

Lebanon Express---Supplement.

FRIDAY, AUGUST 21 1891,

Lousy Hops.

A correspondent to the Eugene Journal takes a gloomy view of the situation. He says the hop louse has already begun working on the hops and growers tell us that they have found hops turning black and rotting from the effects of the louse. If such is the case the chances for the hop growers are very poor this year. Last year the louse did not begin working on the hops until about picking time and then a large quantity of hops were spoiled before they could be saved, and as the louse has already begun working on the hops this year the chances are that the hops will be spoiled before they are ready to pick. Mr. Jas. Ebbert tells us that he found hop lice away up the McKenzie on a lone hop vine twenty-five or thirty miles from any hop yard. He also says he has found them on the leaves of maple trees. If the hop louse has come to stay the hops must go.

State Treasurer Meisner has just finished the distribution of the interst on the common school land. Douglas county reports 4,493 children of school age and gets \$6,514.85; Coos gets \$4,957.59; Jackson \$9,024.75; Josephine \$2,521.55. This shows Douglas county still at the head of the Southern Oregon column.—Roseburg Review.

Roadmaster Lawson, who was up the road last Sunday, reports that the railroad folks are contending with a big slide about two miles and a half North of West Fork, that keeps 100 men busy to prevent it from covering the track. There are several acres of earth that are inclined to slide and of unknown depth. However, there is not much danger of the trains being delayed by it, but as 100 men is all that can be worked at a time, it is giving them somewhat of a steady job.—Ashland Tidings.

Sodaville Steam Motor.

A member of the Board of Directors of the Sodaville Motor Line company informs us that Mr. Cheadle is willing to sign deeds to right-of-way, which will remove every hinderance; and that work will be begun in thirty days towards building between Lebanon and Sodaville.

This news is of no little concern to the people of Lebanon and Sodaville, for the building of the line will, as we have before had occasion to observe, enhance real estate values, encourage the building of finer houses and add hundreds of people to the population. We rejoice with our Sodaville neighbors in the fact that that town already far famed as a health resort, becoming so easy of access will be the most popular pleasure and health finding town of this valley, if not in Oregon. No doubt the town will grow much faster than heretofore and we hope it may.

The Oregonian says the bitter fight among two sets of capitalists in the East for the possession of the Oregon Pacific railroad indicates that it is deemed valuable, notwithstanding the assertion that the 140 miles of completed road has cost as much as the entire 690 miles of road was estimated to cost. If this contest for ownership could only be settled at once, one way or the other, the road would be pushed to completion at once. The heaviest and therefore the most expensive portion of the road, in proportion to the mileage, is already completed.

The advertisement of the Collegiate Institute of Albany makes its first appearance in today's issue of the Express. This is one of the leading educational Institutes of Oregon, and the people of all lands ought to feel local pride sufficient to patronize it in preference to sending their boys and girls elsewhere.
