Albert Hutton, from Mission bottom, called upon County Clerk Egan Monday for \$20 in payment of four coyote scalps. The county clerk has a band of sheep in the same locality so out of the fullness of his heart added \$2 more from his own purse. The farmers of Mission bottom encourage the killing of coyotes by paying a bonus for every scalp taken, so that it is worth about \$30 to the party who kills one of these pests.—Salem Independent.  
Mrs. C. Parrish, postmistress of Canyon City, Grant county, is short in her accounts with the government. In sum of about \$2500. The shortage developed when the United States postal inspector, now at Canyon City, went over the books at the office. The lady's bondsmen have been notified, and they will be compelled to make the shortage good. Mrs. Parrish is an estimable lady heretofore, and it is the supposition that members of her family have brought about the embarrassing predicament in which she finds herself. It is hoped that Mrs. Parrish will be able to exonerate herself from all blame.

A Mr. Maloney, of Portland, made application to the State Board recently to purchase a strip of land about 54 feet in width and one mile long, running through Hawthorne tract in East Portland, embracing about seven acres and worth about \$30,000. The claimant alleges that this land is subject to entry for the reason that the government survey does not close, and as this land is in section 36, a school section, he insists that the state must sell it to him at the regular price of \$1 25 cents per acre. The matter is pending before the board and will be settled as soon as Secretary McBride is able to attend a board meeting.  
One hen is a small animal, though she can make more fuss than an elephant if she pleases. When you put 20,000 chickens together, however you have a crowd. Twenty thousand broilers at \$1 a pair will make a business that 150 ordinary cows would have hard work to equal. And 600 laying hens will provide the eggs needed for the broilers. The hen, you see, is capable of big things. Why then are so many of her results counted as small things? Simply because the human beings who try to handle details do not attend to their business properly. The hen is all right unless some man gets in her way.—Rural New Yorker.  
The mines in Southern Oregon are coming into prominence. Several Lebanonites are there and many more are talking of going. Reports as to the richness of these mines are conflicting. Parties who have thought of going, have put themselves to the trouble of inquiring into the matter. Later reports indicate that the immediate prospects are far from flattering. There is more money in honest days work at good wages than is to be made in following up in person highly colored reports of the wealth of Oregon gold mines. Those who have gone may return with wealth, but the chances are that they will return laden with costly experience. Better stay at home.  
Supt. McElroy reports that Oregon's educational exhibit at the World's Fair is attracting great attention, and that this is especially true of our own exhibit of game birds, in the natural history department. Mr. McElroy showed the reporter a number of views of schools and groups of children that were to be forwarded at once, and they were very interesting including all grades, from the city high schools, with their crowds of well-dressed youths, to the backwoods mountain schools with bare-legged, bright faced children. There are about 1,850 school buildings in the state, and views of about one-half of them will be on exhibition at Chicago. If all other branches of Oregon's exhibit do as well the state will be greatly benefited.—Marion County Democrat.  
Monday night after Justice Elson's court had adjourned, Mr. and Mrs. G. C. Moon and Mrs. Jas. Crabtree, daughter of B. B. Burtenshaw, started for their home across the river. On driving out of Mr. Burtenshaw's gate and turning the horses toward home, in the darkness they missed the bridge crossing the gully which runs across the road at that place. The hack was upset throwing all three out and injuring Mrs. Crabtree quite badly. Mrs. Moon was also quite badly bruised up. Mr. and Mrs. Moon were able to start home the next morning. Mrs. Crabtree will not be able to go home for several days. The council should see that a railing is built on this bridge at once before some one is more seriously hurt. The law provides that a bridge of this size should be supplied with suitable railings and the matter should be attended to at once.

We learn from a medical contemporary that there is one doctor to every 2,800 inhabitants in Germany, one to 2,600 in France, one to 1,600 in England, and one to 600 in the United States. We learn further that in this blessed land there are now about 20,000 medical students including dental, pharmaceutical, veterinary. All of our doctors make a living; a good proportion of them grow wealthy, and we are assured that there are six or seven medical millionaires of the regular faculty in this city alone. Yet we live in a tolerably healthy country.—Ex.  
Fresh bread, pies and cakes kept constantly on hand at Mrs. May Zahn's. While Mr. T. J. Richey, of Altona, Mo., was travelling in Kansas he was taken violently ill with cholera morbus. He called at a drug store to get some medicine and the druggist recommended Chamberlain's Cholera, Cholera and Diarrhoea Remedy so highly he concluded to try it. The result was immediate relief, and a few doses cured him completely. It is made for bowel complaint and nothing else. It never fails. For sale by M. A. Miller.
