The Sunset Gulf Route.

The Morgan Steamship Line, which is owned and operated by the Southern Pacific company, is the connecting link between New Orleans and New York, and the fast time made by these steamers enables the Southern Pacific company to handle freight over their Sunset-Gulf route very expeditiously between the Pacific coast and the Atlantic seaboard. The El Sol held the pennant for the fastest trip between New York and New Orleans. There has been considerable rivalry between Captain George W. Mason, of the El Sol, which was built by the Cramps in 1890, and Captain Quick, of the El Rio, built at Newport new last year, but the El Rio held the record ever since she was added to the fleet. On an recent trip, south, however, El Sol made the run from bar to bar in four days, seven hours and one minute, and from her dock in New York to her dock in Algiers the time was four days, fifteen hours and sixteen minutes. El Sol is 396 feet long, forty-six feet eight inches beam, thirty-four feet deep and 424 tons register. The other steamers of this line are the El Dorado, El Paso, El Monte, El Norte, Excelsior, El Mar and El Sud. The El Sid, formerly belonging to this line, was sold to Brazil and converted by that government into an armored cruiser, and used in their late war.

Thousands Coming.

Editor Hofer, of the Salem Journal, who recently returned from the Middle West speaks in the following emphatic manner: The press of the state is speaking quite freely of the growing tide of immigration from the east to Oregon. The forerunners of an army of several hundred thousand people are now arriving on every train. The hundreds of thousands undoubtedly are to come in the next two years. No one can doubt that the population of the Willamette valley will double within five years and contain a round half million of people. The Journal speaks from positive knowledge when it says thousands of families in the Dakotas, Iowa, Minnesota, Nebraska, Illinois, Missouri and Kansas will come to Western Oregon in the next six months. Those states have all been more or less afflicted with drought, short crops and intolerable suffering from hot weather the past year. In some of them vast areas were literally burnt up by the heat and drought, causing great suffering, destitution and depopulation. The people in those sections have food for neither themselves nor stock, and no water or fuel.

WATERLOO RUMORS.

Election has left us alive, but our standing in the community has received a set-back during the year and we are among those who mourn.

One now walks the streets and with wringing hands and distorted facially howls "She is gone."

The Teachers Institute held here was all that we anticipate—in a word it was a success. This is one of the ways the overworked teachers find enjoyment and learning.

The woolen mill is being completed internally and in a few weeks we will see the place look like another Lowell. An electric light plant is to be one of the conveniences of the factory. Waterloo may yet be as large as Sodaville.

Rumor has it that D. Andrews has secured a lease to Gbs Hall and will start a store here for the benefit of mankind and himself. We need a general store and believe one would receive a fair patronage.

H. G. Klum has taken charge of the Falls View Hotel and under his able management we predict there will be a good run of the Summer boarders. The house could not be in better hands.

News reached us by a late post that Arthur Parker, of Portland, is married, truly some lady has drawn a prize. We expect him here in a short time as it is natural for all great and good men to hanker after this place; it may be because living is so cheap—in Summer soda water and fun—in winter the blues and mud.

The town has been so quiet for the past month on account of the dance license being raised to \$2.50 per night that we have employed a cheap boy to turn a coffee-mill at night until we find sleep, but now comes the new Council and declare dances, skating rinks, hucksters, and jawbons shall be free from the baleful influence of an exorbitant and unjust tax and you may expect to hear from us each week on and after January 1st.

There will be times and divisions of times interspersed with more home burglary and Police court jottings. The town is to be laid off in Wards at once under the new dispensation as we have now good timber for that article known as a "Ward politician". The town is going to bristle with cross-walks and hydrants and there are those who hint at a few old Lebanon street lamps. Oh! a free council is what has long been needed and prayed for by the prof's and ye Gods ye have it now ye even a free marshal.

Katsominling and froeseeling done in the neatest manner by H & J. Leave orders at the mill.

LEBANON OREGON.

A Pioneer Pedagogue.

A curiosity in the way of a country schoolmaster is Prof. John D. Woods, respectfully and respected. He has probably taught more terms of district school than any man in America. His career as a pedagogue began when he was seventeen years old in the Henkle mill school house on Mary's river, Benton county, in 1854. That was over forty years ago, and Prof. Woods, without rising above the dignity of a country schoolmaster, has followed the business ever since, winding up his last school in Douglas county last Friday. He has taught only in counties of the Willamette valley and he lacks only ten months of having taught 100 terms of school of three months each. He is anxious to secure another school, so that he may complete his 100 terms. He is a bachelor and 57 years of age. More than \$9,000 has been paid him for his services as schoolmaster, the most of it has gone to pay debts for indigent and unfortunate relatives. His last course of study was taken in Philomath, when he was 35 years of age.—Corvallis Times.

Committed Suicide.

On Saturday, J. H. Cobbletz, ex-warden of the Washington penitentiary at Walla Walla, who had been removed because a system of speculation he was carrying on had been discovered, whereby the state had been robbed of some \$15,000, committed suicide by shooting himself through the head, just as the sheriff was about to put him under arrest. His remains will be taken to his former home in Arkansas, where his wife and children will also go to her people.

A Hard Trip.

On Sunday Mr. T. P. Madill, who lives 50 miles from Albany, on the North Santiam, with the assistance of two neighbors, came into this city on a handcar, for the purpose of procuring a burial casket for his father-in-law, Mr. Geo. W. Whitman, who had died the day before, and returned with it, making the trip in sixteen hours. Any one who has helped to "pump" a hand car up the grades of the Oregon Pacific on the North Santiam will appreciate the labor connected with the act.—Herald.

Wednesday articles of incorporation were filed for the Farmers' Co-Operative Fire Insurance association of Oregon City, Oregon. The officers of the association are: M. L. Moore, president; W. A. White, vice-president; G. A. Cheney, secretary; C. H. Dye, treasurer. The association's system is similar to the Grange. They take three-tenths of premium down and a premium note for seven-tenths of cost for insurance, which will be held subject to assessment in case of emergency. It insures farm property and detached dwellings in the suburbs of towns and cities—Oregon City Courier.

Mr. Fields, superintendent of the S.P. railroad in Oregon, while out here last week, said that he thought a change in the running of the Lebanon branch would be made the first of the year. The proposed change is to run the Lebanon train from Albany to Lebanon then to Tallman, then up the Oregonian road to Woodburn and then back on the Oregonian road to Albany via Tallman. The Brownsville train in the morning would make connection with the Lebanon train at Tallman, then go to Albany and in the afternoon back from Albany to Lebanon, then back to Tallman and then to Woodburn.

Klamath Fall Express says: There was an amusing feature of the suit against Howe's bondsmen, Charles Moore, was one of the sureties and consequently a defendant. As county judge he had the suit instituted against himself, and was, therefore, plaintiff. He was, in fact, a client of counsel on both sides. When a verdict for the county was given, Judge Moore laughingly gave his hand to District Attorney Benson and said: "Well, we knocked 'em out." The judge himself being knocked out to the tune of several thousand dollars.

An exchange boasted that the city of Florence, after making many improvements was only nineteen dollars in debt. The Brownsville Times makes this a very poor showing compared with that city. The Times says: "The above is a very good record we admit, but it sinks into utter oblivion when compared to the record made by the prosperous little city of Brownsville. The streets have been improved, no assessments have been levied, the city does not owe a dollar and has upwards of \$600 out on interest. Brownsville is all O.K."

A terrible accident is reported from the neighborhood of Ollala. A Mrs. Brown was making soap and had just emptied a kettle of boiling soap into a tub, when her little boy, about five years of age, came up and fell or sat down in it, and was literally cooked up to his waist. The poor little fellow lived until the next morning. The parents are almost crazed with grief at the sad accident.

Heppner has been having no end of trouble with his fast children of both sexes. At the last council meeting a petition was presented asking that girls under age be prohibited from roaming the streets at night. There already being an ordinance to this effect, the marshal was instructed to enforce it. This means that no boys under the age of twenty-one years and no girls under the age of eighteen years are allowed on the streets without being in the company of their parents or guardians, going to or coming from public gatherings, or on streets during the night.
