### LEBANON Meat Market

ED. KELLENBERGER, Prop.

FRESH & SALTED BEEF, PORK, MUTTON, SAUSAGE, BOLOGNA & HAM.

BACON AT 12 CENTS A POUND ON HAND

### General News.

During the last ten days of April one woman was killed and mutilated in Jack-the-Ripper style in New York and another in Benthon, Germany. Work has begun on a tunnel to connect Detroit, Mich., with Windsor, Ont. The president of the Italian chamber of commerce in New York has interviewed the Italian cabinet in Rome and has been assured that Italy never thought of sending war ships to America on account of the New Orleans. The Italian prime minister, has notified the Italian cabinet in Rome of the controversy about the New Orleans affair, and adds: "The present dispatch is addressed to you exclusively, but to the federal government. Your duties henceforward are restricted solely to dealing with current business."

### UNITED STATES.

The print works of the country have combined to shut down to force prices. The chief of ordnance of the war department says that he intends to have large quantities of powder for the new gun manufactured on the Pacific coast, and he also expressed a desire to have a gun-cotton factory established on the Pacific coast. "Old Hutch," the Chicago millionaire grain speculator, has failed, but nobody loses anything by him. The tin plate men have organized a trust. The government exacts a duty of 25 per cent on Mexican lottery tickets brought into this country. The New Orleans grand jury has indicted one of the Mafia murderers' attorneys and another man for bribing jurors. Many of the negroes who rushed into Oklahoma last year are starving. The Seward case in the federal supreme court has been postponed until the second Monday in the October term. The jury which tried Plenty Horse, the Indian murderer of Lieutenant Casey, disagreed. Ben Butler, acting as counsel for perjury in the United States district court at Boston in a treason case, offended Judge Carpenter in the charges he made in a motion for a new trial and Carpenter had him ejected. A resolution was introduced in the state legislature calling on the attorney-general to interfere, as the rights of the state are violated in the federal court. Walter S. Maxwell of California has been made chief of the horticultural division of the world's fair. Del Rio, Texas, has a Jack-the-Ripper murder case. A Mexican woman was butchered in the usual style and the words "Fresh Meat for Sale" were written on the wall with her blood. There is no clew to the murderer. Fat cows, sheep, horses and corn and oats high and meat has advanced 33 per cent throughout the east. At Chicago, where 6500 cattle are usually consumed daily, only 4000 a day are obtainable. The number of seals to be taken in Alaskan waters this year has been limited to 60,000. Edwin M. Grant, western agent for B. Manville & Co., the New Haven carriage manufacturing firm, has been arrested for embezzling \$20,000 from \$25,000. The Ohio Sunday-closing law for saloons has been sustained by the courts. A bill providing for the choice of a federal elector by congressional districts has passed the Michigan legislature. Philip J. Paterno, a naturalized citizen of the United States, has declared to the police for protection, declaring that he is in danger of being murdered by the Mafia. Somebody gave a stick of dynamite to three little boys, John and Milton Turner and Charles Wilson, at Martin's Ferry, Va., May 2, and while they were playing with it it exploded and two were fatally mangled and two were badly lacerated. The Etina mine property at Ironton, O., including 17,000 acres of mineral lands, was sold by the sheriff to satisfy a mortgage for \$266,000.

### FOREIGN.

All Jews have been ordered out of St. Petersburg forthwith, the same as at Moscow. Tamases, at one time the German's puppet king of Samoa, is dead. Baron Hirsch proposes to give \$1,500,000 toward colonizing Jews from Russia in South America and Australia. Paraguay is shaken with a revolution. Manipur, after the magazine was exploded and everything of value removed, was evacuated. The British when they took possession found the heads of Major Quinlan and other Englishmen. The English parliament has adopted an act reducing the number of taverns to be licensed and compensating those closed for the loss of their business. The Chilean rebels have captured the government cruisers Argentine and Almirante Lynch were so badly damaged in the fight in which they sunk the British Encelada that they are laid up for repairs. The report that they sank the Hunscar at the same time proves unfounded. Persons of Peru where rain is hardly ever seen were visited with a terrific rainstorm between March 19 and March 22 and millions of dollars' worth of damage done. Grand Duke Nicholas, the czar's uncle, is dead. Emin Pasha has gone after the ivory abnash at Kilbo. President named Gillet has been arrested for the murder of the Serbian minister of finance, and confesses the crime. The Chilean rebels have taken Coquimbo. Turkey insists that the treaty provision that Russian warships shall not pass the Dardanelles shall not be evaded by their carrying a mercantile flag and has proposed a second one. Russia threatens war and Turkey replies that all the European powers are pledged to help her in defense of her rights under the treaty. Rivas & Palmer's shipsyards at Bilbao have been destroyed by an incendiary fire.

### Current News.

The Detroit street-car strike ended in an agreement to arbitrate. The Michigan car works at Detroit have closed down indefinitely on account of a strike for higher wages. The miners' strikes have caused a coal famine in Germany and the foundries in the Selg valley and the steel works along the Rhine have closed down for want of fuel. The Pennsylvania coke-makers are fast filling the places of the strikers with new men. The Indianapolis saloon-keepers formed a union to raise the price of beer and the stonecutters' union of that city has placed a boycott, with a \$10 fine attached, on all union saloons. The printers in Rome struck April 29 and none of the papers came out the next day. The May day demonstrations at Lyons, France, were so riotous and the police so covered by the mob that troops had to be called out and several conflicts occurred, in which ten policemen and soldiers were injured. Sixty rioters were arrested. At Rome there was rioting and two soldiers were killed and one anarchist was shot dead by the soldiers and several of the rioters were injured. Riots were hurled on the soldiers from houses and the soldiers stormed the houses from which stones came. At Paris and Berlin quiet was preserved by the police. At Clieby, France, four policemen were killed in a fight with anarchists, who used revolvers freely. Several persons were injured in a conflict between policemen and a crowd of roughs at Marseilles. The threatened general strike of workmen throughout Europe did not take place. In the United States there was nothing like a general eight-hour strike on May day. The Pennsylvania coke strike is petering out and the ovens are starting up with non-union men. The strikers there were mostly foreign contract laborers who had been brought into the country in violation of the federal law. At Ashland, Pa., the miners are at work as usual. The railroad miners in the Pittsburgh district, about 6000, quit work because their contract had expired and a new one had not been signed, but they did not demand an eight-hour day. The same thing occurred at Wheeling, W. Va. The carpenters at Pittsburgh struck for 35 cents an hour, and succeeded in getting it. The slate roofers joined them. The general strike of Pennsylvania bituminous coal miners has been declared off without being begun. In Clay county, Ind., 2000 miners quit. The Ohio miners accepted a nine-hour day. Throughout Iowa the miners struck for an eight-hour day and burned one or two shaft-houses and tried to burn more. At Portland, New York, Cleveland, Des Moines, St. Louis, Chattanooga and Memphis there were strikes in the building trades, nearly all of them for eight hours. In New Orleans all the building trades are paralyzed by a strike against the employment of non-union men. In San Francisco the painters and decorators struck for an eight-hour day. At Tourmies, France, stones were thrown at the troops who had been called to quell rioting by strikers May 3, and the troops fired on the mob, killing eight men, six women and several children and wounding twenty people. Great excitement was caused throughout France by the incident and the fall of the ministry is said to be one of the possible results. Owing to the fact that the struggle in the coke fields will employ all its resources the executive board of the united miners of America abandoned the proposed May-day eight-hour strike.

### Farm Notes.

The codlin moth. The codlin moth is attracting a good deal of attention in California just now. Not only has its vigorous destruction become necessary to the securing of a crop of apples in most of the apple growing districts, but it has also attacked the pear and quince to some extent. The increase of the pest all over the United States for the last few years has been very rapid, and it is now acknowledged that spraying at the proper time with arsenic solutions is almost necessary to the securing of a crop. The first brood of the moth puts in an appearance as soon as the blossoms begin to fall and the fruit is formed. This is usually from the middle to the latter part of April or first of May. The female deposits her eggs in the clefts of the fruit, and in a week the egg is hatched and the young worm begins to eat to the core of the fruit. Three or four weeks after the time of hatching, when the larva is nearly mature, the body assumes a pinkish or flesh-colored tint, being slightly more colored on the back. It then begins to burrow its way out of the fruit and descends by a spun thread to the ground or some place of refuge. The 2,000,000 active German or moral and spiritual law, whereby to meet and master that belief in physical laws which breeds disease. France's Willard, president of the Woman's Christian Temperance Union, in writing on "Home Influence" or "Home Education" says: "It would be easier to tell what were not, than what have been, formative influences. As a jagged bit of rock is wrought upon by the many waves and wavelets of the sea, until its angularity disappears, and it takes on something of a rounded and rounded self along the beach in harmonious combination with the rest of the pebbles, so it is with human life; all influences combine to make it what it is." She gives as her opinion that "father and mother count more in the training of the child than all other influences. They are the real university. They are the great world and what they do not plant in the nature and nurture of the child the world will never see."

In criticism of her remark that "what the father and mother do not implant in the nature and nurture of the child the world will never see," I would say that the rule is proved exceptional when we remember cases of children maturing from homes where they have been taught habits of temperance by example as well as precept, becoming hope-less drunkards. The same is proved in regard to religious education; we all doubtless hear of ministers' children who have been brought up in the nurture and admonition of the Lord, but who depart severely in the opposite direction. In the case of the son who was the outcome of training in the reverse it may be suggested that some remote grandfather might be responsible, the appetite being inherited although perhaps skipping a generation or two, as physicians say, but it manages to be evenly distributed. If only one spraying is to be done early in the season a little soap added will make the Paris green stick more securely. If a rain should occur soon after spraying, the operation should be repeated very soon after, otherwise no great amount of benefit will result. If the spraying is done effectually and thoroughly from 75 to 90 per cent of the worms will be destroyed. Great care should be taken to destroy all apples which are taken to the ground and to keep the trees clean of loose bark and the orchards free from piles of lumber, trash or anything that may furnish a hiding place for the worms which escape. The last brood will spin their cocoons in some such hiding place and will remain dormant until spring, when the moths will issue in due time ready to destroy another crop.—California Fruit Grower.

### LABOR STRIKES.

The Detroit street-car strike ended in an agreement to arbitrate. The Michigan car works at Detroit have closed down indefinitely on account of a strike for higher wages. The miners' strikes have caused a coal famine in Germany and the foundries in the Selg valley and the steel works along the Rhine have closed down for want of fuel. The Pennsylvania coke-makers are fast filling the places of the strikers with new men. The Indianapolis saloon-keepers formed a union to raise the price of beer and the stonecutters' union of that city has placed a boycott, with a \$10 fine attached, on all union saloons. The printers in Rome struck April 29 and none of the papers came out the next day. The May day demonstrations at Lyons, France, were so riotous and the police so covered by the mob that troops had to be called out and several conflicts occurred, in which ten policemen and soldiers were injured. Sixty rioters were arrested. At Rome there was rioting and two soldiers were killed and one anarchist was shot dead by the soldiers and several of the rioters were injured. Riots were hurled on the soldiers from houses and the soldiers stormed the houses from which stones came. At Paris and Berlin quiet was preserved by the police. At Clieby, France, four policemen were killed in a fight with anarchists, who used revolvers freely. Several persons were injured in a conflict between policemen and a crowd of roughs at Marseilles. The threatened general strike of workmen throughout Europe did not take place. In the United States there was nothing like a general eight-hour strike on May day. The Pennsylvania coke strike is petering out and the ovens are starting up with non-union men. The strikers there were mostly foreign contract laborers who had been brought into the country in violation of the federal law. At Ashland, Pa., the miners are at work as usual. The railroad miners in the Pittsburgh district, about 6000, quit work because their contract had expired and a new one had not been signed, but they did not demand an eight-hour day. The same thing occurred at Wheeling, W. Va. The carpenters at Pittsburgh struck for 35 cents an hour, and succeeded in getting it. The slate roofers joined them. The general strike of Pennsylvania bituminous coal miners has been declared off without being begun. In Clay county, Ind., 2000 miners quit. The Ohio miners accepted a nine-hour day. Throughout Iowa the miners struck for an eight-hour day and burned one or two shaft-houses and tried to burn more. At Portland, New York, Cleveland, Des Moines, St. Louis, Chattanooga and Memphis there were strikes in the building trades, nearly all of them for eight hours. In New Orleans all the building trades are paralyzed by a strike against the employment of non-union men. In San Francisco the painters and decorators struck for an eight-hour day. At Tourmies, France, stones were thrown at the troops who had been called to quell rioting by strikers May 3, and the troops fired on the mob, killing eight men, six women and several children and wounding twenty people. Great excitement was caused throughout France by the incident and the fall of the ministry is said to be one of the possible results. Owing to the fact that the struggle in the coke fields will employ all its resources the executive board of the united miners of America abandoned the proposed May-day eight-hour strike.
