The hop issue is a detestable title case. He is making his ravages in the hop fields of the valley and is doing considerable damage. The alarming extent to which he is multiplying and replenishing the earth is not at all flattering to the hop prospects of the country. Cannot a mode be discovered to prevent his inroads before it is too late?

While the elements are playing thunder and lightning in the eastern states, we of the Willamette valley are sheltered by the dome of a peaceful sky and the harvest proceeds unimpeded by the fury of the storm cloud. Oregon is in all verity a secondary paradise, rich with the spoils of fruitful seasons that never know what a failure is.

They have been trying several months to elect a new night watchman at Corvallis. The Times tries to settle the matter as follows: With all the burglarizing that has been done on Main street, it is strange that the officers have never made a detection. In the vicinity of Salem several hop growers have commenced picking, and by the first of next week hop picking will be in full blast. In spite of ice there will be the average crop. One grower flooded the lice all off the vines with water, and then buried them. This was done several weeks ago and there are scarcely any lice to be found on his vines. Another had Chinamen to pull all the leaves off the vines early in the season. He did this on thirty acres and they are now ready for picking. He has but a few lice. It is the cleanest yard in the county. Where the lice are, in picking, growers find considerable loss.

A H. Sieffried, one representative, of the Chicago News, delivered a most able address before the National Editorial Association recently in session at St. Paul. In course of his remarks he said, "The French and inexperienced a type of paper has so much space in a newspaper and fills it to the edge with extravagant parts of his wares, written in superfluous and printed in almost microscopic type. Few read his advertisements, and nobody buys his goods. Then he is angry and cries out in his mind with that advertising does not pay, or other idiosyncy to that effect. But the wise and experienced advertiser, buying the same amount of space, divides the larger portion of it to clearly written, clearly printed modest and reasonable statement of the merits of his goods—such a statement as he is willing to stand by. For that man's advertising pays."
