The beaver is too sharp for that, but is

Dat's de time for sittin' an' tonsiln' yo' toes; But soon ez de rain f'um de May cloud po's' Ad' you hyer in de low groun' de plow-whip easily caught when the trapper has learned how.

It is an impression with many that the beaver uses his broad, flat tail as a trowel and to carry mud, etc., to build heir dams, but such is not the case. They use their short fore legs and paws to carry up mud and grass from the bottom of the lakes they inhabit, and make piles of mud and grass, such as settles to the bottom ou the logs that lay out from the shores. The rendy had it. writer was never able to learn the object of this, but presumes they found

me article of food in it. Their food consists, mostly, of the bark of the willow and cottonwood, which they cut down and cut into sticks about four feet long, and, by some process known only to the beaver himself, they will sink to the bottom of the lake or bayou, and there they re-main until needed for use. They also will cut down the white ash. The writer of this measured a white ash that was nearly cut down that meas-

ured twenty inches in diameter. What their object was in this is indefigite, as it was not near any dam and could not be used for any purpose except for food. The beaver makes an interesting pet. They are easily tamed. are entirely harmless, and have a very decided propensity to build dams. If they can get the material they will dam at the least provocation, or rather opportunity. There is no danger of their being worried by dogs, as one old beaver, however peacesble, would make a buildog pale with envy at the way he can use those cutting teeth when the occasion requires.

The writer expects to pass the winter in a beaver country and try to bring home a few young beaver in the shots and can send their spears through

spring In localities where they are not hunted or trapped there would be no trouble to get a litter of young ones, "Ah! but you will some day be but such localities are rather scarce at present unless one goes well up toward the Blackfoot reservation, and there are few hunters that care about enduring the hardships of a winter in that locality.

OBEDIENCE TO THE DEATH.

A Delectable Anecdots of Napoleon, the Czar, and the Prussian King.

The editor of Gil Blas, in his last sue, vouches for the truth of this story: Napoleon I. was entertaining the Czar Alexander and the Prussian King at breakfast in Tilsit, when the

conversation turned on loyalty. "My soldiers obey me blindly," said the Czar. "And mine are anxious to die for

little we figured it out. The lion, who me," added Napoleon. was just learning to kill his own game, At the suggestion of the Prussian had been perched ou the ledge. As the zebra came along he sprang, but over-King a test of devotion was agreed upon. The royal party were breakfast-ing in the fifth story of a building that faced a paved street. Each member was to call in one of his soldiers and ommand him to jump from the wiudow. Napoleou made the first test.

"Call the Gardiste Marcau," he commanded, and Marcau appeared. "Will you obey any order I give

command from that window. Have you the pluck to do the same?" "Is it for the Fatherland?" "No."

"Then I refuse to do it." Gil Blas thinks this anecdote contains a fine lesson for German army officers of the present.

Growth of the Finger Nails.

Ordinarily the nails will grow about three times their length in a year, and to preserve their symmetry they should be trimmed at least twice a week. There is no better way to do this than with a pair of sharp scissors, and the cutting will be easiest and best done if following a bathing of the hands in warm water, which will have softened the tissue. The nail should be cut with such a curve that it will protect the entire end of the finger alike; it should not be so close as to look clumped, nor ing above the range of a spear-but should it be so long as to invite breakalso spears and stones, of which a store age. It is to be feared that many an anxious mother cuts her children's enemies from above. These tree houses nails "so short that the dirt cannot get under them, and does not think that in her laudable desire for neatness she The natives, as a rule, are wonderis beginning at the wrong end of form and really sowing the seeds of untidiness. They do not stand for ability, and acts like a straw chopper, which for public service, for social importance, cuts them into single matches. The machine eats 150 bands at the same for large possessions; but, on the contime, and a mechanical device pushes

zens.

them forward the thickness of a match at each stroke of the cutter. This little machine with its one sharp kuife can cut over 10,000,000 matches a day. From the cutting room the splints are taken to the dry room where they are placed in revolving drums, which absorb all the moisture the sp ints may contain. They are then prepared for dipping process, which is a very important operation, as each solint must have sufficient space to be fully coated, and yet not placed so close to others as to cause the mixture to clot the heads of the other splints. To do this they are placed under an ingeniously constructed machine which seems, to work

with almost human intelligence, and are caught up and placed closely, but at regular intervals, in a dipping frame. These frames contain forty-four movable laths, and between each lath the

nachine places, with clockwork reguat each machine can place over one million of splints in the frame per day. The dipping vat is a stove of masoury. which contains three square pans. The first pan is for heating the splints so they will absorb the mixture, the secoud contains molton paraffine in which the points are dipped, and in the third always suffer more or less from constithey are coated with igniting compo- pati cess the matches are dried while still the packing-room, where they are put into boxes by hand .- Woodworker.

Gen. Lee's Daughter.

A trait that would have distinguished cometiness and perfection. - Good Miss Mary Lee, the youngest daughter of Gen. R. E. Lee, among politicians,

is her wooderful memory for faces and names. Even a casual acquaintance met year before is not forgotten, and, Mr. C. C. Conningham has in his meeting him several years afterward, possession a round pebble which was she at once speaks his hame and re-

taken out of a hailstone at Portage, calls all the details of their former Wis., just after the great hall-storm meeting. Miss Lee came from Egypt had passed over that place. A friend to witness the unveiling of the statue ald, of Mr. Cunningham, who resides in of her father. She has spent the last the city and is engaged in the drug five years in Portugal, France, Russia, business there, in a letter to that gen- and the island of Madeira. Miss Lee tleman, states that during the storm arrived in New York entirely unanabout five bushels of hallstones lodged nounced to her many friends here, who in his show windows, and fully four- would have gone in troops to the dock tifths of them contained these little to meet her, instead of allowing her to pebbles. The one in the possession of Mr. Cunningham weighs one-half sunce, is almost round, and has the appearance of being at one time away all her wraps before landing, washed by the waves of the lakes or thereby contracting a severe cold. She some river, and it is supposed that it is a tall woman of distinguished pres-was picked up by the tornado and carin some bits of iron shafting. The ried to a very high altitude, where the charm of manner and brilliancy of steamer is not a beauty, but it carries ice formed around it in the manner in conversation which are nature's best gifts to her sex. Miss Lee will remain

in America, visiting friends in the

star and take a name that had a mean-ing as used by the representatives of ancient families, or the men who had give an olo 'v change for a quarter in pennies, t ito accept a Canadian dime from a .ashionably dressed young made themselves illustrious by their woman, and passed out without so much as a glance in the direction of It appears to be a peculiarly Ameri-an weakness. The French republicans of the earlier period thought the term

quite like a man whose sole thought was to find the editorial column or the funny paragraphs. When the three arrived at Washington street they alighted and sought the
