STATE AND COAST.

Taken From Our Exchanges Through-out the Northwest.

The Benton county court will put in a new steel jail.

Another brick block is to be put up at Woodburn right away.

The Newberg fair will begin on September 24 for four days.

Patrick Gaten of Ona is 107 years old. He has just been visiting at Corvallis.

They are having hard work raising the beet-sugar subsidy for Union county.

California capital is looking at Ashland with a view of establishing a brewery.

Albert Tooley, a young Grant's Pass hoodlum, is doing 10 days for throwing stones at a train.

A drive of 2,000,000 feet of logs from the McKenzie has been delivered to the Harrisburg Saw Mill Company.

A house-to-house census of Newberg, taken under the auspices of the Graphic, shows 506 males and 510 females, in all 1016.

A water and electric light company has been formed at Independence. Power enough will be generated to light Moonmouth also.

The mill at Ashland mine has started crushing ore, and will be kept steadily at work, now that the upper level of the mine is free from water.

The log raft cradles form a prime attraction at Astoria. Sightseers contribute \$200 sometimes in a day to the street-car line which goes out to the scene of operations.

Parts of a large vertical Dow pump for the Salgin waterworks have begun to arrive. It will weigh 100,000 pounds and will complete a plant sufficient for a population of 25,000.

The first account of the Coquille post-office robbery mentioned \$100 as the amount taken. The Herald says there was stolen \$400 in money and \$300 in stamps. There is no clew to the thieves.

William J. Bostwick, of Uniontown precinct, Jackson county, who sowed 75 acres of wheat last spring, will harvest little or nothing, owing to the rust. It is said that a number of farmers in the Applegate section are likewise unfortunate.

The famous rock quarry, on Yaquina bay, has been sold to a gentleman from Flagstaff, Ariz. The force has been increased and work on contracts is being crowded. A portion of the land in the site was contemplated by the original owner, who contemplates opening out another quarry.

The Tillamook Headlight says it is understood that the prosecuting attorney will bring the woods-ferry accident to the attention of the jury, and fully investigate the cause of the accident wherein Mrs. Terrell lost her life, and if possible fix the blame where it belongs if any one was to blame.

On Monday Albert Hutton, a resident of Amity, dropped dead of heart disease. He had complained of heart trouble for about two weeks. He was in the doctor's office a few minutes before death came, and told the doctor that one of his spells was approaching, and before he could reach home he expired.

Some stems of apple trees have been exhibited at this office that distinctly show how the miller is getting in its deadly work for the next year caterpillar. This insect is now very busy depositing its eggs on the new growth of wood, preferring strong, vigorous trees. The eggs are laid in circles, then gummed over with a covering that is impervious to cold or rain.

Next spring when the sap starts these eggs will soon bloom out into full-size caterpillars and get in their destructive work. In some sections these millers can be seen after sundown in swarms. Prompt and active mobilization will only prevent their ravages next year.

WATERLOO NOTES.

The thirsty still continue to arrive. O. P. Coshov, of Brownsville, is camping here.

One man at least will be cured of heart disease when the "Maples" leave. The mormon camp still camps; as yet no visible good is noticeable.

Our serial will have to wait as we did not receive all the material required, but after the ball, Aug. 31, we hope to have a full stock.

Some of the young ladies have been heard to remark, since the Salem boarder arrived at the Falls View house, "Wat's in a name?"

Saturday evening the spring was visited by the Lebanon delegation including those immaculate geats, the two Georges. The waters in the spring were unusually strong; so was their breath to judge from their language.

The attendance at the several places of worship Sunday were small. One preacher had two hearers, and the saints have ceased to draw a full tent. Flies and fleas play an important part in the matter, we speak for one only.

Some one is thinking strongly of going into the harness business. He has begun operations by slicing harness into small pieces at night. The gentleman is known and when he comes once more to enter his trade he will be received with open doors—at the city hall.

Friday night another dance was given; it came up to our expectations, the same old gang of hoodlums were there. Some came in a lumber wagon and were supplied with rocks to throw upon the houses of those who had the temerity to try to sleep while a Waterloo dance was in progress. Come again boys we vote on your little favors.

Saturday and Sunday nights are set apart for those who believe in nothing but having a good time. Saturday night two young bloods filled up with stagger juice and then took in the Mormon camp. Not being able to create any discord there they adjourned to the north end of town where one fell in with the strong arm of the law and marshal. The town is some seven dollars better off than before his visit. The other escaped as his red hair was mistaken for a brush fire.

There was once a man who desired to have the streets of Waterloo sprinkled. Donations poured in and one sprinkler was built on the plan of Noah's Ark. It also favors the school building by being two stories high. One application only was applied last year and this year the character it tells the tale. Dust is 2½ feet deep on the level in the town and in a few of the most dangerous places bridges have been built. Any one needing a bin that will hold some 1,500 bushels of grain would do well to purchase the sprinkler. No team can be found that can draw the empty box from the river to the streets. Mr. Clark was going to lease it to open a restaurant in, but could not get a bonus from the citizens.

Bad Outlook for Wool. Ex-Governor Z. F. Moody was in Portland Wednesday, en route to The Dalles from a visit with his family at Salem. The governor is the largest individual wool dealer in the state, and his warehouse at The Dalles handle a percentage of the clip of Eastern Oregon. He says the tariff bill that has just passed congress will ruin the wool interest of this state. With no protection for this immense industry, Australia and other foreign countries will flood American markets, and there is no possible way to maintain a market price sufficient to warrant wool production.

The average annual output of wool in Oregon, the governor says, is about 20,000,000 pounds. The Dalles handling about one-quarter. The market price there at this time is from 7 to 9 cents, the lowest ever known. Ever since the advent of the domestic administration, however, free trade prices have prevailed, and the producer in consequence has suffered severely. This uncertainty has now developed into a painful reality, and it seems easy to predict the future of what has been one of Oregon's greatest industries and pointed to with pride by every resident in the state.

Governor Moody is enthusiastic over the handsome yield of grain east of the mountains, which to a certain degree, may compensate for the demergeric death blow to wool.

At Coos bay the sknook run of salmon is late putting in appearance this year. Fishermen, up to the present, have been making very poor catches.

Ex-Sheriff Noland, of Lane county, is to be sued again. Last week he turned over to the county treasurer the amount of \$5,211.25, retaining from the funds in his hands the sum of \$5,031.77, which he claims as fees due him for services while acting as sheriff. The court claims that he is entitled to these fees, and made an order to the effect that George B. Dorris be employed to assist the prosecuting attorney in bringing suit against Mr. Noland and his bondsmen for the recovery of the \$5,031.77, unless paid at once.

The man who broke the windows of a Dalles hotel because a free dinner was denied him some time in July has bobbed serenely again in a similar role. He was sentenced to 55 days in jail for his sport and has been working steadily since his incarceration, gaining the good will and confidence of his custodian. For nearly a month he has been a trusty, and has behaved himself in an exemplary manner. Wednesday night, however, he fell from grace, for somehow he managed to get a "jug" of beer aboard, and in the night he took his boots and smashed all the windows in the city jail he could reach. He will have to serve out another 50-day sentence.

FOSTER ITEMS.

Mr. Floyd Rowell has started a dairy.

License have been issued for Calamity and Pat.

Mr. Clyde Shafer of Shedd has returned home.

Prodral and Herbert Rolfe have returned again.

Mr. S. Cooley went to Lebanon one day this week.

Mr. S. A. DeVaney has built a barn around his hay.

Miss Rosa Traxell was able to be out to church Sunday.

Miss Stella DeBoise spent last Sunday at Happy Home.

Miss Sarah Rienhart has been quite ill but is improving.

Mrs. Lizzie Webber has returned to her home in Brownsville.

Miss Nettie Connet of Sweet Home is now stopping close to this place.

Mr. Walter Vanhorn has gone to Lebanon to work in the paper mill.

There will be services here every first and third Sunday in the month.

Mr. Edd Keen gave us a short call not many days ago. Stay longer next time Edd.

Who is Calamity Jane and where does she live? I should like to get acquainted with her.

Mr. Hiram DeBoise came out of the mountains Sunday. He had a fine time fishing while up there.

Will McElroy is able to be out again. Its too bad Ort every time you go some one else goes too.

Prof. Pat's school will be out Wednesday and all are invited to come and take part at the grand celebration.

Mr. Bunney Banford passed through the city but he didn't stop to get his dinner. He said he did not see Foster it was out of sight.

Henry Sturdivent has started a hotel in this city. Look out for your purse boys, his wife and the sweet Foster singer are chief cooks. Herbert says he cannot take dinner there only every Sabbath.

TA-RA-RA-BOOM-DE-A.

HAPPY HOME ITEMS. Harvest is in full blast.

Wheat is only about half a crop and oats not near up to other years.

John S. Caldwell of Lebanon stayed with Mr. and Mrs. Cummings Sunday evening.

Mr. Grant Lindly and Mr. Edwards are running W. G. Brown's hay baler.

Mr. James has his new barn complete. He is a rustler of the old stripe.

Some good friend took the liberty to take several balls of binding twine from W. G. Brown's place the other evening.

Grandpa and Grandma Cummings spent last Sunday with their daughter at Waterloo and had a nice time.

Mrs. Molly Ges has been left alone for several days also some others by their better halves working in harvest away from home this is hard for the farmers when they have to work out for a living. Still it shows industry and what the farmers are driven to by starvation prices.

Mrs. Gleason of Waterloo and children walked over to Spring farm Thursday and spent a few days with her parents W. H. and L. J. Cummings.

W. G. Brown had the misfortune to loose a very fine young mare the other day but luck seems to follow him.

W. H. Cummings attended the Later Day Saints meeting at Waterloo Sunday conducted by Rev. Holt. Mr. Holt is a good logical reasoner and it will pay any one to hear him.

BERDOCK. Highway Robbery. Jos Clayton, who is employed on the McKenzie stock farm, met with a rather novel and exciting experience last evening. He had been attending church in Eugene and started home in his buggy about 10 o'clock. When at the Judkins point three men came upon him, one getting hold of the horses' bits, while the others, one on each side of the buggy, requested him alight. Clayton lost no time in doing so, and was without ceremony relieved of \$3.44 of the money in his possession, a pair of gold cuff buttons and a pocket knife. The men then warned Clayton to go ahead, not look back nor return, which admonition he followed. We did not learn if he could give a description of the robbers. —Guard.
