The Manufacture of Celluloid.

Most celluloid is made in France. A roll of paper is stowly unwound and petual minority, and the person on whom it is imposed is not only declared at the same time is saturated with a mixture of five parts of sulphuric and two parts of nitric acid, which falls incapable of managing his own affairs, upon the paper in fine spray. This changes the cellulose of the paper into pyroxyline or gun cotton. The excess of the acid having been expelled by pressure, the paper is washed with plenty of water until all traces of acid but is practically outlawed and dein point of law, and from the legal point of view he is nobody-as unsubhave been removed. It is then reduced to pulp and passes on to the bleaching trough. It is this gun cot-ton which gives it its explosive nature. stantial as the family ghost and as irresponsible as a babe unborn. Most of the water having been got rid of by means of a strainer, it is mixed Prince Trautmannsdorff was the

with from 20 to 40 per cent. of its weight in camphor; a second mixture and grinding follows. This pulp is spread out in thin slabs, which are squeezed in a hydraulic press until they are as dry as chips. Then they are rolled in heated rollers and come took a downward instead of an up-
