Robert Johnson, of Corvallis, on being interviewed at Chicago about the fair, said: "The world's fair is a mammoth optical delusion. The buildings are built principally of plaster and paint, but they present a spectacle as imposing as granite walls and perhaps answer their purpose as well. The unfinished condition of many buildings and exhibits is very unsatisfactory to the western visitor, who will likely see the fair but once yet there is as much here as the average sight-seer can absorb. The world's fair has not been over estimated—it is a wonderful sight and is a success in every way but financially. The Oregon exhibits of fruit and wheat are attracting much attention and I believe the best on the grounds."
