Prof. J. W. Johnson, who has held the position of president of the State university at Eugene since 1876, has resigned, to take effect at the end of the school year, October 1, 1893. His successor has not yet been selected. He will be retained in the faculty as professor of languages.

Every country editor is acquainted with the fellow who takes papers as long as he can get them on credit, and then attempts to pay for them by writing on a postal card, "stop my paper." His meanness would make Judas Iscariot ashamed to be in his company.—Newspaper Man.

To encourage cash trade, W. C. Davis, of Albany, has adopted a new system of cash discount coupons, and is giving his customers, in connection therewith, some really elegant sets of triple-plated silver. It will be to your interest to call on Mr. Davis before making your spring purchases.

Some newspaper man started the report that "a Spokane girl kneads bread with her gloves on," whereupon another practical editor observed: Well, so do we; we also need it with our shoes on, with our pants on, and in fact with all our clothes on—need it doggone bad, and if our delinquents would pay up we would buy a whole bake-shop.—Ex.

Receiver Hadley of the Oregon Pacific states that he expects, in a few days to pay all employes on the road their wages for the month of March. He further expects soon to have ready for payment on back wages, the \$50,000 to be furnished by the eastern bondholders, which was the consideration on which the last adjournment of sale was granted.

The question of licensing gambling is before the Astoria city council under the new charter, which was evidently smuggled through the legislature, as the state laws declare gambling to be a criminal offense, it is not to be presumed that a legislative body would knowingly pass a charter permitting the license of that declared a crime. It is thought that the council will pass an ordinance placing the license fee at \$20,000 per annum.—Ex.

The poor Esquimaux who have been brought to the world's fair, to represent the frigid north, are complaining already because their manager makes them wear furs when it is such warm weather. If their complaints begin to float upon the still frosty air of March and April, what will be the howls that will arise when the real warm weather of August and September takes hold of them. The oleaginous effluvia will probably induce the sight-seers to keep at a distance.—Ex.

A gentleman by the name of Newmire, living on the upper Sinalaw, is afflicted with a peculiar trouble which has greatly excited the neighborhood. A couple of weeks ago the trouble showed itself, and he would be taken with a spasm, which would terminate by his barking like a dog. Dr. Paine went out to see him Sunday and prescribed for him and thinks he will soon be over it. The trouble is what is called hysters epilepsy. The neighbors of the man thought he had been bitten by a mad dog and were afraid of him.—Register.

The common and much despised, but odoriferous, dog-fennel is not indigenous to Oregon soil. Its presence in the Yamhill valley is accounted for, says the Sheridan Sun, by the fact of a farmer's receiving a package of the seeds from a friend in the East, who insist that it would produce "beautiful flowers." The seed was sparingly divided around the neighborhood and a grand crop of dog-fennel was the result, much to the disgust of the ladies. And that is how the onery dog-fennel got its start in Yamhill.

There occurred a queer freak of the fire fiend near Mt. Scott says the Oregon City Enterprise, when the residence of John Matz, at Tobasco, was partially destroyed by fire Saturday evening during the absence of the family. It appears that a lamp must have exploded but the fire did not get on the outside of the house. The rooms were tight and there was no draught. All the furniture in the room was burned or charred and the fire extinguished itself. When Mr. Matz returned and opened the door he found the inside of his house a blackened ruin. His damage is several hundred dollars.

The Southern Oregon mines are attracting so much attention that the Southern Pacific is selling round trip tickets to them from all points. The fact is Southern Oregon is attracting a great deal of attention and advancing rapidly, not only on account of her undeveloped mineral wealth, but also because of her rich soil and beautiful and healthful climate—having enough of the Webfoot dampness to insure good crops, and enough of the California sunshine to fit the term, "the Italy of Oregon." We do not envy Southern Oregon her renewed prosperity. The advancement of every portion of Oregon helps every other portion of this great commonwealth.—Statesman.

It is probable the question is raised for the first time in this state by the case at McMinnville, where a man may, in giving a deed prohibit over after the selling of liquor or any other commodity on that land. The decision will be watched for with much interest, as there are a number of additions which have now become parts of cities in this state in which all the original deeds bore such a proviso. It is not probable that such ideas will prevail against the sentiment of a majority of any community. It is like laws passed by Sabbatarians and temperance advocates. The average American citizen, if he believes himself unjustly restrained of his liberty by any law, would break that law. And when an approximate half of a community breaks a law it becomes a dead letter.—Ex.

Lawrence Stoveall, a 13-year old lad, living in the western outskirts of the city, lies prostrate near to his death with a ghastly gunshot wound through his head. In company with several other boys, last Wednesday afternoon, Lawrence was amusing himself firing off an old gun which had a piece of a bolt with the threads worn nearly smooth, plugged into it for a temporary breechpin. He fired the dangerous weapon once to offend; for upon his exploding it, finally the plug was blown out and went crashing into his brain, penetrating the boy's face at the right eye and passing backward lodged at the base of the brain, from which spot the doctors removed it. Drs. Applewhite and Leonard extracted the dangerous looking bolt. It was over an inch in length and was of half inch round iron. The boy is doing as well as could be expected, but his case is a critical and doubtful one.—Corvallis Gazette.
