The Popular Science Monthly says: "When everyone is governed by his noblest impulses, in place of selfish instincts, poverty and misery will soon disappear."

There will be a great deal of criticism of the incoming legislature, and its members will be called all sorts of fools. We would just like space to remark, however, that all the fools are not in the legislature.—Statesman.

The charter of the Louisiana state lottery on Jan. 1, 1894. The lottery will then be removed to the republic of Honduras from which the company have been granted a 20 year charter. The city of Tegucigalpa will be headquarters.

The proposed amendment to the constitution of the United States providing for the election of U. S. senators has passed the lower house of congress. We trust it may pass the senate. Then the legislatures of the several states would have a whack at it.

One of the best testimonials to Blaine's popularity was the admiration existing for him by men of both parties. He fully deserved the name of the magnetic states man. Only such a character receive resolutions of regard and sympathy from the national convention of an opposite party.

Associate justice of the supreme court, E. C. Q. Lamar, died at Macon, Ga., Monday night. Death sudden in the extreme, for since noon he appeared to be gaining his health. About 8 o'clock in the evening he was seized with a violent pain in the heart and died in a few minutes. He was 65 years of age.

Judge Fullerton, who was present at the meeting of the employees of the Oregon Pacific held in Albany last week is credited with saying: "I will see to it that you get your money. If the road is not sold on the 8th of March, I will order a new sale for whatever it will bring, if it is only enough to pay you your money." Good for the Judge.

Cooper's new road law does away with the labor tax which yields no good results in roads, but proposes a tax of four mills instead. Grading machines are provided to do the work before the ground gets hard and such a machine will do as much road work as thirty or forty teams with plows and scrapers. The roads are to be uniform in plan, built with gravel with culverts of stone where practicable. It is being opposed on the ground that the tax is already too high, and if the supervisors would do their duty we would have good roads. We would not. We need better laws.—Ex.

The past week is the roughest weather we have experienced for some time in the Willamette Valley. The ground has been covered with snow now for just a week. It has melted a little every day, but there has not been a day out of the week but what it has snowed. We think the snow has been about twelve inches deep on the level. We have heard a great many eastern people complaining about this weather, but they certainly don't stop to think the cold is not confined to this country. While the thermometer registers 22 degrees above zero, which is the lowest that it was at this place at any time, the temperature in Minnesota is 48 degrees below zero, and the average temperature in Dakota and Montana was 38 degrees below zero and in eastern Oregon it has been about zero, while at Portland it was 12 degrees above. In Spokane and Walla Walla it has been 8 degrees below. So far the trains have been running on time, or nearly so. Stock is said to begin to suffer in eastern Oregon. Most of the stockmen have been feeding for thirty days, and are now out of feed, and stock is dying off fast, especially sheep.

Monarchical government in Hawaii has been overthrown. On Jan. 15, the queen endeavored to force her cabinet to sign a new constitution, but they rebelled. A committee of safety was formed Sunday, and on Monday a provisional government was established, the monarch abrogated and the queen and cabinet forced to accept it. A commission was sent to Washington, and U. S. troops are in charge. The revolution was almost bloodless. S. B. Dale was elected governor of Hawaii. The object is to join the Union as a territory to the United States.
