The Northern Pacific Railway Company has advanced a claim for all odd-numbered sections of land in the ceded portion of the Couer d'Alene Indian reservation, which falls within the limits of its grant. The government paid the Indians \$500,000 for these lands and \$150,000 as a quit-claim for all right the Indians claimed in the lands in Washington State. Of these latter the railroad company got every odd-numbered section. It is not probable that the claim will be considered, as the terms of all grants say that lands in a state of reservation are excepted from the terms of a grant.

At San Francisco the Arbitration Committee of the Water Front Federation called upon Goodall, Perkins & Co. to arrange for a settlement of the difficulty with the striking stevedores. According to members of the committee the firm refused to concede the advance in wages asked, but agreed to take the strikers back at the old rates of 30 cents per hour and 40 cents overtime. This is said to have been acceded to by Mr. Center of the Pacific Mail Company also. The Stevedores' Union will meet to consider the proposition. The employees, however, assert that they have not agreed to discharge the non-union men whom they have employed on the dock and will give the strikers employment only as they are opening for them.

I am sure the people will understand that they cannot go upon these lands until all conditions with the Indians are complied with and the proclamation issued. The census bureau has issued a bulletin on the assessed valuation of the real and personal property of the several States and Territories. The bulletin shows that the assessed value of all property has increased in the last decade \$7,344,587,261. Illinois shows an apparent decrease of \$59,200,000, because the State Board of Equalization declares the assessed value to be at 80 per cent., and in 1890 only 25 per cent. of the true value. Among the States showing increase are the following: California, \$488,524,000; Idaho, \$19,140,000; Montana, \$87,873,000; Nevada, \$4,625,000; Utah, \$79,953,000; Washington, \$100,985,000; Oregon, \$113,504,000. William H. Williams, who went to Seal Island three months ago as a special agent of the government, has just returned to Washington. He said that despite the presence of nearly a dozen American and English men-of-war in and around Behring Sea illicit sealing was being carried on extensively. Prevailing fogs in the sea made it easy for fast-sailing schooners to elude pursuit, and Williams is of the opinion that the illegal catch for the present season will number 20,000 seals. Of the 7,500 skins allowed privilege holders this year 4,300 caught by natives for food have already passed into the hands of the North American Commercial Company. This leaves only 1,200 seals to be captured between now and May 1 of next year; and, as that number will not supply the Aleuts on the Islands of St. Paul and St. George with food, the Commercial Company will have to keep the natives from starving. Williams is of the opinion that a couple of years' protection to seals is necessary in order to keep them from being exterminated.
