Speaking of the Oswego Iron Works, the Oregon City Enterprise says: The extensive additions which had to be made to the pipe foundry at Oswego before the large pipe required for the Bull Run pipe-line could be cast have been completed and the plant has been tested by casting two 35-inch pipes, which is the largest ever cast on this coast. All machinery required for casting this big pipe was found to be in working order so that the plant is now ready to begin work on the big sizes of pipe and it is expected that the foundry will start up next week.

About a year ago I took a violent attack of la grippe. I coughed day and night for about six weeks; my wife then suggested that I try Chamberlain's Cough Remedy. At first I could see no difference, but still kept taking it, and soon found that it was what I needed. If I got no relief from one dose I took another, and it was only a few days until I was free from the cough. I think people in general ought to know the value of this remedy, and I take pleasure in acknowledging the benefit I have received from it.
