Bulgaria West Vill With Joy Over the Visit of the Baby Prince.

A man of 84 years and a boy of as many hours are the two most conspicu-ous figures in Europe today. One, it is feared, must soon close one of the most feared, must soon close one of the most remarkable public careers of this or any ofner age. The other, born in a palace, may some day sit upon a rather shaky throne. All Europe has smiled indu-gently over the extravagant welcome with which Prince Ferdinand and his subjects received the wee bit of human-ity at Sofia. The royal youngster must think this world an awful humbug. Before he had a chance to enjoy his

think this world an awful humbug.

Before he had a chance to enjoy his first meal he was frightened half to death by the firing of 101 cannon under his window. He had hardly donned his awaddling clothes before he was condemned to be "Bearer of the Collar of the Order of St. Alexander." The poor child would have howled in protest, but the royal decree informed him that as the chief of three regiments of infuntry, cavalry and artillery no such weakthe chief of three regiments of infan-try, cavalry and artillery no such weak-ness would be tolerated. Some ordina-ry infant indulgences might be permit-ted him as prince and duke, but as a full fledged "Knight of the First and Fourth Class Military Order of Valor" he must preserve the stern dignity of

his rank.

It was a hard week for him. In the first place, the palace yard was througed night and day by his singing, dancing, affectionate subjects. His royal daddy, the of the nurse's protests, persisted affectionate subjects. His royal daddy, in spite of the unree's protests, persisted in daugling him at a window several times a day, to the frantic delight of the cheering crowds. The whole principality took a week's holiday, and the rejoicing was so spontaneous and unrestrained that the fration found the spectacle a welcome relief from the solemn crole at welcome relief from the solemn bondon better.

THE NICKEL STEEL GUN.

Interests the Government Ordrance Shops
Over the New Method of Assembling.
The force at the Washington ordnance
shops has nearly completed the assembling of the first nickel steel gun for the
navy, and the result is awaited with interest. The ordnance officers have been
sugged some time in the construction
of a furnace for heating the tube of
this gun, which is of 8 inch caliber.
The furnace will apply the heat to the
gun in a borizontal instead of in a perpendicular position. The jacket, the
place of metal which fits over the base
of the tube and gives it greater strongth. of the tube and gives it greater strength, will be forced over the tube while the latter is kept beyond the expanding in-fluences of the heat by the constant ap-plication of a stream of water.

plication of a stream of water.

The dolay in assembling the gun, the forgings of which have been ready for some time, has been caused by the difficulty in securing a pyrometer, a delicate instrument for registering the fear-ril heat of the furnace. This instrument has been received, and everything in ready for the assembling of the gun. There is naturally much interest among ordnance experts over the result of the There is naturally much interest among ordnance experts over the result of the new system of putting great guns together, for, if the proposed method is a success, it will take the place of the old way, which required a good deal of shifting of heavy weights and the use of a shrinking pit.

There is also much interest in the trial of the nickel steel gun. It is expected that it will prove stronger and of longer life than the simple steel gun.—Washington Star.

Died While the Dectors Quarreled.
Here is the latest episode of Parisian life. The cold weather of late has been rather severe on the simian population of the gay capital, and it was keenly felt by Maurice, the orang-outang of the Jardian d'Acclimatation. When Maurice fell ill, it was decided by the managers of the Jardian that inamuch as Maurice possessed far more resem-Mamrice fell ill, it was decided by the managers of the Jardin that inasmuch as Maurice possessed far more resemblime to a man than to an animal, a regular doctor should be summoned, and accordingly the services of a physician were invoked. On his arrival however, the doctor declared that, as the patient occupied an intermediary place between the quadrumanes and the humanes, its treatment should devolve upon a voterinary surgeon, who, however, hesitated to assume the responsibility on the ground that Manrice was more human than beast. While the discussion was in progress While the discussion was in progress between the two medicus the mankey died,—Boston Herald.

The architekep of Canterbury, at a church convocation the other day, entered a strong protest against the growing tendency to what is called "coddling suicides."

He protested against the conventional verdict of temporary insulty in order to grant a Christian burial. In spite of te grant a Christian burial. In spite of the repugnance to speak ill of the dead, suicide is becoming too prevalent, and a beel hier public sentiment against it should be encouraged. He urged that newspaper headings, instead of being "Romantic," "Pathetic," "Interest-ing," should be "Revolting Salf Mur-der,"—London Exchange.

Wants a Convict Wife.

Warden Weyler recently received at
the penitentiary a latter in which the
writer saked "if there is a young girl
in your prison the age of 16 or 17, 18
or 30 years who can be taken out by
marrying." The writer asked an anmarrying. The writer asked an an-awer and signed the name of John Mob-ley, adding the names of his father and mother and the information that he was born in Wilson, N. C. No address was given to which an answer to the letter might be sent.—Baltimore Sun.

Present Pseuliarities.

Things are being run with a rather bigh band in not the best localities in Present. The kicking in of doors and the solving against their wishes and dragging around of women by men loaded down with six shooters is bound to result in bloodshed. —Prescott (A. T.)

Clum, oh, so close, to her shanged face
The our drew down! How could she is
Harmif as she lay shrouded there
In the white woulder of the snow?

The Elder Dumas.

Of his Sheridan-like dealings with trademen an anecdote is told. During a searcity of ice a neighbor of Dumas jent to a dealer for some and was told that the limited stock on hand was kept for the use of the famous author. Then the gantisman sent again and bade his servant ask for the ice in the name of M. Dumas. The plan succeeded. The ice was given, and the sorvant put down the money on the counter. "Ah," cried the tradesman, "give me back that ice! Now I know that you are not from M. Dumas. He never pays ready money."

"My father," said M. Dumas file, "once told me that if he could portion out a new life he would be a handsome woman till 30, a victorious general from 30 to 50 and a cardinal in his old age." Dumas, as he related this parental desire, glanced toward Rossini and added. "I should merger to close my life.

age." Domas, as he related this par-ental desire, glanced toward Ressini and added: "I should prefer to close my life as an illustrious composer. Mon cher Rossini, when you enter a room, the very lacquer pronounces your name with pride as he amounces you." Then turning to the company he con-tinued: "Announce, for instance, M. le Duo d'Aumale and Signor Rossini at the same moment and see on which side all

Due d'Aumale and Signor Ressini at the same moment and see on which side all heads and all hearts will incline first. All eyes would be on the great musician who created 'Il Barbiere de Soviglia.'' And then we all filled our glasses with armagnac of the vintage of 1611 and drank the health of Rossini. The old composer did not rise, but his face broke out into voluminous smiles as he shook the hand of the author of "La Dame Aux Camellias."—Philadelphia Times.

Aux Camellias."—Philadelphia Times.

Pompetian Business announcements are to be found at Pompeii, that brisk little city to whose daily life the energy of Vesuvius has lant a kind of immortality. Here we get a large number of miscellaneous inscriptions dealing with matters of daily life, announcements of forthcoming gladiatorial games, edicts of magistrate, wine sellers' attempts to captivate outsomers, rewards for lost or stolen property, houses for sale or to be let and other things of that sort.

We learn from one announcement that a glass of wine could be got for 1 as—about 3 farthings—while for 4 assess one could drink real Falernian. Another inscription informs us that a denarius—about 7% parcs—was paid for washing a tunic, and the date, the 18th of April, is carefully recorded by the writer. Whether she was the laundress or the owner of the tonic must be laft undecided, but it cesses at least that she was in the habit of marking up her washing account on the walls of her house.

There are several anch inscriptions on

There are several such inscriptions on the same wall of this particular house, all dated—the 20th of April, a tunic and pallium; on the 7th of May, an ar-ticle which need not be particularized, while on the day following two tunics are scored.—Macmillan's Magazine.

Dishes and Platters of Gold.

Queen Victoria's wonderful set of table furniture is kept in two fireproof chambers and is said to represent a cash value of £30,000,000. Among it is the golden table service made for George VI, calculated for 130 guests and containing the famous crystal champagne cooler which is large enough for a bathtub. There are many pieces in it that formerly belonged to Queen Elizabeth, besides splendid solid gold vessels from India, Siam and Chins. The pride of the collection is a teacup once owned by Charles XII and a gold peacock made for George III at a cost of £40,000.—

8t. Louis Republic.

A Difficult Fest.

Fashington Star.

It is seldom that wood which has grown more than 4,900 years before the Christian era is used in the construction of a present day residence, and yet this really happened recently in Edinburgh, where a mantelpiece was fashioned from wood said to be 6,000 years old.

The old fashion of using the candied petals of the orange blossom in tea seems to be almost forgotten. If a few of the candied petals be put into the tea before it is steeped, they give it a flavor noticeably peculiar, but once esteemed years fine.

Temmy heard itis mother call an in-sect that was flying around them the darning needle. The next day he said, "Mamma, were those funny things we saw yestenday safety pins?"

The title mayor comes from the French and originally signified "one who keeps guard." He was the bond steward of a city, administering its affairs in the name of the king.

Statistics show that mild winters are such more conductive to hearth than trace or to.

AN OLD PRESCRIPTION.

Do This Particular Occasion it Patied to Do Its Work.

The crowd had gathered about a house and buggy in the middle of the street.

The house indepalted.

"Tie a string around his ear," said one of the hystanders. "It gives him

"It gives him tomething else to think of. I never know

A string was produced and wound lightly round one of the animal's ears. It had no effect.

"Blindfold him," suggested another. A bandage was tied over his eyes and an effort made to start him,

Same result. "Back him."

"He won't back," said the exasper sted owner. "I tried that." "Try him with an ear of corn." The ear of corn failed to move the

obstinute horse

"I'll see if I can't persuade him so other way," said the exasperated owner of the animal.

He took a whip and belabored th ast with it till somebody threatened

to have him arrested.

Then he kicked him awhile.

All in vain. Finally a benevolent looking old gentieman forced his way through the crowd and said:

"I have seen a great many balky press started by building a fire under them. Can you get some straw or shav

A boy was sent to a neighboring fu niture store for some excelsior. He came back presently with a huge armful. It was placed on the ground under the horse and a lighted match touched to it,

As the first feeble flame rose from it and the smoke began to curl about his legs the horse unbent a little. He turned his head, took a calm survey of the situntion, and when the combustible sto borst into a big blaze he moved forward about six feet, in soft possession of his faculties and without any unnecessary

haste, and stopped again.

And the elegant buggy was damaged
\$25 worth by the flames before it occurred to anybody to scatter the blazing

And then an old colored man in a fad-ed suit of secondhand clothes and a hat with half the brim gone went out and spoke kindly to the high spirited animal, rubbed his nose, patted him on the neck, climbed into the damaged buggy

and said, "Git along, sonny."

And the horse moved off at a brisk trot, with head high in the air.—Chicago Tribune

Wanted a Good Foot.

Models are an important part of a miptor's need. I doubt whether in this particular se differ from our Greek predecessors, for we read of choice prespredecessors, for we read of choice presents, such as peacocies, given by Phidias to his models, showing how much he valued them, presumably because it was as difficult theh as now to get good ones.

To be a model is a business of itself, and when we remember the number of art schools there are, even in London alone, and the many artists who are entirely dependent upon them, it may be

tirely dependent upon them, it may be realized what a large body they must be. The men are mostly Italians, chiefly, I am told, from the neighborhood of

Naples. The women are, as a rule, English and have often sat from babies. To find a well formed foot is almost an imman a west formed foot sames an increase possibility among the best of them, owing to the long cramping in boots, but a friend once told me that he had a cast of the foot of an Indian woman that was as beautiful as the foot of a Greek

Our English models lack often the suppleness of figure that distinguishes more southern races, such as the Italian, which is partly accounted for by the beavy, cumbersome clothes our climate necessitates. But such as they are we have to make the best of them, and a really good one is eagerly sought after.

—Good Words.

The early traditions concerning the city of Damascus are curious and interesting, even though untrustworthy and contradictory. By some of the ancient writers it was maintained that the city partment reproached him bitterly for his neglect of duty.

"It's not my fault," replied the fireman. "I live quite a distance from the which, it is said, God took the material from which he created Adam. This field is called Ager Damasceous, and near its center there formerly stood a pillar which was said to mark the precise spot where our first parent was cre-ated. A few miles out there is an emi-nence called the Mountain of Abel, supposed by some to be the place where the first two brothers offered their sacrifices, also the spot where the first muring spot pointed out, however, is about three leagues from the city, where an old ruin is shown which all the orient balleve to be the tomb of Cain. The traditions respecting this famous spot are known to antedate the Christian era by several hundred years. Up to the time of Vespasian the interior of the tomb is said to have been lighted and warmed by one of the "ever burning" lamps so commonly used by the ancients.—St. Louis Republic.

"I know an old soldier who had chronic diarrhoes of long standing to have been permanently cured by takng Chamberlain's Colic Cholera and Diarrhoea Remedy," says Edward Shumpik, a prominent druggist of Minneapolis, Minn. "I have sold the romedy in the city for over seven years and consider it superior to any other medicine now on the market for bowel complaints." 25 and 50 cent bottles of remedy for sale by N. W. Smith, drug-

The next Legislature should enact a law requiring bicyelists to turn out of the road or stop their machines when they meet a team. These knights of the wheel seem to think that the roads were made for them, and some of them seem to delight in taking up the entire road. In driving through the mountains many bicycles are met. Some of the riders show much courtesy in their efforts not to scare teams, while others have no regard to the danger their sudden appearances makes for people with horses easily frightened.

Isaac Banta's Invention

Mr. Banta who professes to have discovered the only successful mode of preserving all the fine gold in the sands and who has been conducting a mining business near Seal Rock, left man brought him two pounds of dirt carelessly picked up by him in that region and it turned out nearly two cents gold dust. A lot of farmers the Big Bend being discouraged at their prospects and knowing there is a little gold scattered in the earth bordering the Columbia they had been at work trying to secure it. Learning of Banta's invention they sent one of LEBANON, their number to him with a specimen of the earth. Mr. Banta is confident if it turns out as he hopes it will be a great thing .- Statesman.

MEDFORD, Or., Aug. 21 -- County rant. The warrant was issued Decemsented five days later and was paid about August 9, 1889, and then read in advance will be entitled to the same \$193.80. A close inspection of the offer. treasurer's memorandum shows that the warrant was raised after having fortune to receive a small bottle been presented, by R. H. Moore, now same amounted to \$69.37. The clerk's warrant. Beyond this, there is no except in figures in the corner. Other discoveries of this nature are expected.
